EMC EMC Certification

E22-280: Avamar Backup and Data Deduplication Exam

Practice Exam: E22-280 Exams

Exam Number/Code: E22-280

Exam Name: Avamar Backup and Data Deduplication Exam

Questions and Answers: 114 Q&As

([EMC Certification](#))

Exam : [E22-280](#)

"Avamar Backup and Data Deduplication Exam", also known as E22-280 exam, is a EMC certification. With the complete collection of exam questions, Just4Study has assembled to take you through 114 Q&As to your E22-280 exam preparation. In the E22-280 exam resources, you will cover every field and category in EMC Certification helping to ready you for your successful EMC Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for EMC EMC Certification E22-280 (Avamar Backup and Data Deduplication Exam) examination of original title complete coverage. E22-280 exam questions help you pass the exam.

Just4Study E22-280 Feature:

* High quality - High quality and valued for the E22-280 Exam: 100% Guarantee to Pass Your E22-280 exam and get your EMC Certification certification.

* Authoritative - Authoritative braindumps with complete details about E22-280 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed EMC Certification resources, you will minimize your **EMC EMC Certification** cost and be ready to pass your E22-280 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free EMC Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the E22-280 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free E22-280 Demo Download

Just4Study offers free demo for EMC Certification E22-280 exam (Avamar Backup and Data Deduplication Exam). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **EMC EMC Certification E22-280** examination of original title complete coverage.E22-280 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: E22-280

Exam Name: Avamar Backup and Data Deduplication Exam(EMC Certification)

Questions and Answers: 114 Q&A

[EMC E22-280](#) Test belongs to one of the EMC Certification certified test, if needs to obtain the EMC Certification certificate, you also need to participate in other related test, the details you may visit the [EMC Certification](#) certified topic, in there, you will see all related EMC Certification certified subject of examination.

Just4Study professional provide EMC Certification E22-280 the newest Q&A, completely covers E22-280 test original topic. With our complete EMC Certification resources, you will minimize your EMC Certification cost and be ready to pass your E22-280 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : EMC e22-280

Title : Avamar Backup and Data Deduplication Exam

1. Which type of Avamar fault tolerance provides protection for node failure?

- A. Checkpoint
- B. RAID
- C. RAIN
- D. HFS Check

Answer: D

2. Which level of data can be restored?

- A. Directories only
- B. Files only
- C. Files, directories, and file systems
- D. Filesystems only

Answer: A

3. What describes the characteristics of an NDMP backup capability through an EMC Avamar accelerator?

- A. Initiates a Level-1 backup to the NAS device to retrieve only change files, then uses the file cache to deduplicate data.
- B. Is an active member of the EMC Avamar system's RAIN configuration that provides a backup and recovery solution for NAS devices.
- C. Stores Level 0 data in order to deduplicate subsequent backups, uses the hash cache to deduplicate data sent to the server.
- D. Initiates a Level-1 backup to the NAS device to retrieve only change files, then uses the hash cache to deduplicate data.

Answer: D

4. What are key features of EMC Avamar?

- A. Disk-based archive RAID, RAIN, clustering and replication Global deduplication
- B. Global deduplication RAID, RAIN, checkpoints and replication Disk storage
- C. Global deduplication RAID, RAIN, checkpoints and replication Auto-archive of NAS
- D. OS-specific deduplication RAID, RAIN, checkpoints and replication Full, Incremental and Differential file system backups

Answer: B

5. What are the EMC Avamar typical daily change rates and performance throughputs for backing up databases?

- A. 0.3% daily change rate and performance throughput of 100 GB/hr
- B. 0.3% daily change rate and performance throughput of 10 GB/hr

- C. 3% daily change rate and performance throughput of 100 GB/hr
- D. 3% daily change rate and performance throughput of 10 GB/hr

Answer: C

6. You are configuring the network on an Avamar Data Store and need to log in as user 'root'. What is the default operating system root password?

- A. 8RttoTriz
- B. calvin
- C. changeme
- D. P3t3rPan

Answer: C

7. What is the function of an Avamar spare node?

- A. Load balance the utility node
- B. Dynamically grow capacity
- C. Replace a failed data node
- D. NDMP Accelerator

Answer: D

8. A customer has an MS Exchange 2003 server with five Exchange databases in three storage groups. How many datasets will need to be defined to back up this Exchange environment?

- A. 1
- B. 3
- C. 5
- D. 8

Answer: B

9. What are the components of the Avamar benchmark test?

- A. Random write, garbage collect performance, and HFS check performance
- B. Random write, random read, and network throughput
- C. Sequential write, network throughput, and backup performance
- D. Sequential write, sequential read, and random seek

Answer: D

10. You are using the Avamar Administrator console to configure replication. What is the default Avamar root password?

- A. 8RttoTriz
- B. calvin
- C. changeme
- D. P3t3rPan

Answer: A

11. When backing up a MS Windows cluster using EMC Avamar, which resource needs to be excluded from the backup dataset?

- A. C: drive
- B. Quorum drive
- C. Shared Resource
- D. System32 Directory

Answer: B

12. In an EMC Avamar backup, how are Microsoft Office 2007 files processed?

- A. Chunking is not performed on the files.
- B. Files are chunked first, then compressed and hashed.

- C. Files are compressed first, then chunked and hashed.
- D. Files are uncompressed first, then chunked and hashed.

Answer: D

13. What is an advantage of Avamar's deduplication technology?

- A. Eliminates backup catalog
- B. Improves drive speeds
- C. Stores data from different OS on same devices
- D. Stores unique sub-file data objects

Answer: B

14. What describes EMC Avamar MS SQL backups?

- A. Differential backups only include the transaction logs.
- B. Full backups include all objects, system tables and data.
- C. Incremental backups include data that has changed since the last full backup.
- D. Level 1 backups include all objects and data except for system tables.

Answer: B

15. Click the Exhibit button.

Which EMC Avamar accelerator processes map to each item listed?

- A. 1=Avagent, 2=NDMPCOPY, 3=ndmjob, 4=avatar
- B. 1=Avagent, 2=avatar, 3=NDMPCOPY, 4=ndmjob
- C. 1=Avagent, 2=avatar, 3=NDMPCOPY, 4=ndmjob
- D. 1=Avagent, 2=ndmjob, 3=NDMPCOPY, 4=avatar

Answer: A

16. How does Avamar differ from traditional backup and restore solutions?

- A. Backs up only unique, sub-file data objects
- B. Offers one server configuration type
- C. Provides four types of backup levels
- D. Uses dedicated backup network

Answer: B

17. What describes the characteristics of an EMC Avamar NDMP accelerator?

- A. A component of the EMC Celerra NAS architecture that provides backup and restore capability to the EMC Avamar server
- B. A specialized node that intercepts Level-1 deduplicated data from the NAS devices and passes it along to the Avamar server to provide full copies of the data
- C. An active member of the EMC Avamar system's RAIN configuration that provides a backup and recovery solution of NAS devices via the Network Data Management Protocol (NDMP)
- D. A specialized node that acts as a proxy to provide a complete backup and recovery solution for NAS devices via the Network Data Management Protocol (NDMP)

Answer: D

18. Which EMC Avamar database backup option provides the fastest restore time?

- A. Avamar streaming agent is installed on a proxy server and backs up directly from the database server through the network to EMC Avamar.
- B. Avamar streaming agent is installed on the database server and backs up directly from the database server to EMC Avamar.
- C. Database is first dumped to a local disk cache accessed directly by the Avamar server's utility node where the Avamar agent is installed.
- D. Database is dumped to a local disk cache accessed by an proxy where the Avamar agent is installed.

Answer: D

19. What does Avamar's deduplication process accomplish?

- A. Achieves maximum advantage of disk characteristics
- B. Enables platform-independent data objects
- C. Ensures that each data object is stored only once
- D. Provides data integrity and disaster recovery protection

Answer: D

20. A customer has three MS SQL servers, each has four databases. How many datasets need to be created to back up all databases on all servers with EMC Avamar?

- A. 1
- B. 3
- C. 7
- D. 12

Answer: A
