Exam : Apple 9L0-614

Title : Mac OS X Server Command Line Install and Configuration v10.4

1. You want to update the software on a headless Xserve over an SSH connection to the server, but one of the component installers has a graphical element that displays a splash screen. How can you prevent the installer from launching this graphical element?

- A. Run softwareupdate with the -headless option.
- B. Set the environment variable COMMAND\_LINE\_INSTALL to 1.
- C. Use SystemStarter to start the HeadlessStartup startup item.
- D. Download the updates with softwareupdate -d, then install them with installer -noGUI.

Answer: B

2. A new Xserve is booted from the Mac OS X Server v10.4 installation disc. Which password will let you connect to the Xserve remotely?

- A. the sequence of characters, "PASSWORD"
- B. the first eight characters of the Xserve serial number
- C. the first eight characters of the Xserve Ethernet MAC address
- D. the first eight characters of the Mac OS X Server software serial number

Answer: B

3. You are creating a file to import users into your directory. Your file's format, including the types of data imported and the order of the data fields, is defined in \_\_\_\_\_.

- A. LDIFv3
- B. RFC2307
- C. the Server Admin Guide
- D. the first line of your file

Answer: D

4. Certain tools must be used to configure a Mac OS X Server computer from the command line. Other tools are optional. Which tool below is optional when configuring Mac OS X Server from the command line?

- A. ifconfig
- B. serversetup
- C. networksetup

Answer: A

5. What does the command below do?

sharing -a /Users

- A. Makes the /Users directory a share point.

- B. Lists all share points in the /Users directory.
- C. Appends permissions to the Users share point.
- D. Shows all users currently connected to the Users share point.

Answer: A

6. You are using the command-line installer to install PretendCoTools.pkg. You want to install it on a non-boot volume mounted on a server. Which command will help you determine whether the package supports installation on that volume?

- A. hdiutil verify PretendCoTools.pkg
- B. installer -volinfo -pkg PretendCoTools.pkg
- C. ls -l PretendCoTools.pkg/Contents/Archive.bom
- D. cat PretendCoTools.pkg/Contents/Resources/preflight

Answer: B

7. Where are records for share points stored?

- A. in /etc/afpd.conf
- B. in /etc/afpovertcp.cfg
- C. in the local NetInfo database
- D. in the LDAP database of the Open Directory Master

Answer: C

8. You want to enable secure connections to your AFP service. Which command can you use to do so?

- A. sudo serveradmin settings afp:SSHTunnel = yes
- B. sudo serveradmin command afp:setSSHTunnel:yes
- C. sudo networksetup -CreateBond afp:SSHTunnel
- D. sudo networksetup settings -setappletalk "Built-in Ethernet" = SSH

Answer: A
