

## 920-452 braindumps

### Nortel NCSE

#### 920-452: NCSE-Communication Server 1000 Ris.4.0

**Practice Exam:** 920-452 Exams

**Exam Number/Code:** 920-452

**Exam Name:** NCSE-Communication Server 1000 Ris.4.0

**Questions and Answers:** 56 Q&As

( [NCSE](#) )

"NCSE-Communication Server 1000 Ris.4.0", also known as 920-452 exam, is a Nortel certification. With the complete collection of exam questions, Just4Study has assembled to take you through 56 Q&As to your 920-452 exam preparation. In the 920-452 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Exam : [920-452](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Nortel NCSE 920-452 (NCSE-Communication Server 1000 Ris.4.0) examination of original title complete coverage. 920-452 exam questions help you pass the exam.

#### **Just4Study 920-452 Feature:**

\* High quality - High quality and valued for the 920-452 Exam: 100% Guarantee to Pass Your 920-452 exam and get your NCSE certification.

\* Authoritative - Authoritative braindumps with complete details about 920-452 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed NCSE resources, you will minimize your **Nortel NCSE** cost and be ready to pass your 920-452 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free NCSE demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 920-452 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free 920-452 Demo Download**

Just4Study offers free demo for NCSE 920-452 exam (NCSE-Communication Server 1000 Ris.4.0). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Nortel NCSE 920-452** examination of original title complete coverage.920-452 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: 920-452**

Exam Name: NCSE-Communication Server 1000 Ris.4.0( NCSE )

Questions and Answers: 56 Q&A

[Nortel 920-452](#) Test belongs to one of the NCSE certified test, if needs to obtain the NCSE certificate, you also need to participate in other related test, the details you may visit the [NCSE](#) certified topic, in there, you will see all related NCSE certified subject of examination.

Just4Study professional provide NCSE 920-452 the newest Q&A, completely covers 920-452 test original topic. With our complete NCSE resources, you will minimize your NCSE cost and be ready to pass your 920-452 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Nortel 920-452

Title : NCDE Callpilot 2.x/3.0 Unified Messaging

Version : Demo

1. A customer has a Communication Server (CS) 1000 RIs. 4.0 that they want to network with two other sites using the corporate WAN. Why must zones be configured with Element Manager before the Virtual Routes? (Choose two.)

- A. Zones determine NCOS privileges on a given trunk.
- B. Zones govern trunk groupings for TGAR assignment.
- C. Zones help determine Best Bandwidth CODEC per virtual trunk call.
- D. Zones manipulate CODEC selections and assigns bandwidth to a route.
- E. Zones provide call blocking based on Bandwidth defined for inter- and intra-zone calls.

Answer: CE

2. A customer has installed a Communication Server (CS) 1000M RIs 4.0 system. Currently all 800 IP telephones at the site are registered to a single Signaling Server . This site has three installed media cards. What component(s) should be added at the site to ensure full redundancy for IP telephones?

- A. an additional Signaling Server must be installed and set as Failsafe
- B. an additional Signaling Server must be installed and programmed as Follower
- C. an additional Signaling Server must be installed and programmed as Alternate
- D. two additional media cards to ensure that all 800 IP telephones can register to media cards if the Leader Signaling Server fails

Answer: B

3. A company plans to have a Communication Server (CS) 1000 RIs. 4.0 Main Office (MO) site with one Media Gateway 1000B branch office (BO) site. The BO and MO will be connected via virtual trunks. Users at both sites will use Coordinated Dialing Plans (CDPs) to dial between the sites. They want long distance and CDP calls originating from the BO to route to the MO. All long distance calls will be tagged as international calls originating from the BO. They have no plans to expand the BO in the future. What is the most efficient way of routing calls from the BO?

- A. In the Gatekeeper, select the BO as the tandem endpoint for the MO.
- B. In the Gatekeeper, select the MO as the tandem endpoint for the MO.
- C. In the Gatekeeper, select the MO as the default route for CDP and international calls. All NPA ranges will need to be defined under the MO.
- D. In the Gatekeeper, all Numbering Plan Areas (NPAs), international numbers, and CDP steering codes should be defined under the MO.

Answer: C

4. A customer has just installed a Communication Server (CS) 1000M system. The CS 1000M is networked via the corporate WAN with several offices around the country. BARS is configured correctly for all telephones to use this route and the Virtual Trunks show IDLE. Traffic studies have shown that the majority of calls to remote locations are

going out via the PSTN route instead of the virtual route. What in the configuration could cause this situation?

- A. CODEC is not assigned to the Virtual Trunk Route
- B. Bandwidth is incorrectly defined in the Zone Basic Property
- C. CODEC not defined for the zone in the Zone Basic Property
- D. Bandwidth is not defined for the Virtual Trunk Route and member trunks

Answer: B

5. A company has a two-site Communication Server (CS) 1000 RIs. 4.0 system (site A and B) providing IP-PBX services. Both systems are networked via a managed IP backbone. One system is a CS 1000 RIs. 3.0 Main Office (MO) and the other is a Media Gateway 1000 RIs. 4.0 branch office (BO). You configure the networked systems to enable the following: ? Users at the MO to call BO workstations by dialing 49xxx. ? Users at the BO to call MO workstations by dialing 2xxx. Which initial configuration task should you perform using Element Manager (EM)?

- A. Configure an LSC of 2 and a DSC of 49 in the MO.
- B. Configure a DSC of 2 in the MO and configure VNR in the BO.
- C. Configure a DSC of 49 in the MO and configure Vacant Number Routing (VNR) in the BO.
- D. Configure a Local Steering Code (LSC) of 49 and a Distant Steering Code (DSC) of 2 in the BO.

Answer: C

6. A customer is installing a Communication Server (CS) 1000M-SG RIs. 4.0 at their Main Office (MO). They have a 10-member network using the corporate WAN and a Primary Gatekeeper. They want to use an Alternate Gatekeeper for redundancy. When are the Alternate Gatekeepers programmed? (Choose two.)

- A. during software installation and initial setup of the Signaling Server
- B. in Overlay LD 17 (Configuration) under the ADAN as an ELAN IP address
- C. in Overlay LD 117 (Configuration2) as an Embedded LAN (ELAN) IP address
- D. in Element Manager under the Signaling Server setting after the software has been installed

Answer: AD

7. A company has two Communication Server (CS) 1000 RIs. 4.0 systems networked together with the following components: ? 800 IP Phone 2002 telephones at site A ? 600 IP Phone 2004 and 300 IP Phone 2002 telephones at site B Network Virtual Office is configured to enable IP telephone users to use their customized settings (i.e., autodials, key layout, etc.) on every IP telephone in the CS network. They want to use the Virtual Office Automatic Logout (VO\_ALO) feature to log out all IP telephone users from their IP telephones automatically. To configure the VO\_ALO feature, which task should you perform using the Command Line Interface (CLI)?

- A. Access Overlay LD 15, then enable VOLA.
- B. Access Overlay LD 15, then enable VO\_ALO.
- C. Access Overlay LD 11, then enable VO\_ALO for each Terminal Number (TN).
- D. Access Overlay LD 11, then enable Virtual Office Login Allowed (VOLA) for each TN.

Answer: B

8. A company has a multi-site Communication Server (CS) 1000M-Chassis RIs. 4.0 system. If one of the Media Gateways goes into Survival Mode, they want Manual Control to restore the Media Gateway into Normal Mode. In Overlay LD 117, which command should you use to achieve this configuration?

- A. Chg Surv &lt;port> No
- B. Chg Surv &lt;port> Yes
- C. Chg Autosb &lt;port> No
- D. Chg Autosb &lt;port> yes
- E. Chg Swoto &lt;port> &lt;value>

Answer: C

9. A customer has a network that contains several Communication Server (CS) 1000 RIs 4.0 systems. They are networked together via Virtual Trunks. The customer has limited bandwidth on the WAN links between sites and has an Optimized WAN link to carry Voice calls that use G.729A. Which configuration setup will ensure that G.729 is always used on a virtual trunk call between sites?

- A. No extra configuration is needed. Virtual Trunk calls always use G.729A CODEC.
- B. ? configure the virtual route to be in same zone as voice gateway channels and IP sets ? verify that the customer has G.729A as part of CODEC profile ? verify all zones at the site are configured with best quality for intrazone calls and best bandwidth for interzone calls
- C. ? virtual route is configured to be in different zone than the voice gateway channels and IP sets ? verify the customer has G.729A as part of CODEC profile ? ensure all zones at the site are configured with best quality for intrazone calls and best quality for interzone calls
- D. ? the virtual route is configured to be in a different zone than voice gateway channels and IP Sets for each system ? verify the customer has G.729A as part of CODEC profile ? ensure all zones at the site are configured with best quality for intrazone calls and best bandwidth for interzone calls

Answer: D

10. A customer has installed two Communication Server (CS) 1000M RIs. 4.0 systems networked over the corporate WAN. Some of the system management functions of the CS 1000M can be performed by the Command Line Interface (CLI) as well as Element Manager. Which is a false statement regarding the use of Element Manager (EM) over the CLI?

- A. EM provides for drop down menus for prompt choices.
- B. EM provides full text descriptions of parameters and acronyms.
- C. EM allows the programmer to use the LD commands as well as using menus.
- D. EM increases speed and efficiency by organizing parameters to logical groups.

Answer: C
