Title : Network Account Management v10.4 Exam

1. Using Workgroup Manager, which preference can you manage for computer lists, but not for users or workgroups?

- A. Login
- B. Network
- C. Media Access
- D. Energy Saver
- E. Software Update

Answer: D

2. Which Login preference can you set in Workgroup Manager for computer lists, but not for users or for groups?

- A. Enable Fast User Switching
- B. Open Specified Items at Login
- C. Add Network Home Share Point
- D. Hide Opened Login Items after Login

Answer: A

3. In Workgroup Manager, which managed preference pane lets you configure proxy server settings for accounts?

- A. Sharing
- B. Internet
- C. Network
- D. Applications
- E. System Preferences

Answer: C

4. How must you authenticate if you want to create a managed network view?

- A. You must authenticate in the managed domain as a domain administrator.
- B. You must authenticate with the Apple Remote Desktop password on your server computer.
- C. You must authenticate as an administrator on the Mac OS X Server computer that manages your domain.
- D. No special authentication is required; anyone can use Network preferences to create a network view named "Managed," which will be managed automatically by the Mac OS X Server computer that manages your domain.

Answer: A

5. What is the maximum number of computers that can appear in the All Computers list in Remote Desktop?

- A. 1,000
- B. 10,000
- C. There is no defined upper limit.
- D. The upper limit depends on your user license.

Answer: D

6. Review the chart above showing the managed Applications preferences for a user, computer list, and workgroup. For each account type, the checkbox stating that the user can only open these applications is selected. When you are ready, answer the question below. What applications, if any, can this managed user access after logging in on a managed computer, as a member of this managed workgroup?

- A. The user cannot access any applications.
- B. The user can only access the Chess application.
- C. The user can only access the Address Book application.
- D. The user can access both the Address Book and Chess applications.
- E. The user can access the Address Book or Chess application only if the user logs in as a member of a workgroup.

Answer: D

7. You can generate client computer reports on your Apple Remote Desktop admin computer, but not using your remote ARD Task Server. What is the most likely cause of this problem?

- A. SSH is disabled on client computers.
- B. The Mac OS X firewall is blocking port 22.
- C. The Mac OS X firewall is blocking port 3283.
- D. The network DNS is improperly configured.

Answer: C

8. How do you configure an Apple Remote Desktop admin computer to use a remote Task Server?

- A. Run the `cfgtaskserver` command line utility with the Task Server's IP address as its parameter.
- B. Open Remote Desktop and select your Task Server from the list that appears in the Task Server window.
- C. Open Remote Desktop on the Task Server, and type the host name or IP address of the ARD admin computer.
- D. Open Remote Desktop and select "Use remote Task Server" in the Task Server preferences pane of Remote Desktop, then enter the host name or IP address of your Task Server.

Answer: D

9. In Workgroup Manager, which THREE folders can you add to a user's Dock using the Dock Items pane of Dock preferences, without navigating the file system?

- A. Photos
- B. Movies
- C. Utilities
- D. Documents
- E. Network Home
- F. My Applications

Answer: DEF

10. Which comparison of Mac OS X Server and Windows user account password policy enforcement is TRUE?

- A. Mac OS X Server does not let you set inactivity limits on user account passwords, but Windows does.
- B. Both Mac OS X Server and Windows allow you to enforce a minimum length for user account passwords.
- C. Neither Mac OS X Server nor Windows has a graphical user interface for entering user account password policies.
- D. Both Mac OS X Server and Windows require that user account passwords be different from account names.
- E. Mac OS X Server lets you require that account passwords be different from account names, but Windows does not.

Answer: A

11. You want your Mac OS X Server to provide SMB service. What directory service role should it be configured to use?

- A. The Mac OS X Server's role must be Domain Member.
- B. The Mac OS X Server's role must be Standalone Server.
- C. The Mac OS X Server's role must be Backup Domain Controller.

- D. The Mac OS X Server's role must be Primary Domain Controller.
- E. The Mac OS X Server can use any directory service role available.

Answer: E

12. Which statement best describes how you configure managed Applications preferences in Workgroup Manager?

- A. You create a list of users who can open any application on the local drive.
- B. You create a list of users who can open specified applications when logged into their mobile account.
- C. You select an account, then create a list of applications that can or cannot be opened by that account.
- D. You create a list of approved or unapproved applications, then apply the list to selected user accounts.

Answer: C

13. Which statement defines a Named managed network view best?

- A. A network view for which you have entered a name.
- B. A network view that is seen by all clients that are bound to a directory.
- C. A network view that is seen only by clients that are not bound to a directory.
- D. A network view that is seen only by clients you specify that are bound to a directory.

Answer: D

14. In Workgroup Manager, which management frequency cannot be used to manage the System Preferences for accounts?

- A. Never
- B. Once
- C. Often
- D. Always

Answer: B

15. You want to prevent users from changing the Energy Saver preferences on a specific computer. Which procedure will achieve this goal without restricting users in other ways?

- A. Disable the Energy Saver pane of System Preferences for all user accounts.
- B. Disable the Energy Saver pane of System Preferences for all group accounts.
- C. Create a computer list for this computer and disable the Energy Saver pane of System Preferences for this list.
- D. Disable the Energy Saver pane of System Preferences for a specific computer list that includes this computer and others.

Answer: C
