

## 642-871 braindumps

### Cisco CCDP

**642-871: Designing Cisco network Service Architectures (ARCH)**

**Practice Exam:** 642-871 Exams

**Exam Number/Code:** 642-871

**Exam Name:** Designing Cisco network Service Architectures (ARCH)

**Questions and Answers:** 271 Q&As

( [CCDP](#) )

Exam : [642-871](#)

"Designing Cisco network Service Architectures (ARCH)", also known as 642-871 exam, is a Cisco certification. With the complete collection of exam questions, Just4Study has assembled to take you through 271 Q&As to your 642-871 exam preparation. In the 642-871 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Cisco CCDP 642-871 (Designing Cisco network Service Architectures (ARCH)) examination of original title complete coverage. 642-871 exam questions help you pass the exam.

#### **Just4Study 642-871 Feature:**

\* High quality - High quality and valued for the 642-871 Exam: 100% Guarantee to Pass Your 642-871 exam and get your CCDP certification.

\* Authoritative - Authoritative braindumps with complete details about 642-871 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed CCDP resources, you will minimize your **Cisco CCDP** cost and be ready to pass your 642-871 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free CCDP demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 642-871 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free 642-871 Demo Download**

Just4Study offers free demo for CCDP 642-871 exam (Designing Cisco network Service Architectures (ARCH)). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Cisco CCDP 642-871** examination of original title complete coverage. 642-871 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

**VUE/Prometric Code: 642-871**

Exam Name: Designing Cisco network Service Architectures (ARCH)( CCDP )

Questions and Answers: 271 Q&A

[Cisco 642-871](#) Test belongs to one of the CCDP certified test, if needs to obtain the CCDP certificate, you also need to participate in other related test, the details you may visit the [CCDP](#) certified topic, in there, you will see all related CCDP certified subject of examination.

Just4Study professional provide CCDP 642-871 the newest Q&A, completely covers 642-871 test original topic. With our complete CCDP resources, you will minimize your CCDP cost and be ready to pass your 642-871 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Cisco 642-871

Title : Cisco Designing Cisco network Service Architectures (ARCH)

1. What is the frequency and maximum data rate of 802.11b?

- A. 5 GHz frequency and 2.4 Mbps data
- B. 5 GHz frequency and 54 Mbps data
- C. 2.4 GHz frequency and 1.44 Mbps data
- D. 2.4 GHz frequency and 11 Mbps data
- E. 1.44 GHz frequency and 2.4 Mbps data

Answer: D

2. What is the maximum number of IP phones recommended per wireless access point?

- A. 7
- B. 15
- C. 33
- D. 35
- E. 40

Answer: A

3. Which of the following is a web-browser based tool designed to provide administrative access for content networking?

- A. Content Distribution Manager (CDM)
- B. Self-Organizing Distributed Architecture (SODA)
- C. Web Cache Communication Protocol (WCCP)
- D. Cisco CallManager
- E. Hypertext Administration Design (HAD)

Answer: A

4. Which IP NAT implementation allows IPSec peers to establish a connection through a NAT device?

- A. PAT
- B. NAT-T
- C. Dynamic NAT
- D. IPSec ESP NAT

Answer: B

5. What is the frequency and maximum data rate of 802.11a?

- A. 5 GHz frequency and 54 Mbps data
- B. 5 GHz frequency and 10 Mbps data
- C. 2.4 GHz frequency and 10 Mbps data

D. 2.4 GHz frequency and 64 Mbps data

E. 12 GHz frequency and 12 Mbps data

Answer: A

6. What can be done to ensure connections to workstations that are placed on the edge of a wireless access point's coverage area?

A. lower data rates

B. increase data rates

C. group access point frequency channels together for increased range

D. enable multicasting

Answer: A

7. Which VPN management feature would be considered to ensure that the network had the least disruption of service when making topology changes?

A. dynamic reconfiguration

B. path MTU discovery

C. auto setup

D. remote management

Answer: A

8. Which two statements are true regarding a Cisco wireless LAN? (Choose two.)

A. Only IP can be transmitted over a wireless LAN.

B. All stations in a wireless cell share the bandwidth.

C. Wireless LANs use CSMA/CD access method.

D. Only one station can send at any one time.

E. Wireless LANs use a token sharing access method

Answer: BD

9. Which Cisco Works VPN/Security Management Solution gives administrators access to devices showing real-time status along with operational and configuration functions through a web browser?

A. VPN Monitor

B. CSPM

C. Resource Manager (RME)

D. Cisco View

E. IDS Host Sensor

Answer: D

10. Which action indicates the optimal level of functional process recovery in a high availability architecture?

A. Failure of a networking component is automatically detected.

B. The end-users are unaware that a failure has occurred.

C. The ailing component fails-over to an alternate component.

D. Automated alert mechanisms generate a dispatch for service.

E. Monitoring tools generate alert messages when a less than optimal condition occurs

Answer: B

11. What helps maximize throughput in a wireless LAN? (Choose two.)

A. minimize broadcasts

B. enable IPSec

C. increase size of roaming domains

D. use static WEP

E. filter multicast traffic

Answer: AE

12. What is the recommended maximum number of clients that an individual wireless access point should support?

- A. between 1 and 8
- B. between 10 and 30
- C. between 32 and 48
- D. between 64 and 96

Answer: B

13. Which IEEE wireless standard provides backward compatibility with 802.11b?

- A. 802.11a
- B. 802.1q
- C. 802.11g
- D. 802.11p

Answer: C

14. What happens when packets traversing the network exceed the MTU of an IPSec/VPN interface?

- A. They trigger a link failure.
- B. They are all discarded and re-transmitted.
- C. They are unable to be sent.
- D. They become fragmented

Answer: D

15. You are asked to design a VPN for a medium sized company. The company has 12 stationary offices and one main office. Each office is more than 80 miles away from the next. What type of VPN would you design for this situation?

- A. remote access VPN
- B. site to site VPN
- C. enterprise remote access VPN
- D. wireless VPN

Answer: B

16. Which protocol can be used to provide WLAN redundancy and low downtime?

- A. EAP
- B. SNMP
- C. WEP
- D. HSRP

Answer: D

17. What can be implemented on a LAN to speed up services for external users and minimize the load on network servers?

- A. VPN networking
- B. CSPM
- C. content networking
- D. fault tolerance

Answer: C

18. Choose the technology required for a VPN when multicast, broadcast, and non IP packets need to be tunneled.

- A. triple-DES
- B. IPSec
- C. GRE
- D. IKE
- E. ISAKMP

Answer: C

19. What can be done to limit area coverage of a wireless access point to provide added security?

- A. lower Mbps data rates
- B. increase Mbps data rates
- C. group access point frequency channels
- D. enable multicasting

Answer: B

20. Which Layer 3 protocol is used to provide data integrity, privacy, and security on a IP based VPN?

- A. GRE
- B. MD5
- C. PKI
- D. IPSec
- E. L2TP

Answer: D
