920-333: Mommunication Server 1000 Ris.5.0 Upgrades for Technicians

Practice Exam: 920-333 Exams

Exam Number/Code: 920-333

Exam Name: Mommunication Server 1000 Ris.5.0 Upgrades for Technicians

Questions and Answers: 55 Q&As

([NCSS](#))

"Mommunication Server 1000 Ris.5.0 Upgrades for Technicians", also known as 920-333 exam, is a Nortel certification. With the complete collection of exam questions, Just4Study has assembled to take you through 55 Q&As to your 920-333 exam preparation. In the 920-333 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Exam : [920-333](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Nortel NCSS 920-333 (Mommunication Server 1000 Ris.5.0 Upgrades for Technicians) examination of original title complete coverage. 920-333 exam questions help you pass the exam.

Just4Study 920-333 Feature:

* High quality - High quality and valued for the 920-333 Exam: 100% Guarantee to Pass Your 920-333 exam and get your NCSS certification.

* Authoritative - Authoritative braindumps with complete details about 920-333 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed NCSS resources, you will minimize your **Nortel NCSS** cost and be ready to pass your 920-333 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free NCSS demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 920-333 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 920-333 Demo Download

Just4Study offers free demo for NCSS 920-333 exam (Mommunication Server 1000 Ris.5.0 Upgrades for Technicians). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Nortel NCSS 920-333** examination of original title complete coverage.920-333 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

Exam Name: Mommunication Server 1000 Ris.5.0 Upgrades for Technicians(NCSS)

Questions and Answers: 55 Q&A

[Nortel 920-333](#) Test belongs to one of the NCSS certified test, if needs to obtain the NCSS certificate, you also need to participate in other related test, the details you may visit the [NCSS](#) certified topic, in there, you will see all related NCSS certified subject of examination.

Just4Study professional provide NCSS 920-333 the newest Q&A, completely covers 920-333 test original topic. With our complete NCSS resources, you will minimize your NCSS cost and be ready to pass your 920-333 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Nortel 920-333

Title : Mommunication Server 1000 Ris.5.0 Upgrades for Technicians

1. A customer is upgrading from a Communication Server 1000S to Communication Server 1000E RIs. 5.0 and requires a High Availability configuration. Which package must be in place for this to occur?

- A. Package 329 for ESA
- B. Package 410 for CP-PM Servers
- C. Package 404 for GRPRIM for Primary System
- D. Package 405 for GRSEC for Secondary System

Answer: B

2. A customer has an installed network of two Communication Server 1000E systems. Their Main Numbers for their emergency response teams terminate into Site A and are answered by an Emergency operator.

Answered calls are transferred to Site B where each team is located. They want to take advantage of the CLID enhancement which allows the users at Site B to see the originating partys information at the terminating set, even before the transfer is complete. They use Peer-to-Peer MCDN over IP trunks for the connections from site A to B.

3. A customer has multiple Communication Server (CS) 1000Es. When calls are placed on hold, they want to provide the same music network-wide to their calls. Which configuration is needed for this support?

- A. Network Music is provided only to those calls that are transferred to the music source using Release Link Trunk over H.323.
- B. Music Trunks are installed only on the primary node, connecting to an analog TIE trunk using H.323/SIP virtual trunks. Only calls placed on hold at the primary node will receive this specific music source.
- C. Network Time Protocol (NTP) which is used to synchronize local clocks across the network to a single, accurate, third party NTP server, such as a radio clock.
- D. Music Trunks are installed on the remote nodes and connected back-to-back with an analog TIE trunk, which is auto-terminated to the primary DN of a Network Music Agent. When a music trunk is seized, the call is connected to the Audio Server through an H.323/SIP virtual trunk. A network music path is then established.

Answer: D

4. A customer is upgrading to Communication Server (CS) 1000 RIs. 5.0 from a CS 1000E CP-PIV on RIs. 4.5. The customer is requesting the least-cost upgrade solution. What should be proposed?

- A. Upgrade Call Server hardware and software.
- B. Upgrade software and upgrade SS memory to 1 GB.
- C. Upgrade processors to new CP-PM CS and upgrade software.
- D. Upgrade CP-PIV CS to CP-PM CS, SS memory to 1 GB, software and replace the SSC cards with Media Gateway Controllers.

Answer: B

5. A customer is upgrading to a Communication Server 1000E RIs. 5.0 and wants to use a COTS with Signaling Server functionality to RIs. 5 since they are using the H.323 Gatekeeper. The customer does not want to deploy Enterprise Common Manager (ECM). In this configuration, which COTS should be configured?

- A. COTS Server running LINUX
- B. COTS Server running VxWorks
- C. COTS Server running LINUX with CS 1000 Management
- D. COTS Server running LINUX with NRS Redirect Services

Answer: B

6. A customer is upgrading from Meridian 1 Option 11C RIs. 24 to a Communication Server 1000E RIs. 5.0 Standard Availability with a single Media Gateway 1000E chassis and has decided to install a new CP-PM Call Server card. Which step(s) are required to migrate a Small System database to the CP-PM?

- A. Complete an inventory of the Small System using LD 117 and then migrate using LD 10 and LD 11.
- B. Backup the Small System database using LD 43 EDD and then archive the database using LD 143.
- C. Configure MGCONF and MGTDs separately and map them to a specific CP-PM CS prior to migration.
- D. Use the `issp` command in LD 22 to determine MGC Loadware PEPS and then use the `lwinst` command to activate the MGC Loadware patch.

Answer: B

7. A customer is upgrading to Communication Server 1000E RIs. 5.0 and installing new 1110E, 1120E and 1140E IP Phones. The customer also wants an Expansion Module for the IP Phone 1100 Series to be used with the 1110E IP telephones.

Which must occur to ensure a successful installation process?

- A. Order the correct IP Phone 1100 Series telephones that support the Expansion Module for the IP Phone 1100 Series.
- B. Follow the testing parameters after installing the IP Phone 1110E connected to an Expansion Module for the IP Phone 1100 Series.
- C. Follow the installation procedure for installing the 1110E IP telephones and connecting the Expansion Module for the IP Phone 1100 Series to the 1110E IP telephones.
- D. Determine the proper power requirements since the IP Phone 1110E connection to the Expansion Module for the IP Phone 1100 Series has a unique power requirement.

Answer: A

8. A customer has upgraded to Communication Server 1000E RIs. 5.0 and is using the Management Tool NRSM on Linux. In conducting a search for Routing Entries, the engineer is looking for a specific number range. The engineer wants to secure all entries from the entire service domain and identify specific end points where they terminate. What is a more efficient procedure for searching for Routing Entries?

- A. Enter the specific DN type + the entire scope searching.
- B. Enter `*56*` (considered a wild card) + the entire scope searching.
- C. Enter `#56#` (considered a wild card) + the entire scope searching.
- D. Enter the specific service domain + the entire service domains to specific endpoints.

Answer: B

9. A customer is upgrading from a Meridian Option 11C to a Communication Server (CS) 1000E RIs. 5.0 Standard Availability. What happens to the Terminal Numbers (TNs) during the upgrade?

- A. The Small System (Card-Unit) TNs are retained.
- B. The TNs are automatically converted to the Large System format (Loop - Shelf - Card - Unit) for all assigned TNs.
- C. The TNs are manually changed to the Large System format (Loop - Shelf - Card - Unit) by re-programming all devices assigned TNs.
- D. The TNs for only the IP Phones are automatically converted to the Large System format (Loop - Shelf - Card - Unit). All other devices assigned TN must be manually re-programmed.

Answer: B

10. A customer is upgrading to Communication Server 1000E RIs. 5.0. During their database configuration, they need to ensure that the Emergency Services for Client Mobility feature is supported, but they are uncertain whether their upgrade supports this application.

What prompt(s) should be enabled, and what configuration is needed to ensure this support?

A. ESA must be disabled. Emergency Response Location (ERL), Emergency Caller Location (ECL) and internal Location Information Service (Package 336) must be programmed.

B. ESA Package 329 must be enabled and programmed, allowing the Emergency Response Location (ERL) and Emergency Caller Location (ECL) and internal Location Information Service (Package 336) to be used.

C. New System Type 4021 must be activated before the Emergency Response Location (ERL) and Emergency Caller Location (ECL) appear in Web Station.

D. The addition of HA Package 410 must be activated before the Emergency Response Location (ERL) and Emergency Caller Location (ECL) appear in Web Station.

Answer: B
