Exam : Nortel 920-235

Title : Nortel VPN Gateway RIs.7.0 Configuration & Management

1. How does TunnelGuard protect the network after a user has authenticated to the Portal?

- A. The TunnelGuard agent checks the client machine for keyboard loggers and other malicious applications.
- B. The TunnelGuard agent checks the client machine for policy compliance at boot up and restricts network access on failure.
- C. The TunnelGuard agent periodically checks the client machine for policy compliance and restricts network access on failure.
- D. The TunnelGuard agent continually checks the client machine for suspicious activity, restricts network access, and reports problems to the network administrator.

Answer: C

2. Which types of certificates must be installed on the Nortel VPN Gateway (NVG) to enable end-to-end encryption?

- A. client certificate installed on NVG, client certificate installed on backend server(s)
- B. client certificate installed on NVG and server certificate installed on backend server(s)
- C. client certificate installed on NVG and server certificate installed on backend server(s)
- D. server certificate installed on NVG and server certificate installed on backend server(s)

Answer: D

3. How would a service provider differentiate backend customer networks in a hosted VPN solution?

- A. It would assign a unique VLAN ID to each customer.
- B. It would assign a unique Portal IP address to each customer.
- C. It would assign unique user account names to each customer.
- D. It would assign a dedicated authentication server to each customer.

Answer: A

4. Which protocol does the Nortel VPN Gateway use to secure branch office tunnels?

- A. IKE
- B. IPSec
- C. HTTPS
- D. SOCKS-over-SSL

Answer: B

5. Which statement is correct with respect to WTS links?

- A. Only Internet Explorer is supported.
- B. The WTS link cannot be pre-configured with client settings.
- C. An embedded ICA client applet runs in any Web browser version.
- D. An embedded RDP client applet eliminates the need for a locally installed version.

Answer: D

6. Which attribute(s) can be specified in an access rules definition?

- A. IP address only
- B. IP address and TCP/UDP port
- C. IP address, TCP/UDP port, and application path
- D. IP address, TCP/UDP port, application path, and cookie value

Answer: C

7. How is the SSL VPN client deployed to a client machine?

- A. It is installed along with the NetDirect client.
- B. It is automatically installed when the user connects to the Web Portal.
- C. It must be installed prior to the client connecting to the Nortel VPN Gateway.
- D. It is manually downloaded and installed after the user authenticates to the Web Portal.

Answer: C

8. Which feature allows you to configure a policy that requires a client to have a trusted certificate in order to authenticate?

- A. client filter
- B. server filter
- C. TunnelGuard
- D. authentication filter

Answer: A

9. Which CLI area enables you to configure authentication methods?

- A. /cfg/sys/aaa
- B. /cfg/vpn #/aaa
- C. /cfg/ssl/aaa/auth
- D. /cfg/sys/aaa/remote

Answer: B

10. Which statement is correct with respect to PortalGuard?

- A. VPN authorization is disabled.
- B. VPN authentication is disabled.
- C. No additional license is required.
- D. Users must log into the Portal before accessing the backend Portal.

Answer: B
