

## E20-097 braindumps

### EMC Technology Foundations

#### E20-097: EMC Technology Foundations-Backup and Recovery

**Practice Exam:** E20-097 Exams

**Exam Number/Code:** E20-097

**Exam Name:** EMC Technology Foundations-Backup and Recovery

**Questions and Answers:** 117 Q&As

( [Technology Foundations](#) )

"EMC Technology Foundations-Backup and Recovery", also known as E20-097 exam, is a EMC certification. With the complete collection of exam questions, Just4Study has assembled to take you through 117 Q&As to your E20-097 exam preparation. In the E20-097 exam resources, you will cover every field and category in EMC Certification helping to ready you for your successful EMC Certification.

Exam : [E20-097](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for EMC Technology Foundations E20-097 (EMC Technology Foundations-Backup and Recovery) examination of original title complete coverage. E20-097 exam questions help you pass the exam.

#### **Just4Study E20-097 Feature:**

\* High quality - High quality and valued for the E20-097 Exam: 100% Guarantee to Pass Your E20-097 exam and get your Technology Foundations certification.

\* Authoritative - Authoritative braindumps with complete details about E20-097 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Technology Foundations resources, you will minimize your **EMC Technology Foundations** cost and be ready to pass your E20-097 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free Technology Foundations demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the E20-097 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free E20-097 Demo Download**

Just4Study offers free demo for Technology Foundations E20-097 exam (EMC Technology Foundations-Backup and Recovery). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **EMC Technology Foundations E20-097** examination of original title complete coverage.E20-097 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: E20-097**

Exam Name: EMC Technology Foundations-Backup and Recovery( [Technology Foundations](#) )

Questions and Answers: 117 Q&A

**EMC E20-097** Test belongs to one of the Technology Foundations certified test, if needs to obtain the Technology Foundations certificate, you also need to participate in other related test, the details you may visit the [Technology Foundations](#) certified topic, in there, you will see all related Technology Foundations certified subject of examination. Just4Study professional provide Technology Foundations E20-097 the newest Q&A, completely covers E20-097 test original topic. With our complete Technology Foundations resources, you will minimize your Technology Foundations cost and be ready to pass your E20-097 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

**Just4Study.com** offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : EMC e20-097

Title : EMC Technology Foundations-Backup and Recovery

1. In an EMC NetWorker environment, what is the function of the storage node software component?

- A. Generates client file indexes
- B. Performs recoveries
- C. Stores tracking information
- D. Writes data to a backup device

Answer: D

2. Which data storage method is the fastest accessible method?

- A. Near-line
- B. Offline
- C. Offsite vault
- D. Online

Answer: D

3. How does the use of the Open Tape Format help a backup environment?

- A. Allows multiplexed and heterogeneous data to reside on the same tape
- B. Allows non-NetWorker environments to read NetWorker tapes
- C. Enables storage nodes to write save sets to different media types
- D. Permits the use of open encryption methods in the backup process

Answer: A

4. What is an EMC NetWorker benefit derived from Open Tape Format?

- A. Compresses backup data
- B. Distributes the backup workload throughout the datazone
- C. Migrates a storage node to a host running a different operating system
- D. Restores data from many types of devices

Answer: C

5. What is true of an EMC HomeBase proxy server?

- A. A cache server for remote profiles
- B. A pass-through server for profiles
- C. Network tunnel server for EMC HomeBase servers
- D. Replication server for remote EMC HomeBase profiles

Answer: B

6. Which EMC NetWorker feature enables multiple storage nodes to use the same drive?

- A. Advanced file drives
- B. Dedicated drives
- C. Dynamic drive sharing
- D. Shared autochanger

Answer: C

7. What does an EMC HomeBase base profile contain?

- A. All attributes of the operating system required to recover or migrate the environment
- B. Attributes and configuration from protected servers running on a platform different from the HomeBase server
- C. Attributes required to re-establish the application environment on the recovery server
- D. Replication attributes used when multiple protected sites are in place

Answer: A

8. The file system containing an EMC NetWorker advanced file type device becomes full while a backup is running. What will NetWorker automatically do?

- A. Backup is aborted
- B. Backup spans to another volume
- C. Enlarge the file system
- D. Remove aborted and expired save sets

Answer: D

9. For a complete operating system and data recovery, which backup type should be used?

- A. Archive
- B. Disaster recovery
- C. Disaster restart
- D. Operational

Answer: B

10. Which type of EMC NetWorker backup automatically results in the backup of the bootstrap save set?

- A. Client-initiated only
- B. Raw backups
- C. Server-initiated and client-initiated
- D. Server-initiated only

Answer: D

11. Which operation can be performed to recover files without client file index entries?

- A. Directed File Recovery
- B. Disaster Recovery
- C. Browsable Recovery
- D. Save Set Recovery

Answer: D

12. A customer wants to create a consistent backup of a changing file system on a CLARiON. Which EMC NetWorker module should be used?

- A. MirrorView
- B. PowerSnap
- C. SnapSure
- D. SnapView

Answer: B

13. What describes recovery point objective?

- A. Amount of data loss deemed acceptable by the business
- B. Amount of data that can be maintained as part of a backup architecture

- C. Amount of physical tape units in a backup set
- D. Amount of time data is maintained on media before it is deleted

Answer: A

14. A customer has a file system that changes every day and the customer is implementing EMC NetWorker as its backup application. Which weekly backup schedule results in the fastest recovery at the end of the week?

- A. Full incr incr incr incr incr incr
- B. Full 1 2 3 4 5 6
- C. Full 2 6 2 6 2 6
- D. Full 8 8 8 8 8 8

Answer: D

15. What is a characteristic of an EMC HomeBase base profile?

- A. Matches the size of the OS on the production server
- B. Stored on the production server
- C. Transferred to offsite storage within the HomeBase server
- D. Transferred to the HomeBase server by default

Answer: D

16. What are the features of an EMC NetWorker client software component?

- A. Generates backups, performs recoveries, and provides recovery interfaces
- B. Generates backups, stores tracking data, and provides recovery interfaces
- C. Initiates scheduled backups, performs recoveries, and manages tracking data
- D. Initiates scheduled backups, performs recoveries, and provides recovery interfaces

Answer: A

17. What is a benefit of a standardized EMC HomeBase recovery process?

- A. Automatic server failure detection and recovery
- B. Integrates with OS snap technology to minimize downtime
- C. Minimizes production bandwidth for server recovery
- D. Recover physical source to virtual targets

Answer: D

18. What is a function of EMC NetWorker staging?

- A. Copies backup data to secondary media on the primary backup server
- B. Creates a copy of backup data simultaneously when the backup is performed
- C. Moves backup data to another media after a specific period of time
- D. Replicates a save set to a secondary storage node

Answer: C

19. What is a benefit of using EMC NetWorker modules?

- A. Allows backup of a database in use
- B. Improves tape utilization ratio
- C. Organizes data on the backup media for fast recovery
- D. Performs cold database backups

Answer: A

20. Which EMC HomeBase log file provides complete debugging information?

- A. console.log
- B. error.log
- C. packages.log
- D. server.log

Answer: D

21. What is an EMC NetWorker pool?

- A. Collection of labeled volumes
- B. Group of backup clients
- C. Multiple save sets
- D. Tape devices from multiple autochangers

Answer: B

22. Click the Exhibit button.

You are backing up your data every day at 11 P.M. as shown in the exhibit. You have a file system failure on Day 5 at 11 A.M.

How many backup sets must be recovered?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: A

23. Click the Exhibit button.

The exhibit shows a customer's backup environment. The customer wants to back up the data on Storage Node B to tape. As the storage administrator, what would you recommend?

- A. Add a dedicated tape library to Zone B
- B. Add Storage Node A to Zone B
- C. Share Tape Library 123 with NetWorker Server B
- D. Share Tape Library 123 with Storage Node B

Answer: A

24. Which Avamar component(s) is/are checked as part of the de-duplication process?

- A. Client and server
- B. Client cache files only
- C. Client only
- D. Server only

Answer: A

25. A file system contains data that changes frequently. The data is extremely critical, and in the event of a data loss, must be recovered immediately.

Which level of backup should be performed?

- A. Cumulative backup daily
- B. Full backup every day
- C. Full backup once a month
- D. Full backup once a week

Answer: B

26. Which event occurs only in an EMC NetWorker server-initiated backup?

- A. Bootstrap save set is created
- B. CFI tracking data is generated
- C. Multiplexing is performed
- D. Only local devices are used

Answer: A

27. Which type of EMC NetWorker backup automatically results in the backup of the client file index?

- A. Client-initiated and server-initiated

- B. Client-initiated only
- C. Raw backups
- D. Server-initiated only

Answer: D

28. A file system contains seven files, each 1 GB in size. A different file changes every day. Which backup strategy will minimize the overall time that it takes to do backups each week?

- A. Full backup every day
- B. Full backup on Saturday and incremental backups on all other days
- C. Full backup on Saturday, cumulative backups on all other days
- D. Full backup on Saturday, cumulative backup on Wednesday, and incremental backups on all other days

Answer: B

29. What happens when a consolidated backup is performed?

- A. Incremental; merged with the most recent Level 1
- B. Level 0; merged with the most recent Full
- C. Level 1; merged with the most recent Full
- D. Level 9; merged with the most recent Level 1

Answer: C

30. When backing up a file server, the data change rate is very high. Which backup level would you recommend for daily backups?

- A. Consolidated
- B. Differential
- C. Full
- D. Incremental

Answer: C
