- A. View > Show > None
- B. Window > Application Frame
- C. Window > Workspace > Basic
- D. View > Screen Mode > Standard Screen Mode

Answer: B

2. You want to display an on-screen preview of how your RGB document will look when produced in CMYK. Which should you choose to specify the device to simulate?

- A. View > Proof Setup
- B. View > Proof Colors
- C. Image > Mode > CMYK Color
- D. Image > Mode > Multichannel

Answer: A

3. You want to highlight certain menu items in color. What should you do?

- A. Choose Preferences > Interface > Show Channels in Color
- B. Choose Preferences > Interface > Show Tool Tips
- C. Choose Edit > Keyboard Shortcuts and use the Keyboard Shortcuts tab
- D. Choose Edit > Menus and use the Menus tab

Answer: D

4. You choose View > Proof Colors and preview how colors will print on a specific printer. What is a requirement for Proof Colors to work properly?

- A. You have chosen Edit > Assign Profile to assign the profile for the printer's color space
- B. You have chosen Edit > Convert to Profile to convert the document into the printer's color space
- C. You have also turned on View > Gamut Warning
- D. You have configured the Customize Proof Condition dialog box

Answer: D

5. You want to add metadata to a JPEG file that will be used on the Web. Where should you enter the copyright information for that file?

- A. File > Scripts > Statistics
- B. File > Import > Annotations
- C. File > File Info and select the Description tab
- D. File > Save for Web & Devices and select from the Metadata list

Answer: C

6. You have finished editing an image acquired from a digital camera. Which command should you choose to change the current image mode to one that is appropriate for preparing an image to be printed using process colors?

- A. Image > Mode > CMYK
- B. Image > Mode > Lab Color
- C. Image > Mode > RGB Color
- D. Image > Mode > Indexed Color

Answer: A

7. Which two actions will display your image at 100%? (Choose two)

Select all that apply.

- A. Choose View > Actual Pixels.
- B. Double-click the Zoom tool in the toolbox.
- C. Double-click the Hand tool in the toolbox.
- D. Press Ctrl-0 (Windows) or Command-0 (Mac OS).
- E. With the Zoom tool selected, click the Print Size button in the options bar.

Answer: AB

8. You are working with an HDR image and you want to use a Photoshop filter that does NOT work with an HDR image. What should you do?

- A. Convert the image to 32 Bits/Channel
- B. Convert the image to 16 Bits/Channel
- C. Convert to LAB color mode at 32 Bits/Channel
- D. Convert to Multichannel mode at 16 Bits/Channel

Answer: B

9. You have four images open in Photoshop. You currently see each image in its own separate window with its own title bar. You would like to see just one image and tabs for the other images. Which should you choose?

- A. Window > Arrange > Float in Window
- B. Window > Arrange > Float All in Windows
- C. Click the 4-up button in the Arrange Documents menu
- D. Click the Consolidate All button in the Arrange Documents menu

Answer: D

10. You have selected the Zoom tool. What happens when you hold down the H key and click in the image and hold down the mouse button?

- A. Your image zoom changes temporarily
- B. You see an animated zoom continuously zooming into an image
- C. You see a synchronized zooming in of multiple images that are tiled
- D. You zoom into an image while increasing the window size to accommodate the enlarged image

Answer: A

11. You want to prepare an image for the Web that includes reducing the image resolution. Which resample method is recommended as best for reduction?

- A. Bilinear
- B. Bicubic Sharper
- C. Nearest Neighbor
- D. Bicubic Smoother

Answer: B

12. You are configuring the Color Settings dialog box for images intended for output to the Web. Which RGB working space should you choose?

- A. sRGB
- B. ProPhoto RGB
- C. Adobe RGB
- D. ColorMatch RGB

Answer: A

13. You have a document using the Adobe RGB (1998) color space, and you need to convert it to a smaller CMYK color space represented by a press profile. The document contains no significant colors that are outside the CMYK color space.

Which rendering intent will most effectively preserve the color relationships within the RGB document when it's converted to CMYK?

- A. Absolute Colorimetric
- B. Relative Colorimetric
- C. Perceptual
- D. Saturation

Answer: B

14. In the Photoshop Color Settings dialog box you see a warning that says: Your Creative Suite applications are not synchronized for consistent color. You want consistent color treatment across Photoshop, Illustrator, Acrobat, and InDesign. What should you do?

- A. From the Settings list choose: Monitor Color
- B. From the Settings list choose: Custom
- C. In Bridge, choose Edit > Creative Suite Color Settings and apply a color setting
- D. In Bridge, choose Preferences > Advanced and check the box to Use Software Rendering

Answer: C
