Nortel Other Nortel Certification

920-462: ncse-ethernet switching (baystack/bps/8600) exam

Practice Exam: 920-462 Exams

Exam Number/Code: 920-462

Exam Name: ncse-ethernet switching (baystack/bps/8600) exam

Questions and Answers: 56 Q&As

([Other Nortel Certification](#))

"ncse-ethernet switching (baystack/bps/8600) exam", also known as 920-462 exam, is a Nortel certification. With the complete collection of exam questions, Just4Study has assembled to take you through 56 Q&As to your 920-462 exam preparation. In the 920-462 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Exam : [920-462](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Nortel Other Nortel Certification 920-462 (ncse-ethernet switching (baystack/bps/8600) exam) examination of original title complete coverage. 920-462 exam questions help you pass the exam.

Just4Study 920-462 Feature:

* High quality - High quality and valued for the 920-462 Exam: 100% Guarantee to Pass Your 920-462 exam and get your Other Nortel Certification certification.

* Authoritative - Authoritative braindumps with complete details about 920-462 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Other Nortel Certification resources, you will minimize your **Nortel Other Nortel Certification** cost and be ready to pass your 920-462 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Other Nortel Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 920-462 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 920-462 Demo Download

Just4Study offers free demo for Other Nortel Certification 920-462 exam (ncse-ethernet switching (baystack/bps/8600) exam). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Nortel Other Nortel Certification 920-462** examination of original title complete coverage. 920-462 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 920-462

Exam Name: ncse-ethernet switching (baystack/bps/8600) exam(Other Nortel Certification)

Questions and Answers: 56 Q&A

[Nortel 920-462](#) Test belongs to one of the Other Nortel Certification certified test, if needs to obtain the Other Nortel Certification certificate, you also need to participate in other related test, the details you may visit the [Other Nortel Certification](#) certified topic, in there, you will see all related Other Nortel Certification certified subject of examination. Just4Study professional provide Other Nortel Certification 920-462 the newest Q&A, completely covers 920-462 test original topic. With our complete Other Nortel Certification resources, you will minimize your Other Nortel Certification cost and be ready to pass your 920-462 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Nortel 920-462

Title : NCSE-Ethernet Switching (baystack/bps/8600) Exam

1. The following commands complete a configuration for traffic filtering on a Passport 8600. missing command config ip traffic-filter global-set 1 add-filter 1 config ethernet 1/2 enable-diffserv true config ethernet 1/2 ip traffic-filter create config ethernet 1/2 ip traffic-filter add set 1 config ethernet 1/2 ip traffic-filter default-action forward config ethernet 1/2 ip traffic-filter enable Step one is missing. Which is the missing command?

- A. config ip traffic-filter filter 1 forward equal
- B. config ip traffic-filter traffic-profile 1 info
- C. config ip traffic-filter global-set 1 create name gfilter1
- D. config ip traffic-filter create global src-ip 10.1.1.2/30 dst-ip 172.1.1.29/30 id 1

Answer: C

2. Click on the exhibit button. For the network configuration exhibit provided, the customer has the following requirements: 1. For a source IP address of 10.1.1.1, set DSCP = CS7 (111000) 2. For all http flows (TCP port = 80), set DSCP = AF31 (011010) 3. For all other traffic, set DSCP = AF11 (001010) 4. Configure the ingress port 1-2 as untrusted 5. Configure the egress ports 1-5 and 1-31 as trusted Based on the customer's requirements and the exhibit, regardless of the ingress VLAN on port 1-2 of the Passport 8600, in what order will the DiffServ DSCP be remarked?

- A. AF 11 for all traffic AF31 for traffic from any flow with TCP port number 80 CS7 for traffic from host 10.1.1.1
- B. AF 11 for all traffic CS7 for traffic from host 10.1.1.1 AF31 for traffic from any flow with TCP port number 80
- C. AF31 for traffic from any flow with TCP port number 80 CS7 for traffic from host 10.1.1.1 AF 11 for other flows
- D. CS7 for traffic from host 10.1.1.1 AF31 for traffic from any flow with TCP port number 80 AF 11 for other flows

Answer: D

3. You have created a global filter with the following commands: config ip traffic-filter create source src-ip 10.1.1.1 dst-ip 45.5.1 id 3 config ip traffic-filter filter 3 action mode forward config ip traffic-filter set 303 create name estfilter? FRQILJLSWUDIILFILOWHUVHWFUHDWHQDPH ? HVWILOWHU config ip traffic-filter set 303 add-filter 3 config ethernet 1/2 enable-diffserv true config ethernet 1/2 ip traffic-filter create Which command would be used to add the source filter to port 1/2?

- A. config ethernet 1/2 ip traffic-filter add set 3
- B. config ethernet 1/2 ip traffic-filter add set 303
- C. config ethernet 1/2 ip traffic-filter enable set 3
- D. config ethernet 1/2 ip traffic-filter add set estfilter? FRQILJHWKHUQHWLSWUDIILFILOWHUDGGVHW ? HVWILOWHU

Answer: B

4. Click on the exhibit button. A customer wants to use IP Subnet VLANs to provide routing between VLAN 2 and VLAN 3 connected to the BayStack BPS switch, and configure the core port as a Brouter port with RIP. Assuming

that this was done correctly, which portion of the PP8600A configuration file identifies the right Brouter configuration?

- A. ethernet 2/7 ip create 10.1.1.1/255.255.255.252 2090 mac_offset 2 ethernet 2/7 ip rip enable ip rip enable
- B. ethernet 2/7 ip create 10.1.20.1/255.255.255.252 2090 mac_offset 2 ethernet 2/7 ip rip enable ip rip enable
- C. ethernet 1/48 ip create 10.1.1.1/255.255.255.252 2090 mac_offset 2 ethernet 1/48 ip rip enable ip rip enable
- D. ethernet 1/48 ip create 10.1.20.1/255.255.255.252 2090 mac_offset 2 ethernet 1/48 ip rip enable ip rip enable

Answer: A

5. A stock trading firm has just installed a server for online trading. Once a customer requests a stock trade via the Internet, the server must interface with the Stock Exchange via their Passport network, using a protocol which supports authentication, encryption and integrity assurance. Which supported protocol is appropriate for the Passport configuration?

- A. RADIUS Client
- B. RADIUS Server
- C. Secure Shell (SSH) Client
- D. Secure Shell (SSH) Server

Answer: D

6. Click on the exhibit button. Instead of using IP policies and with no router attached to VLAN 2, the following command will enable RIP on PP8600A adding the local interface to the RTM for RIP: config vlan 2 ip rip enable Which series of commands will optimally complete this type of RIP configuration on PP8600A shown in the exhibit?

- A. config vlan 2 ip rip listen enable
- B. config vlan 2 ip rip supply enable
- C. config vlan 2 ip rip supply enable config vlan 2 ip rip listen enable
- D. config vlan 2 ip rip supply disable config vlan 2 ip rip listen disable

Answer: D

7. Click on the exhibit button. Which commands will configure the labeled Ethernet ports appropriately?

- A. config ethernet 3/1 enable-diffserv true config ethernet 1/1 access-diffserv true
- B. config ethernet 3/1 enable-diffserv true config ethernet 1/1 access-diffserv false
- C. config ethernet 1/1,3/1 enable-diffserv true config ethernet 1/1 access-diffserv true
- D. config ethernet 1/1,3/1 enable-diffserv true config ethernet 3/1 access-diffserv true

Answer: C

8. A customer with a Passport 8300 switch is configuring Remote Access Dial-In User Services (RADIUS) to provide a high degree of security against unauthorized access to the switch. They configured ten RADIUS servers on the client (Passport 8300 switch). What will happen if an authentication request is rejected by the first of five RADIUS servers configured on the switch?

- A. Local authentication is made on the switch itself.
- B. No local authentication is made on the switch itself.
- C. If the first server is unavailable, the Passport 8300 tries the second and so on until it establishes a successful connection.
- D. If the first server rejects the authentication request, the Passport 8300 tries the second and so on until it establishes a successful connection. If all of them reject the request, local authentication is made on the switch itself.

Answer: B

9. A customer wants to configure SNMPv3 on the Passport 8300 switch. SNMPv3 requires a loadable module for the encryption libraries. What does this module contain and how must you modify the config file to load this module?

- A. The module contains keycode and the string load-module KEY/flash/<key_filename>; must be inserted in config file
- B. The module contains SSH algorithm and the string load-module SSH/flash/<ssh_filename>; must be inserted

in config file The module contains SSH algorithm and the string ?oad-module SSH/flash/<ssh_filename>?must be inserted in config file

C. The module contains DES algorithm and the string oad-module DES/flash/<des_filename>?must be inserted in config file The module contains DES algorithm and the string ?oad-module DES/flash/<des_filename>?must be inserted in config file

D. The module contains license algorithm and the string icense-module DES/flash/<des_filename>?must be inserted in config file The module contains license algorithm and the string ?icense-module DES/flash/<des_filename>?must be inserted in config file

Answer: C

10. Click on the exhibit button. In the exhibits shown, you are required to setup a filter configuration as follows. Forward all http traffic (TCP port 80) directly to the WEB servers using a forward-to-next hop of 10.1.1.1. Forward all VoIP traffic (UDP port 2300-2363) directly to the VoIP servers using a forward-to-next hop of 10.1.1.14. From the partial list of commands in the exhibit, will this configuration meet the requirements listed above?

- A. No, filter 3 is ranging the wrong UDP ports.
- B. No, filter 1 is forwarding to the wrong IP address.
- C. No, filter 2 is should be dropping traffic, not forwarding.
- D. Yes, this configuration matches the requirements listed above.

Answer: D
