Cisco Wireless LAN

642-586: Advanced Wireless LAN for System Engineers

Practice Exam: 642-586 Exams

Exam Number/Code: 642-586

Exam Name: Advanced Wireless LAN for System Engineers

Questions and Answers: 143 Q&As

([Wireless LAN](#))

Exam : [642-586](#)

"Advanced Wireless LAN for System Engineers", also known as 642-586 exam, is a Cisco certification. With the complete collection of exam questions, Just4Study has assembled to take you through 143 Q&As to your 642-586 exam preparation. In the 642-586 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Cisco Wireless LAN 642-586 (Advanced Wireless LAN for System Engineers) examination of original title complete coverage. 642-586 exam questions help you pass the exam.

Just4Study 642-586 Feature:

* High quality - High quality and valued for the 642-586 Exam: 100% Guarantee to Pass Your 642-586 exam and get your Wireless LAN certification.

* Authoritative - Authoritative braindumps with complete details about 642-586 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Wireless LAN resources, you will minimize your **Cisco Wireless LAN** cost and be ready to pass your 642-586 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Wireless LAN demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 642-586 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 642-586 Demo Download

Just4Study offers free demo for Wireless LAN 642-586 exam (Advanced Wireless LAN for System Engineers). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Cisco Wireless LAN 642-586** examination of original title complete coverage. 642-586 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 642-586

Exam Name: Advanced Wireless LAN for System Engineers(Wireless LAN)

Questions and Answers: 143 Q&A

[Cisco 642-586](#) Test belongs to one of the Wireless LAN certified test, if needs to obtain the Wireless LAN certificate, you also need to participate in other related test, the details you may visit the [Wireless LAN](#) certified topic, in there, you will see all related Wireless LAN certified subject of examination.

Just4Study professional provide Wireless LAN 642-586 the newest Q&A, completely covers 642-586 test original topic. With our complete Wireless LAN resources, you will minimize your Wireless LAN cost and be ready to pass your 642-586 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Cisco 642-586

Title : Cisco(r) Advanced Wireless LAN for System Engineers

1. The wireless advanced feature set uses which protocol for communication between the access point and the controller?

- A. WLCCP
- B. SNMP
- C. LWAPP
- D. CCKM

Answer: C

2. Which security feature was introduced in Cisco Compatible Extensions program version 3?

- A. AES
- B. CKIP and CMIC
- C. radio management
- D. EAP-Cisco Wireless (LEAP)

Answer: A

3. Which two key features are unique to the wireless advanced feature set using lightweight access points? (Choose two.)

- A. fast secure roaming
- B. rogue access point detection
- C. access point participation in RF management
- D. dynamic RF control without advanced management
- E. access point registration via digital certificate

Answer: DE

4. The wireless core feature set uses which protocol to facilitate fast secure roaming?

- A. CCKM
- B. LWAPP
- C. SNMP
- D. WLCCP

Answer: A

5. Which three key features are unique to the Cisco wireless autonomous access points and WLSE management? (Choose three.)

- A. rogue access point detection
- B. fast secure roaming via CCKM
- C. fast secure roaming via WPA2 PKC

- D. local authentication via access point
- E. client participation in RF management
- F. access point participation in RF management

Answer: BDE

6. Which WEP key protection method was introduced in Cisco Compatible Extensions program version 1?

- A. AES
- B. CKIP and CMIC
- C. radio management
- D. EAP-Cisco Wireless (LEAP)

Answer: B

7. Which two devices support link role flexibility? (Choose two.)

- A. Cisco Aironet 1400 Series wireless bridge
- B. Cisco Aironet 1300 Series outdoor access point/bridge
- C. Cisco Aironet 1240AG Series access point
- D. Cisco Aironet 1200 Series access point
- E. Cisco Aironet 1010 Series lightweight access point

Answer: CD

8. What is the Cisco recommended limit of access points to be managed by a WLSE 1130-19 with RF management enabled?

- A. 100
- B. 800
- C. 1500
- D. 1800

Answer: D

9. Which three faults are generated by radio management? (Choose three.)

- A. security misconfiguration
- B. AAA server availability
- C. interference detection
- D. friendly access point
- E. rogue access point
- F. ad-hoc networks

Answer: CEF

10. Which feature was introduced in Cisco Compatible Extensions program version 3?

- A. EAP-FAST
- B. CKIP and CMIC
- C. radio management
- D. EAP-Cisco Wireless (LEAP)

Answer: A

11. A customer currently has a deployment of 66 access points on a collapsed backbone. The customer wants to add Cisco 7920 wireless IP phones without segmentation of the network. Additionally, the customer requires the phones to be able to roam while maintaining the call. To provide fast secure roaming, it is recommended that WDS be implemented on which device?

- A. WLSE
- B. access point
- C. wireless LAN controller
- D. integrated services router

Answer: D

12. Which authentication mechanism was introduced in Cisco Compatible Extensions program version 2?

- A. AES
- B. CKIP and CMIC
- C. PEAP-GTC
- D. EAP-Cisco Wireless (LEAP)

Answer: C

13. Which feature was introduced in Cisco Compatible Extensions program version 1?

- A. WMM
- B. EAP-FAST
- C. radio management
- D. EAP-Cisco Wireless (LEAP)

Answer: D

14. The WLSE can update firmware on which two devices? (Choose two.)

- A. client
- B. router
- C. switch
- D. bridge
- E. access point

Answer: DE

15. A wireless using core feature set products uses which protocol for radio management?

- A. CCKM
- B. LWAPP
- C. SNMP
- D. WLCCP

Answer: D

16. A customer is adding a new branch office with 60 access points and 120 users that requires WDS to support a wireless VoIP application on a single subnet. Additionally, the customer requires local authentication services to provide authentication capability in the event of a WAN failure. Which product will support the customer requirements?

- A. Cisco 2811 Integrated Services Router
- B. Cisco 2851 Integrated Services Router
- C. Cisco 3845 Integrated Services Router
- D. Cisco 3745 Multiservice Access Router

Answer: C

17. Which feature was introduced in Cisco Compatible Extensions program version 2?

- A. EAP-Cisco Wireless (LEAP)
- B. radio management
- C. EAP-FAST
- D. WMM

Answer: B

18. When determining the feasibility of a bridging solution that is capable of supporting 54 Mbps of data rate using the Cisco Aironet 1410 Wireless Bridge in a point-to-point scenario, which criterion must be met?

- A. an indoor unit mounting location within 49 feet (150 m) of the outdoor unit
- B. distance of no greater than 15 miles (24 km)
- C. distance of no greater than 12 miles (19 km)
- D. each site must be visible from the other
- E. proper channel configured on the nonroot bridge

Answer: C

19. How many prior configuration versions can be archived on the WLSE?

- A. two
- B. four
- C. six
- D. eight

Answer: B

20. An integrated services router that is configured as a backup RADIUS server for wireless clients can support a maximum of how many user accounts?

- A. 1 to 50
- B. 400 to 500
- C. 900 to 1000
- D. none

Answer: C
