[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Nortel 920-441

Title : NNCDE Contivity Security Exam

1. A customer is concerned about limiting factors of the Contivity firewall. What should the customer consider as the primary limiting factor of the Contivity firewall?

- A. number of firewall rules
- B. number of firewall session
- C. maximum sustainable aggregate throughput
- D. the amount of system memory related to the firewall

Answer: C

2. A designer is considering utilizing the Contivity Stateful Firewall feature. What effects can be expected if logging is utilized for large volume traffic?

- A. Logging will improve system performance.
- B. Logging will affect the system only if using syslog.
- C. Significant logging will have no affect on the system.
- D. Significant logging will cause performance degradation of the system.

Answer: D

3. Your company has initiated a VoIP solution that utilizes IPSec tunnels to protect certain confidential phone connections. The system has implemented QoS on all of its interfaces utilizing DiffServ. Recent communications have shown poor VoIP performance during maximum traffic load times relating solely to the IPSec protected traffic. Which IPSec related functionality is likely related to the problem?

- A. ISAKMP
- B. 3DES encryption
- C. Anti-Replay protection
- D. Perfect Forward Secrecy

Answer: C

4. Which security method does Firewall User Authentication use during the authentication process?

- A. IKE
- B. IPSec
- C. HTTPS
- D. Digital Certificates

Answer: C

5. Which statement best describes Perfect Forward Secrecy?

- A. ensures that the ISAKMP negotiations cannot be compromised by hackers
- B. ensures that during rekeying for IPSec that the keys are protected during the exchange
- C. ensures that keying materials will always be strong enough to protect data confidentiality

D. ensures that one key being compromised cannot result in the compromise of subsequent keys

Answer: D

6. A customer wants to optimize their firewall performance using firewall rule sets. How can the customer achieve this objective?

- A. Firewall rules sets should be based on protocol usage.
- B. There is no way to optimize firewall performance using rule sets.
- C. Firewall rules should be placed such that the highest utilized rules are seen later in the rule set so to limit the number of rules the firewall needs to compare to pass the traffic.
- D. Firewall rules should be placed such that the highest utilized rules are seen early in the rule set so to limit the number of rules the firewall needs to compare to pass the traffic.

Answer: D

7. A customer wants to optimize their firewall performance using firewall rule sets. How can the customer achieve this objective?

- A. Firewall rules sets should be based on protocol usage.
- B. There is no way to optimize firewall performance using rule sets.
- C. Firewall rules should be placed such that the highest utilized rules are seen later in the rule set so to limit the number of rules the firewall needs to compare to pass the traffic.
- D. Firewall rules should be placed such that the highest utilized rules are seen early in the rule set so to limit the number of rules the firewall needs to compare to pass the traffic.

Answer: D

8. A designer has designed a firewall system with a DMZ. What are two types of traffic that should not be normally allowed? (Choose two.)

- A. traffic initiated from the DMZ
- B. traffic from the Internet to the DMZ
- C. traffic from internal users to the DMZ
- D. traffic from internal services to the DMZ

Answer: AC

9. Your company has recently added a large acquisition to your network infrastructure that includes a large number of Remote Access users. Some sections of this group have shown suspicious use on the VPN connections that you wish to curtail. At what level can the Contivity Firewall apply filters or stateful firewall rules to secure these connections?

- A. individual User
- B. group of users
- C. all users uniformly
- D. only applies to branch office tunnels

Answer: B

10. A designer has recommended that rule sets on a firewall be limited to 30 rules. What rationale did the designer use to make this recommendation?

- A. performance concerns
- B. Contivity can't handle more rules
- C. simplicity of rules to prevent rule conflicts
- D. the lack of training of most Firewall Administrators

Answer: C
