Nortel Other Nortel Certification

922-109: Communications Server 1000 Rls.6.0 BARS/NARS

Practice Exam: 922-109 Exams

Exam Number/Code: 922-109

Exam Name: Communications Server 1000 Rls.6.0 BARS/NARS

Questions and Answers: 45 Q&As

([Other Nortel Certification](#))

"Communications Server 1000 Rls.6.0 BARS/NARS", also known as 922-109 exam, is a Nortel certification. With the complete collection of exam questions, Just4Study has assembled to take you through 45 Q&As to your 922-109 exam preparation. In the 922-109 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Exam : [922-109](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Nortel Other Nortel Certification 922-109 (Communications Server 1000 Rls.6.0 BARS/NARS) examination of original title complete coverage. 922-109 exam questions help you pass the exam.

Just4Study 922-109 Feature:

* High quality - High quality and valued for the 922-109 Exam: 100% Guarantee to Pass Your 922-109 exam and get your Other Nortel Certification certification.

* Authoritative - Authoritative braindumps with complete details about 922-109 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Other Nortel Certification resources, you will minimize your **Nortel Other Nortel Certification** cost and be ready to pass your 922-109 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Other Nortel Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 922-109 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 922-109 Demo Download

Just4Study offers free demo for Other Nortel Certification 922-109 exam (Communications Server 1000 Rls.6.0 BARS/NARS). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Nortel Other Nortel Certification 922-109** examination of original title complete coverage.922-109 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

Exam Name: Communications Server 1000 Rls.6.0 BARS/NARS(Other Nortel Certification)

Questions and Answers: 45 Q&A

[Nortel 922-109](#) Test belongs to one of the Other Nortel Certification certified test, if needs to obtain the Other Nortel Certification certificate, you also need to participate in other related test, the details you may visit the [Other Nortel Certification](#) certified topic, in there, you will see all related Other Nortel Certification certified subject of examination. Just4Study professional provide Other Nortel Certification 922-109 the newest Q&A, completely covers 922-109 test original topic. With our complete Other Nortel Certification resources, you will minimize your Other Nortel Certification cost and be ready to pass your 922-109 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Nortel 922-109

Title : Communications Server 1000 Rls. 6.0 BARS/NARS

1. Time-Division Multiplexing (TDM) uses trunks as a single or multi-channel telephone transmission channel with wide bandwidth to establish connections between switching systems and distribution points, or between two different types of switching systems.

Which type of transmission do TDM connections, or circuits, transmit, receive, or combine transmissions/receives of?

- A. SIP and H.323 Transmissions Only
- B. Both Voice and Data Transmissions
- C. Data Only Transmissions
- D. Voice Only Transmissions

Answer: B

2. Click on the Exhibit button.

A customer's dialing requirements, listed below, require that all station users assigned an NCOS of 3 and Class of Service of Conditionally Toll Denied (CTD) be able to place toll calls from the United States to Australia.

Australia Country Code: 61

NCOS of 3 has an FRL of 3

Expensive Routers are not being used

With reference to the exhibit, which table will allow all station users to be able to place these toll calls?

- A. Provisioning Table A
- B. Provisioning Table B
- C. Provisioning Table C
- D. Provisioning Table D

Answer: B

3. Integrated Services Digital Network (ISDN) uses international standards defined by ITU-T, an advisory committee under the ITU, to provide recommendations for global standards. It transmits voice, data and video communications as well as telephone signaling information, using internationally approved protocols to provide faster, economical and high QoS services.

What is ISDN divided into?

- A. Central Office Trunks (COT) and Direct Inward Dial (DID) Trunks
- B. Foreign Exchange (FX) and Wide Area Telephone Service (WATS) trunks
- C. Basic Rate Interface (BRI) and Primary Rate Interface (PRI)
- D. H.323 and SIP media paths

Answer: C

4. Click on the Exhibit button.

An employee at a company is placing a call to telephone number 214-774-3299. The employee, believing this is a toll

call, dials 9-1-214-774-3299. However, this call is a local call.

Access Code 1 = 9

The Central Office utilizes a 7-digit dialing plan.

Give the DMI indexes programmed into this Communication Server 1000 shown in the exhibit, which DMI would be used to modify the dialed digits to outpulse the correct digits to the Central Office?

- A. DMI Table 1
- B. DMI Table 2
- C. DMI Table 3
- D. DMI Table 4

Answer: B

5. In an IP Peer Networking environment on the Communication Server (CS) 1000, what functionality does the Network Routing Service (NRS) provide?

- A. replaces the basic networking parameters defined in BARS/NARS
- B. provides transcoding functionality for IP to TDM and TDM to IP calls
- C. centralized management of a single network dialing plan for SIP, H.323 and mixed SIP/H.323 networks
- D. synchronizes system configuration and database between Call Server and the Signaling Server

Answer: C

6. The Communication Server (CS) 1000 VoIP network architecture uses a Gatekeeper.

Which function does the CS 1000 Gatekeeper provide?

- A. Receives call setup requests.
- B. Converts one media stream to another, such as voice packets to analog.
- C. Functions as a server and client to make requests on behalf of other clients.
- D. Performs address translation and admission control.

Answer: D

7. Which functionality do TIE trunks provide?

- A. connects a telephone companies' central office and the PBX of a customer
- B. connects two different PBXs, whether in the same building or further away
- C. allows an outside caller to dial a station on a PBX directly
- D. provide incoming or outgoing service only, and not a combination of incoming/outgoing connections

Answer: B

8. Click on the Exhibit button.

Given the customer Route List Index shown in the exhibit, what is the first expensive route that a call placed on that RLI could take?

- A. Entry 0
- B. Entry 1
- C. Entry 2
- D. Entry 3

Answer: C

9. Click on the Exhibit button.

Before any other tables can be provisioned, which settings must have been provisioned in the ESN Data Block?

- A. Maximum parameters, including Maximum number of Digit Manipulation Tables (MXDM), Maximum number of Route Lists (MXRL), Maximum number of Supplemental Digit restriction blocks (MXSD) and Maximum number of Steering Codes (MXSC)
- B. NARS/BARS Access Code 1 (AC1) and NARS/BARS Access Code 2 (AC2)
- C. NCOS Map (NMAP)
- D. Time of Day Schedules (TODS) and Routing Controls (RTCL)

Answer: A

10. SIP connectivity, or SIP trunking, provides a direct media path (trunk interface) between domains.

Which type of servers do SIP Servers consist of?

- A. Proxy Server, Redirect Server and Registrar Server
- B. Converged Desktop Service (CDS), Multimedia Communication Server (MCS), and Office Communications Server (OCS)
- C. SIP User Agent, SIP Signaling Gateway, and SIP Trunk Gateway
- D. Microsoft LCS 2500, Microsoft OCS 2007, and IBM Lotus Notes

Answer: A
