Exam : [920-240](#)

"Nortel Wireless Mesh Network Rls. 2.3 Implementation & Management", also known as 920-240 exam, is a Nortel certification. With the complete collection of exam questions, Just4Study has assembled to take you through 60 Q&As to your 920-240 exam preparation. In the 920-240 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Nortel Other Nortel Certification 920-240 (Nortel Wireless Mesh Network Rls. 2.3 Implementation & Management) examination of original title complete coverage. 920-240 exam questions help you pass the exam.

Just4Study 920-240 Feature:

* High quality - High quality and valued for the 920-240 Exam: 100% Guarantee to Pass Your 920-240 exam and get your Other Nortel Certification certification.

* Authoritative - Authoritative braindumps with complete details about 920-240 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Other Nortel Certification resources, you will minimize your **Nortel Other Nortel Certification** cost and be ready to pass your 920-240 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Other Nortel Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 920-240 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 920-240 Demo Download

Just4Study offers free demo for Other Nortel Certification 920-240 exam (Nortel Wireless Mesh Network Rls. 2.3 Implementation & Management). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Nortel Other Nortel Certification 920-240** examination of original title complete coverage. 920-240 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 920-240

Exam Name: Nortel Wireless Mesh Network Rls. 2.3 Implementation & Management(Other Nortel Certification)

Questions and Answers: 60 Q&A

[Nortel 920-240](#) Test belongs to one of the Other Nortel Certification certified test, if needs to obtain the Other Nortel Certification certificate, you also need to participate in other related test, the details you may visit the [Other Nortel Certification](#) certified topic, in there, you will see all related Other Nortel Certification certified subject of examination. Just4Study professional provide Other Nortel Certification 920-240 the newest Q&A, completely covers 920-240 test original topic. With our complete Other Nortel Certification resources, you will minimize your Other Nortel Certification cost and be ready to pass your 920-240 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Nortel 920-240

Title : Nortel Wireless Mesh Network Rls. 2.3 Implementation & Management

1. Software running on a Wireless AP detects operational and functional anomalies that can cause fault conditions. On which three can the Wireless AP software detect status and problems? (Choose three.)

- A. DHCP leases
- B. Network Time Synchronization
- C. Wireless Gateway 7250 software error
- D. Wireless AP FTP server misconfigured
- E. Mobile node quarantine and IPsec tunnel status

Answer: ABE

2. A university has provisioned a Wireless Mesh Network (WMN) for its campus. What is the packet flow for an AP@NAP joining the network?

- A. IPsec tunnel initiated, OSPF routes are populated, FTP session initiated
- B. IPsec tunnel initiated, FTP session initiated, OSPF routes are populated
- C. OSPF routes are populated, IPsec tunnel initiated, FTP session initiated
- D. OSPF routes are populated, FTP session initiated, IPsec tunnel initiated

Answer: C

3. A university has provisioned a Wireless Mesh Network (WMN) for its campus. What is the packet flow for a mobile node joining the network?

- A. associate to a Wireless AP, authenticate through RADIUS, obtain IP address from DHCP server, register with home agent on the Wireless Gateway 7250
- B. associate to a Wireless AP, authenticate through RADIUS, register with home agent on the Wireless Gateway 7250, obtain IP address from DHCP server
- C. associate to a Wireless AP, obtain IP address from DHCP server, authenticate through RADIUS, register with home agent on the Wireless Gateway 7250
- D. associate to a Wireless AP, register with home agent on the Wireless Gateway 7250, authenticate through RADIUS, obtain IP address from DHCP server

Answer: A

4. A customer is using Enterprise Network Management System (ENMS) to manage fault data for a Wireless Mesh Network. Which two ways does ENMS collect this data? (Choose two.)

- A. Via polling by ENMS
- B. Via FTP server in NOSS
- C. Via traps sent by a device
- D. Via Syslog server in NOSS

Answer: AC

5. The Wireless Gateway 7250 has had a nonfatal fault condition; however, the Wireless Gateway 7250 has since been rebooted. What are two locations where information on the fault condition would be stored? (Choose two.)

- A. FTP server
- B. ENMS Fault Manager
- C. Crash file in the Wireless AP 7250
- D. Eventlog file on the Wireless Gateway 7250

Answer: BD

6. A technician has implemented the Wireless AP@NAP, but there are problems connecting to the 7250. Information in the event log indicates IPsec tunnel is not able to establish. Which two statements describe possible causes of this problem? (Choose two.)

- A. The MIP firewall filter was not configured.
- B. The AP@NAP IP address is set incorrectly.
- C. The IP address Pool for private IPs is exhausted.
- D. The user account for AP@NAP has the incorrect password.

Answer: CD

7. A technician has implemented the Wireless AP@NAP, but there are problems downloading the FTP configuration. Sessions indicate that an IPsec tunnel is established. Which two statements describe possible causes of this problem? (Choose two.)

- A. The FTP server is not started.
- B. The private IP address Pool is exhausted.
- C. The configuration file is named incorrectly.
- D. There is an incorrect Default Gateway on AP@NAP.

Answer: AC

8. What must be installed with Enterprise Network Management System (ENMS) to provide support for the Wireless Mesh Network?

- A. SNMP agent software
- B. Device Integrated Toolkit
- C. Wireless Mesh Network MIB
- D. ICMP polling and trap registration

Answer: B

9. A university has provisioned a Wireless Mesh Network (WMN) for its campus. What is the packet flow for a standalone Wireless AP?

- A. Transit Link Up, Radius Authentication, IP received via DHCP, Config downloaded via FTP OSPF routes populate, IPsec Tunnel established
- B. Transit Link Up, Radius Authentication, IP received via DHCP, OSPF routes populate, IPsec Tunnel established, Config downloaded via FTP
- C. Transit Link Up, IP received via DHCP, OSPF routes populate, Radius Authentication, IPsec Tunnel established, Config downloaded via FTP
- D. Transit Link Up, IP received via DHCP, Radius Authentication, OSPF routes populate, IPsec Tunnel established, Config downloaded via FTP

Answer: B

10. A Wireless AP 7220 has reported a fault condition to Enterprise Network Management System (ENMS). A technician has identified and taken corrective action to resolve the alarm condition. Which action may be required to clear future traps?

- A. Restart ENMS to apply new parameter values.
- B. Reboot the Wireless AP 7220 to apply new parameter values.

- C. Drop and reestablish transit links to apply new parameter values.
- D. Reboot the Wireless Gateway 7250 to apply new parameter values.

Answer: B
