Nortel Other Nortel Certification

920-220: Nortel Converged Campus ERS Solution

Practice Exam: 920-220 Exams

Exam Number/Code: 920-220

Exam Name: Nortel Converged Campus ERS Solution

Questions and Answers: 64 Q&As

([Other Nortel Certification](#))

"Nortel Converged Campus ERS Solution", also known as 920-220 exam, is a Nortel certification. With the complete collection of exam questions, Just4Study has assembled to take you through 64 Q&As to your 920-220 exam preparation. In the 920-220 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Exam : [920-220](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Nortel Other Nortel Certification 920-220 (Nortel Converged Campus ERS Solution) examination of original title complete coverage. 920-220 exam questions help you pass the exam.

Just4Study 920-220 Feature:

* High quality - High quality and valued for the 920-220 Exam: 100% Guarantee to Pass Your 920-220 exam and get your Other Nortel Certification certification.

* Authoritative - Authoritative braindumps with complete details about 920-220 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Other Nortel Certification resources, you will minimize your **Nortel Other Nortel Certification** cost and be ready to pass your 920-220 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Other Nortel Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 920-220 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 920-220 Demo Download

Just4Study offers free demo for Other Nortel Certification 920-220 exam (Nortel Converged Campus ERS Solution). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Nortel Other Nortel Certification 920-220** examination of original title complete coverage. 920-220 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 920-220

Exam Name: Nortel Converged Campus ERS Solution(Other Nortel Certification)

Questions and Answers: 64 Q&A

[Nortel 920-220](#) Test belongs to one of the Other Nortel Certification certified test, if needs to obtain the Other Nortel Certification certificate, you also need to participate in other related test, the details you may visit the [Other Nortel Certification](#) certified topic, in there, you will see all related Other Nortel Certification certified subject of examination. Just4Study professional provide Other Nortel Certification 920-220 the newest Q&A, completely covers 920-220 test original topic. With our complete Other Nortel Certification resources, you will minimize your Other Nortel Certification cost and be ready to pass your 920-220 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Nortel 920-220

Title : Nortel Converged Campus ERS Solution

1. The Redundant Power Supply 15 (RPS15) will provide protection against which failure scenario?

- A. rolling blackouts
- B. power loss to the entire building
- C. failure of the primary AC power supply on the switch
- D. regional power surges and drops

Answer: C

2. A network employs SMLT-based switch clustering in a square topology. The network design needs to control the amount of broadcast traffic and protect the CPU from being flooded by traffic from a single, unstable port. To indicate a potential issue on the network, what rate should be set for the CPLimitUtilRate?

- A. A value lower than the average network traffic rate.
- B. A value higher than the average network traffic rate.
- C. A value equal to the average network traffic rate.
- D. A value equal to or higher than the network traffic rate.

Answer: B

3. A network configuration is using MLT-based SMLT switch clustering. You want to simplify troubleshooting on the network. Which network design practice will help simplify troubleshooting operations?

- A. Verify that all VLANs participating in SMLT are tagged on both ends of the IST.
- B. Distribute physical IST connections between different modules in the chassis.
- C. Use the same ID number for the MLT group and corresponding SMLT group.
- D. Make sure that the VLACP timers are set to the same value on both ends of the link.

Answer: C

4. A customer is using an Ethernet Routing Switch (ERS) 8300 to provide Power-over-Ethernet (PoE). They have recently purchased a number of devices that require PoE, and need to increase the PoE capacity on the 8300. They currently have one 8302AC power supply in the 8300 chassis and are not concerned with redundancy. Which procedure is required to provide the most amount of power?

- A. Install two additional 8301AC power supplies connected to 220V input.
- B. Install one additional 8302 AC power supply connected to 220V input.
- C. Install two additional 8302 AC power supplies connected to 220V input.
- D. Install three 8301AC power supplies connected to 220V input.

Answer: D

5. An engineer implemented a core network consisting of four Ethernet Routing Switch (ERS) 8600 systems and needs the ability to build a redundant core. Which feature would be used to provide redundancy and fail-over times?

- A. Protocol Based VLANs
- B. Split Multi-Link Trunking
- C. Multi-Link Trunking
- D. Spanning Forest

Answer: B

6. A customer is implementing Ethernet Routing Switch (ERS) 5500 series. The deployment scenario requires fiber links that will support 10 Gbps transmission speeds to a Data Center 30 Km away. Which switch and transceivers meet this requirement?

- A. ERS 5510 with 10GBASE-ER XFP transceivers
- B. ERS 5530 with 10GBASE-SR XFP transceivers
- C. ERS 5520 with 10GBASE-SR XFP transceivers
- D. ERS 5530 with 10GBASE-ER XFP transceivers

Answer: D

7. A customer needs a network architecture that provides sub-second failover and that ensures that multimedia and IP telephony will function flawlessly in the event of a single point of network failure. Which network design feature would you recommend?

- A. Switch clustering with SMLT
- B. Autonegotiation
- C. Link Aggregation Protocol
- D. Distributed MLT

Answer: A

8. A customer is implementing video conferencing devices that require Power-over-Ethernet (PoE). They are planning to use an Ethernet Routing Switch (ERS) 8310 chassis for this deployment. They would also like to install 8600 modules in the chassis. Which statement about this customer scenario is true?

- A. Both PoE and 8600 modules are supported in the 8310 chassis.
- B. Neither PoE or 8600 modules are supported in the 8310 chassis.
- C. The 8310 chassis does not support PoE, but will support 8600 modules.
- D. PoE can be supplied via the 8310 chassis, but will not support 8600 modules.

Answer: D

9. A network employs the autonegotiation feature, and you are getting many Excessive Frame Check Sequence (FCS) errors. What is the probable cause for these errors?

- A. RFI and FEFI for 100-FX connections is enabled.
- B. Autonegotiation on the server and corresponding switch port is disabled.
- C. Autonegotiation on one end of the link is enabled and disabled on the other end.
- D. Autonegotiation on the switch-to-switch ports is enabled.

Answer: C

10. Which multicast technology used with the Ethernet Routing Switch allows the router to determine whether any group members exist on its directly-attached networks and switches?

- A. IGAP
- B. IGMP
- C. DVMRP
- D. PIM-SM

Answer: B
