EMC EMC Certification

E22-201: Mainframe Local Replication Exam

Practice Exam: E22-201 Exams

Exam Number/Code: E22-201

Exam Name: Mainframe Local Replication Exam

Questions and Answers: 166 Q&As

([EMC Certification](#))

Exam : [E22-201](#)

"Mainframe Local Replication Exam", also known as E22-201 exam, is a EMC certification. With the complete collection of exam questions, Just4Study has assembled to take you through 166 Q&As to your E22-201 exam preparation. In the E22-201 exam resources, you will cover every field and category in EMC Certification helping to ready you for your successful EMC Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for EMC EMC Certification E22-201 (Mainframe Local Replication Exam) examination of original title complete coverage. E22-201 exam questions help you pass the exam.

Just4Study E22-201 Feature:

* High quality - High quality and valued for the E22-201 Exam: 100% Guarantee to Pass Your E22-201 exam and get your EMC Certification certification.

* Authoritative - Authoritative braindumps with complete details about E22-201 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed EMC Certification resources, you will minimize your **EMC EMC Certification** cost and be ready to pass your E22-201 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free EMC Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the E22-201 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free E22-201 Demo Download

Just4Study offers free demo for EMC Certification E22-201 exam (Mainframe Local Replication Exam). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **EMC EMC Certification E22-201** examination of original title complete coverage. E22-201 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: E22-201

Exam Name: Mainframe Local Replication Exam(EMC Certification)

Questions and Answers: 166 Q&A

[EMC E22-201](#) Test belongs to one of the EMC Certification certified test, if needs to obtain the EMC Certification certificate, you also need to participate in other related test, the details you may visit the [EMC Certification](#) certified topic, in there, you will see all related EMC Certification certified subject of examination.

Just4Study professional provide EMC Certification E22-201 the newest Q&A, completely covers E22-201 test original topic. With our complete EMC Certification resources, you will minimize your EMC Certification cost and be ready to pass your E22-201 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : EMC E22-201

Title : Emc Mainframe Local Replication Exam

1. You have just copied an SAP DB2 database to an IBM DS8000. You want to use this data for testing on your LPAR. Which product will get your data up and ready fastest?

- A. IDCAMS
- B. TimeFinder/Utility
- C. IBM Storage Utility
- D. TimeFinder/Reclaim

Answer: B

2. What is the Symmetrix logical data flow when presenting data to a host?

- A. Hyper volume to host
- B. Hyper volume to channel director to host
- C. Hyper volume to channel director to enjuinity to host
- D. Hyper volume to cache to channel director to host

Answer: D

3. Which statement is true when using TimeFinder/Utility?

- A. Supports catalog management, but not GDG
- B. Supports any vendor's hardware environment
- C. Supports all IBM access methods, excluding VSAM
- D. Does not allow use of volume data on same z/OS image

Answer: B

4. You need a remote replication solution for your mainframe application running on a single Symmetrix DMX. The service level for the application specifies the following in order of priority:

Which solution best meets these requirements?

- A. SRDF/S - Synchronous mode
- B. SRDF/A - Asynchronous mode
- C. SRDF/CG - Synchronous mode with Consistency Group
- D. SRDF/A - Asynchronous mode with Multi-session Consistency

Answer: C

5. Which RAID protection scheme is described by the following statement:

Data blocks are striped horizontally across the members of a RAID group; each member owns some data tracks and some parity tracks?

- A. RAID 1
- B. RAID 5

- C. RAID S
- D. RAID 10

Answer: B

6. Which controller type has to be defined if PAVs are required?

- A. 2105
- B. 3390-3
- C. 3990-3
- D. 3990-6

Answer: A

7. Which RAID protection scheme calculates the parity protection at the disk level?

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 10

Answer: C

8. Click the Exhibit button.

<Missing>

You established and split a TimeFinder/Mirror BCV of your production database for use as a backup database. Then, you used TimeFinder/Snap to make a copy of the backup database for use as a testing database.

What is the performance impact on the backup database during the SNAP?

- A. No Impact
- B. Variable Impact
- C. Dependent on TimeFinder/Mirror write activity
- D. Dependent on production database write activity

Answer: A

9. How would you describe a mirror position within a Symmetrix?

- A. Logical placement of "replicas"
- B. Quantity of copies of data in a Symmetrix
- C. Data structures that point to a physical location
- D. Where the source and target are placed in relation to each other

Answer: C

10. Which two [2] parameters are required to do a differential dataset SNAP?

- A. Copy(yes)
- B. Write(yes)
- C. Reuse(yes)
- D. Replace(yes)

Answer: CD

11. A Symmetrix has a RAID 1 standard volume. The volume has an established BCV and an active clone session. How many mirror positions are available?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

12. Which command displays system serial number, SSID, and number of devices?

- A. DISPLAY GNS,ALL

- B. F DISPLAY DEV,SSID=xxxx
- C. F SCFname,CSC,REFRESH
- D. F SCFname,DEV,DISP,SUMMARY

Answer: D

13. Click the Exhibit button.

<Missing>

Which RAID protection scheme is illustrated in the attached exhibit?

- A. RAID 10
- B. Parity RAID
- C. RAID 5 (3 + 1)
- D. RAID 5 (7 + 1)

Answer: A

14. You attempted a restore to a remote R2 device and it failed.

What could cause this?

- A. R1 > R2 IS SET in the configuration
- B. R1SYNC(Y) is set in the configuration
- C. R1SYNC(N) is set in the configuration
- D. R2 RESTORE = N is set in the configuration

Answer: B

15. What is the difference between BCV operations with R1 devices and BCV operations with standard devices?

- A. None
- B. Concurrent SRDF is required for BCV and R1 operations
- C. The links must be suspended for BCV and R1 operations
- D. R1 and R2 devices must be synchronized for BCV and R1 operations

Answer: A

16. You have a Symmetrix with a standard RAID 1 volume. The standard volume has a protected BCV established.

The physical disk that contains the M1 data of the standard volume fails.

What is the result?

- A. The spare does not invoke
- B. The BCV becomes the dynamic spare
- C. The dynamic spare invokes and copies the data
- D. The dynamic spare replaces one of the BCVs and that BCV takes the role of failed drive

Answer: A

17. How many aliases are supported per base address with 5671 Enginuity?

- A. 15
- B. 16
- C. 31
- D. 32

Answer: A

18. Which answer best describes the functionality of TimeFinder/Mirror in a mainframe environment?

- A. SYMCLI management and automation
- B. Source and BCV are independent copies
- C. Processing against both source and pointer-based image creates performance overhead
- D. Requires a fraction of the capacity of the source volume; amount depends on how much data changes

Answer: B

19. Which statement describes the TimeFinder Restore operation between a Standard and BCV device pair?

- A. Write-disable the Standard device and copy the entire contents of the BCV to the Standard device.
- B. Change the status of the BCV to Not Ready and copy the contents of the BCV to the Standard device.
- C. Change the status of both the BCV and the Standard device to Not Ready until synchronization is complete.
- D. Copy the entire contents of the Standard device to the BCV while presenting a Read-Write Enabled status for both the Standard device and the BCV.

Answer: B

20. Which [3] options are valid for TimeFinder/Snap restore?

- A. VDEV can be restored to a equal size BCV
- B. VDEV can be restored to another equal sized VDEV
- C. VDEV can be restored to a different standard of unequal size
- D. VDEV can be restored to a equal size, different standard device
- E. VDEV can be restored to the original standard device from which it was created

Answer: ADE
