Nortel NCSS NCTS

920-803: Nortel technology standards and protocol for ip telephony solutions

Practice Exam: 920-803 Exams

Exam Number/Code: 920-803

Exam Name: Nortel technology standards and protocol for ip telephony solutions

Questions and Answers: 55 Q&As

([NCSS NCTS](#))

Exam : [920-803](#)

"Nortel technology standards and protocol for ip telephony solutions", also known as 920-803 exam, is a Nortel certification. With the complete collection of exam questions, Just4Study has assembled to take you through 55 Q&As to your 920-803 exam preparation. In the 920-803 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Nortel NCSS 920-803 (Nortel technology standards and protocol for ip telephony solutions) examination of original title complete coverage. 920-803 exam questions help you pass the exam.

Just4Study 920-803 Feature:

* High quality - High quality and valued for the 920-803 Exam: 100% Guarantee to Pass Your 920-803 exam and get your NCSS certification.

* Authoritative - Authoritative braindumps with complete details about 920-803 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed NCSS resources, you will minimize your **Nortel NCSS** cost and be ready to pass your 920-803 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free NCSS demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 920-803 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 920-803 Demo Download

Just4Study offers free demo for NCSS 920-803 exam (Nortel technology standards and protocol for ip telephony solutions). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Nortel NCSS NCTS 920-803** examination of original title complete coverage.920-803 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 920-803

Exam Name: Nortel technology standards and protocol for ip telephony solutions(NCSS NCTS)

Questions and Answers: 55 Q&A

[Nortel 920-803](#) Test belongs to one of the NCSS NCTS certified test, if needs to obtain the NCSS NCTS certificate, you also need to participate in other related test, the details you may visit the [NCSS NCTS](#) certified topic, in there, you will see all related NCSS NCTS certified subject of examination. Just4Study professional provide NCSS NCTS 920-803 the newest Q&A, completely covers 920-803 test original topic. With our complete NCSS NCTS resources, you will minimize your NCSS NCTS cost and be ready to pass your 920-803 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Nortel 920-803

Title : Nortel technology standards and protocol for ip telephony solutions

1. How does Real-Time Control Protocol (RTCP), the control protocol of Real-Time Protocol (RTP), assist RTP in handling packetized voice in an IP telephony environment?

- A. Controls the RTP data flows.
- B. Identifies sources and provides QoS feedback.
- C. Interoperates with Transmission Control Protocol (TCP).
- D. Controls the network bandwidth used by RTP data flows.

Answer: B

2. A customer has a mix of Layer 2 and Layer 3 switches in their LAN. To ensure the best QoS as they implement VoIP, which two QoS methods should you recommend? (Choose two.)

- A. 802.1q
- B. Weighted Fair Queuing (WFQ)
- C. Random Early Detection (RED)
- D. Differentiated Services (DiffServ)

Answer: AD

3. To achieve the QoS necessary to deliver voice between two points on a Frame Relay network, which two items are required to guarantee that voice quality is maintained? (Choose two.) Assume that a Permanent Virtual Circuit (PVC) is available to address converged voice and data.

- A. a Variable Bit Rate (VBR) service type
- B. a WAN access device that shapes traffic
- C. a WAN access device that does NOT fragment voice IP packets
- D. a WAN access device that can manage First-In, First-Out (FIFO) queuing
- E. a Committed Information Rate (CIR) large enough to address the total peak voice traffic plus a portion allocated for Best-Effort (BE) data

Answer: BE

4. Which CODEC delivers the greatest compression?

- A. B. 711
- C. D. 723.1
- E. F. 726
- G. H. 729
- I. J. 729A

Answer: C

5. A video conference is in progress between two networked locations using gigabit Ethernet. The video conferencing application is using User Datagram Protocol (UDP) to transport the video and audio data. Why should UDP be used instead of Transmission Control Protocol (TCP)?

- A. TCP CANNOT handle streaming data applications.
- B. UDP is better than TCP at seamlessly synchronizing voice and video together.
- C. UDP serves as an efficient transport for handling real-time application traffic.
- D. UDP uses less bandwidth than TCP in a WAN, but more bandwidth than TCP in a LAN.

Answer: C

6. To implement VoIP on a customer's IP network, which transport protocol should you use to best meet the real-time requirement for VoIP, and why?

- A. User Datagram Protocol (UDP); It ignores lost packets.
- B. Transmission Control Protocol (TCP); It retransmits lost packets.
- C. User Datagram Protocol (UDP); The amount of delay time is bounded.
- D. Transmission Control Protocol (TCP); The amount of delay time is bounded.

Answer: A

7. Which two CODECs have the least delay (processing or algorithmic)? (Choose two.)

- A. B. 711
- C. D. 723.1
- E. F. 726
- G. H. 729

Answer: AE

8. Which CODEC is the most tolerant to network delay?

- A. B. 711
- C. D. 723
- E. F. 729
- G. H. 729A

Answer: A

9. The basic attributes of Real-Time Protocol (RTP) provide for support of applications like voice and video. Which three attributes of RTP support real-time applications? (Choose three.)

- A. Timestamping
- B. Packet sequencing
- C. Header compression
- D. Payload identification
- E. Packet retransmission

Answer: ABD

10. What are two differences between IP, Asynchronous Transfer Mode (ATM) and Frame Relay (FR)? (Choose two.)

- A. ATM has a fixed cell size, but IP and FR do NOT.
- B. FR has built in mechanisms within the protocol for QoS.
- C. ATM is connectionless, but IP and FR are connection oriented.
- D. IP is a Layer 3 protocol, but ATM and FR are Layer 2 protocols.

Answer: AD
