Exam : [F50-521](#)

"F5 BIG-IP V9.4 LTM Essentials", also known as F50-521 exam, is a F5 Networks certification. With the complete collection of exam questions, Just4Study has assembled to take you through 100 Q&As to your F50-521 exam preparation. In the F50-521 exam resources, you will cover every field and category in F5 Networks Certification helping to ready you for your successful F5 Networks Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for F5 Networks F5 Networks F50-521 (F5 BIG-IP V9.4 LTM Essentials) examination of original title complete coverage. F50-521 exam questions help you pass the exam.

#### **Just4Study F50-521 Feature:**

\* High quality - High quality and valued for the F50-521 Exam: 100% Guarantee to Pass Your F50-521 exam and get your F5 Networks certification.

\* Authoritative - Authoritative braindumps with complete details about F50-521 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed F5 Networks resources, you will minimize your **F5 Networks F5 Networks** cost and be ready to pass your F50-521 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free F5 Networks demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the F50-521 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free F50-521 Demo Download**

Just4Study offers free demo for F5 Networks F50-521 exam (F5 BIG-IP V9.4 LTM Essentials). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **F5 Networks F5 Networks F50-521** examination of original title complete coverage. F50-521 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

**VUE/Prometric Code: F50-521**

Exam Name: F5 BIG-IP V9.4 LTM Essentials( F5 Networks )

Questions and Answers: 100 Q&A

[F5 Networks F50-521](#) Test belongs to one of the F5 Networks certified test, if needs to obtain the F5 Networks certificate, you also need to participate in other related test, the details you may visit the [F5 Networks](#) certified topic, in there, you will see all related F5 Networks certified subject of examination.

Just4Study professional provide F5 Networks F50-521 the newest Q&A, completely covers F50-521 test original topic. With our complete F5 Networks resources, you will minimize your F5 Networks cost and be ready to pass your F50-521 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : F5-Networks F50-521

Title : F5 BIG-IP V9.4 LTM Essentials

1. Where is the load-balancing mode specified?

- A. within the pool definition
- B. within the node definition
- C. within the virtual server definition
- D. within the pool member definition

Answer: A

2. Assume a client's traffic is being processed only by a NAT; no SNAT or virtual server processing takes place. Also assume that the NAT definition specifies a NAT address and an origin address while all other settings are left at their defaults. If a client were to initiate traffic to the NAT address, what changes, if any, would take place when the BIG-IP processes such packets?

- A. The source address would not change, but the destination address would be translated to the origin address.
- B. The destination address would not change, but the source address would be translated to the origin address.
- C. The source address would not change, but the destination address would be translated to the NAT's address.
- D. The destination address would not change, but the source address would be translated to the NAT's address.

Answer: A

3. Assuming other fail-over settings are at their default state, what would occur if the fail-over cable were to be disconnected for five seconds and then reconnected?

- A. As long as network communication is not lost, no change will occur.
- B. Nothing. Fail-over due to loss of voltage will not occur if the voltage is lost for less than ten seconds.
- C. When the cable is disconnected, both systems will become active. When the voltage is restored, unit two will revert to standby mode.
- D. When the cable is disconnected, both systems will become active. When the voltage is restored, both systems will maintain active mode.

Answer: C

4. You have created a custom profile named TEST2. The parent profile of TEST2 is named TEST1. If additional changes are made to TEST1, what is the effect on TEST2?

- A. All changes to TEST1 are propagated to TEST2.
- B. Some of the changes to TEST1 may propagate to TEST2.
- C. Changes to TEST1 cannot affect TEST2 once TEST2 is saved.
- D. When TEST1 is changed, the administrator is prompted and can choose whether to propagate changes to TEST2.

Answer: B

5. Assume a virtual server has a ServerSSL profile. What SSL certificates are required on the BIG-IP?

- A. No SSL certificates are required on the BIG-IP.
- B. The BIG-IP's SSL certificates must only exist.
- C. The BIG-IP's SSL certificates must be issued from a certificate authority.
- D. The BIG-IP's SSL certificates must be created within the company hosting the BIG-IPs.

Answer: A

6. When upgrading a BIG-IP redundant pair, what happens when one system has been updated but the other has not?

- A. Syncing should not be performed.
- B. The first system to be updated will assume the Active role.
- C. This is not possible since both systems are updated simultaneously.
- D. The older system will issue SNMP traps indicating a communication error with the partner.

Answer: A

7. Which statement is true concerning SSL termination?

- A. A virtual server that has both ClientSSL and ServerSSL profiles can still support cookie persistence.
- B. Decrypting traffic at the BIG-IP allows the use of iRules for traffic management, but increases the load on the pool member.
- C. When any virtual server uses a ClientSSL profile, all SSL traffic sent to the BIG-IP is decrypted before it is forwarded to servers.
- D. If a virtual server has both a ClientSSL and ServerSSL profile, the pool members have less SSL processing than if the virtual server had only a ClientSSL profile

Answer: A

8. Assume a BIG-IP has no NATs or SNATs configured. Which two scenarios are possible when client traffic arrives on a BIG-IP that is NOT destined to a self-IP? (Choose two.)

- A. If the destination of the traffic does not match a virtual server, the traffic will be discarded.
- B. If the destination of the traffic does not match a virtual server, the traffic will be forwarded based on routing tables.
- C. If the destination of the traffic matches a virtual server, the traffic will be processed per the virtual servers definition.
- D. If the destination of the traffic matches a virtual server, the traffic will be forwarded, but it cannot be load-balanced since no SNAT has been configured.

Answer: AC

9. If a client's browser does not accept cookies, what occurs when the client connects to a virtual server using cookie persistence?

- A. The connection request is not processed.
- B. The connection request is sent to an apology server.
- C. The connection request is load-balanced to an available pool member.
- D. The connection request is refused and the client is sent a "server not available" message.

Answer: C

10. The incoming client's IP address is 205.12.45.52. The last five connections have been sent to members C,D,A,B,B.

Given the virtual server and pool definitions and the statistics shown in the exhibit, which member will be used for the next connection?

- A. 10.10.20.1:80
- B. 10.10.20.2:80
- C. 10.10.20.3:80
- D. 10.10.20.4:80
- E. 10.10.20.5:80

Answer: D
