9A0-060: Adobe After Effects 7.0 Professional ACE Exam

Practice Exam: 9A0-060 Exams

Exam Number/Code: 9A0-060

Exam Name: Adobe After Effects 7.0 Professional ACE Exam

Questions and Answers: 148 Q&As

([Photoshop](#))

Exam : [9A0-060](#)

"Adobe After Effects 7.0 Professional ACE Exam", also known as 9A0-060 exam, is a Adobe certification. With the complete collection of exam questions, Just4Study has assembled to take you through 148 Q&As to your 9A0-060 exam preparation. In the 9A0-060 exam resources, you will cover every field and category in Adobe Certification helping to ready you for your successful Adobe Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Adobe Photoshop 9A0-060 (Adobe After Effects 7.0 Professional ACE Exam) examination of original title complete coverage. 9A0-060 exam questions help you pass the exam.

Just4Study 9A0-060 Feature:

* High quality - High quality and valued for the 9A0-060 Exam: 100% Guarantee to Pass Your 9A0-060 exam and get your Photoshop certification.

* Authoritative - Authoritative braindumps with complete details about 9A0-060 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Photoshop resources, you will minimize your **Adobe Photoshop** cost and be ready to pass your 9A0-060 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Photoshop demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 9A0-060 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 9A0-060 Demo Download

Just4Study offers free demo for Photoshop 9A0-060 exam (Adobe After Effects 7.0 Professional ACE Exam). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Adobe Photoshop 9A0-060** examination of original title complete coverage.9A0-060 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 9A0-060

Exam Name: Adobe After Effects 7.0 Professional ACE Exam(Photoshop)

Questions and Answers: 148 Q&A

[Adobe 9A0-060](#) Test belongs to one of the Photoshop certified test, if needs to obtain the Photoshop certificate, you also need to participate in other related test, the details you may visit the [Photoshop](#) certified topic, in there, you will see all related Photoshop certified subject of examination.

Just4Study professional provide Photoshop 9A0-060 the newest Q&A, completely covers 9A0-060 test original topic. With our complete Photoshop resources, you will minimize your Photoshop cost and be ready to pass your 9A0-060 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : ADOBE 9A0-060

Title : Adobe After Effects 7.0 Professional ACE Exam

1. You have taken video of a person examining a 2 X 2 foot piece of cardboard to which you have pasted bright yellow ping pong balls at each of the corners. This person is moving the cardboard as they examine it. You want to track the motion of the cardboard so that you can play a movie in its place. Which Track type should you select from the Tracker Controls panel?

- A. Stabilize
- B. Transform
- C. Parallel Corner Pin
- D. Perspective Corner Pin

Answer: D

2. Click the Exhibit button.

You want to export your composition with an alpha channel for reuse in another composition in your project. Your composition contains NO audio. You want to apply compression to keep file size within prespecified limits. You want to import the file, but NOT replace usage in your project.

What should you do?

- A. For Post- Render Action: select Import, Under Video Output, Channels: select RGB + Alpha
- B. For Post- Render Action: select Import, Under Video Output, Channels: select RGB + Alpha, Depth: select Millions of Colors
- C. Under Format: Select a format which supports both Alpha Channels and lossless compression, for Post-Render Action: select Import, Under Video Output; click on Format Options and configure compressor, under Channels: select RGB + Alpha
- D. Under Format: Select a format which supports both Alpha Channels and lossless compression, for Post-Render Action: select Import, under Video Output; click on Format Options and configure compressor, Channels: select RGB + Alpha, Depth: select Millions of Colors

Answer: C

3. You configure a custom workspace named My Workspace. You make several changes to your workspace by docking palettes previously hidden and grouping several palettes together. You want to reset your workspace to its original state.

What should you do?

- A. choose Window > Workspace; select My Workspace
- B. choose Window > Workspace; select Standard; choose Window > Workspace; select Reset Standard; click on Discard Changes in the Reset Workspace dialog box
- C. choose My Workspace from the Workspace pulldown; choose Reset My Workspace; click on Discard Changes in the Reset Workspace dialog box
- D. choose Standard from the Workspace pulldown; choose Reset Standard; click on Discard Changes in the Reset

Workspace dialog box

Answer: C

4. When should you use the Time Warp effect?

- A. when you want a mixture of both Pixel Motion and Frame Mix
- B. when you have 32-bpc footage in which you are playing with time
- C. when you want to smooth out the motion of only one color channel
- D. when you want to decrease render time caused by Frame Mix frame blending

Answer: C

5. When should you use the Pixel Motion layer switch?

- A. when you want to improve the look of a layer's Motion Blur
- B. when you are time stretching video footage and want the motion to appear smooth
- C. when you are using compressed video and want to avoid pixelation caused by compression artifacts
- D. when you are time re-mapping a nested composition and want the motion to appear stepped instead of re-interpolated

Answer: B

6. Which two statements about the Pen tool are correct? (Choose two.)

- A. To change a smooth point on a path to a corner point, you click on the point with the Pen tool.
- B. Masks drawn with the Pen tool while the RotoBezier option is selected do NOT display direction lines.
- C. To add a keyframe to a Layer property without changing its value, you Alt-click (Windows)/Option-click (Mac OS) on a segment of the Layer property's graph in the Graph Editor with the Pen tool. The property must already contain at least one keyframe and the stopwatch must be activated.
- D. To add a keyframe to the Spatial property of a layer, you Alt-click (Windows)/Option-click (Mac OS) on the motion path in the Composition window with the Pen tool.
- E. To add a keyframe to the Spatial property of a layer, you click on the motion path in the Composition window with the Pen tool.

Answer: BE

7. What is the function of the Edit Target button in the Tracker Controls panel?

- A. It sets which layer is being tracked.
- B. It sets the layer to which final tracked data are applied.
- C. It sets the targeted amount of time for which footage will be tracked.
- D. It sets the number of tracker targets in a particular tracking operation.

Answer: B

8. You want to create the effect of a magician waving a magic wand through the air so that you can attach an effect to the tip of the wand. You have appropriate footage but did NOT mark the effect point prior to shooting. The black wand has a white tip and you decide to use the footage as is. You track the motion and notice that even though the tip of the wand is visible throughout the shot, the track point drifts from the tip point of the wand. You also notice that the footage is grainy in some areas.

What should you do?

- A. reshoot the footage after first attaching a brightly colored ping pong ball to the tip of the wand
- B. drag the current time indicator to the last well-tracked frame; in the Tracker Controls panel click on Options; in the Motion Tracker Options dialog box under Channel, select RGB; click OK in the Motion Tracker Options dialog box; click Analyze Forward or Analyze Backward
- C. drag the current time indicator to the last well-tracked frame; in the Tracker Controls panel click on Options; in the Motion Tracker Options dialog box under Channel, select Saturation; click OK in the Motion Tracker Options dialog box; click Analyze Forward or Analyze Backward
- D. drag the current time indicator to the last well-tracked frame; in the Tracker Controls panel click on Options; in the Motion Tracker Options dialog box, select Process before Match; click Blur; type a value of 2 to 3 pixels; click OK in the Motion Tracker Options dialog box; click Analyze Forward or Analyze Backward

Answer: D

9. When should you use Frame-Mix method of frame blending?

- A. when you want to speed up render time at the cost of lower quality Motion Blur
- B. when you have interpreted your footage at double its frame rate and want to keep the motion smooth
- C. when you are time stretching video footage and want to use motion vectors to smooth out the motion
- D. when you are time-stretching video footage, and want to create interim frames during repeated footage frames

Answer: D

10. What is the purpose of the Motion Sketch panel?

- A. It allows you to create motion by hand instead of keyframing.
- B. It converts the motion path of a layer into a paint stroke on a new solid layer.
- C. It allows you to convert the motion of a layer into a path object on a new solid layer.
- D. It allows you to show the motion of a layer over time by displaying several frames of the animation at once, at various levels of opacity.

Answer: A

11. Click the Exhibit button.

You are working on a composition that contains four layers as shown in the exhibit. The top two layers are 2D and the bottom two layers are 3D.

Which statement about the order in which After Effects renders these layers is true?

- A. The 3D layers are rendered first as a set according to their spatial order. 2D layers are rendered next in the order in which they are listed in the Timeline panel, starting at the top of the list.
- B. The 3D layers are rendered first as a set according to their spatial order. 2D layers are rendered next in the order in which they are listed in the Timeline panel, starting at the bottom of the list.
- C. The 2D layers are rendered first in the order in which they are listed in the Timeline panel, starting at the top of the list. 3D layers are rendered next according to the order they are listed in the Timeline panel, starting at the top of the list.
- D. The 3D layers are rendered first according to the order they are listed in the Timeline panel starting at the bottom of the list. 2D layers are rendered next in the order in which they are listed in the Timeline panel, starting at the bottom of the list.

Answer: B

12. Click the Exhibit button.

You want to render a complex composition for final output to film. The composition has been set up as follows: several effects including the Timewarp effect for time remapped layers have been turned off in the timeline to speed preview; Draft 3D has been activated; you have used several proxies; you have used several HDR footage items; you have used Guide Layers that are currently NOT visible; Motion Blur has been disabled in the timeline.

In the Render Settings dialog box you set Quality to Best; set Resolution to Full; enable Use OpenGL Renderer.

What should you do next?

- A. set Proxy Use to Use All Proxies; set Effects to All On; set Motion Blur to On for Checked Layers; set Color Depth to 16 bits per channel; select Length of Comp for Time Span
- B. set Proxy Use to Use No Proxies; set Effects to All On; set Motion Blur to On for Checked Layers; set Color Depth to 16 bits per channel; select Length of Comp for Time Span
- C. set Proxy Use to Use All Proxies; set Effects to All On; set Motion Blur to On for Checked Layers; set Color Depth to 32 bits per channel; select Length of Comp for Time Span
- D. set Proxy Use to Use No Proxies; set Effects to All On; set Motion Blur to On for Checked Layers; set Color Depth to 32 bits per channel; select Length of Comp for Time Span

Answer: D

13. You want to apply the Lightning effect to an existing text layer. You also want to rotate the text layer. The Lightning effect should rotate with the text layer. What should you do?

- A. add the Lightning effect and Rotation keyframes to the text layer

B. add the Lightning effect and Rotation keyframes to the text layer; pre-compose the text layer; select "Move all attributes into the new composition"

C. add Rotation keyframes to the text layer; pre-compose the text layer; select "Move all attributes into the new composition"; add the Lightning effect to the pre-composition layer

D. add the Lightning effect to the text layer; pre-compose the text layer; select "Move all attributes into the new composition"; add Rotation keyframes to the pre-composition layer

Answer: D

14. Which field order setting should you use when creating video for the Web?

A. None

B. Upper Field First

C. Lower Field First

D. It does NOT matter, field order is determined by the compression codec

Answer: A

15. You are asked to replace a sign that is on the side of a moving bus in a piece of footage. The footage was shot handheld and is shaky. Which type of tracking operation should you use?

A. Parallel Corner Pin

B. Perspective Corner Pin

C. Motion Stabilization in conjunction with a Transform Track

D. a Transform Track set to adjust for position, rotation, and scale

Answer: B

16. Which two statements about the OpenGL Preview are correct? (Choose two.)

A. OpenGL supports all blending modes.

B. OpenGL works with 8 bpc projects only.

C. OpenGL does NOT support tint, alpha levels and noise.

D. OpenGL provides fast screen previewing of a composition without degrading resolution.

E. When OpenGL hardware does NOT support a feature it will create a preview without that feature.

Answer: AD

17. Which statement about rendering across a network is true?

A. If a computer monitoring a watch folder can NOT find fonts, effects, or compressors used in a project, the render fails on that computer.

B. You can NOT render across a network that includes volumes using different network or operating systems, such as Windows, MAC OS, Novell, and UNIX.

C. After Effects can copy source files up to 8 GB in size using the Collects Files command to a watch folder that is accessible to all After Effects render engines on the network.

D. When After Effects finishes rendering all of the queued items in a given project, it saves and closes the project and performs Post Render actions specified in the Output Module settings dialog box.

Answer: A

18. You create a composition that contains a video footage layer of a specific play in a football game. You want to adjust both playback speed and direction and add audio commentary. The output will be a DVD. You enable time remapping for the video layer and notice that in the places the video has been stretched, the action appears jerky. What should you do?

A. choose Effect > Time > Timewarp; under the Timewarp pulldown, select Whole Frames; under the Tuning pulldown, set keyframes for Vector Detail

B. choose Layer > Frame Blending > Frame Mix; set the quality setting to Draft quality for the layer; enable the Frame Blend switch in the Timeline panel

C. choose Effect > Time > Timewarp; under the Motion Blur option, turn on Enable Motion Blur; select Manual from the Shutter Control pulldown; set keyframes for Shutter Angle and Shutter Samples

D. choose Layer > Frame Blending > Pixel Motion; set the quality setting to Draft quality in the switches column of

the Timeline panel; enable Motion Blur for the layer; enable the Motion Blur and Frame Blend switch in the Timeline panel

Answer: B

19. You are rendering a single PNG frame with a transparent background that you will then work with in Photoshop. Which settings should you use to ensure RGB and alpha channels are included in the output frame?

- A. RGB, Straight
- B. RGB+A, Straight
- C. RGB+A Premultiplied
- D. PNG Alpha settings cannot be adjusted.

Answer: C

20. Click the Exhibit button.

You have customized a workspace. You want to change the workspace by undocking the Wiggler panel.

What should you do?

- A. click and drag the panel from its current location; release the mouse
- B. Alt-click (Windows) or Option-click (Mac OS) and drag the panel from its current location; release the mouse
- C. Control-click (Windows) or Command-click (Mac OS) and drag the panel from its current location; release the mouse
- D. Alt-Control-click (Windows) or Command-Option-click (Mac OS) and drag the panel from its current location; release the mouse

Answer: C
