H3C HCSE

GB0-283English: Constructing Enterprise-level Routing Networks

Practice Exam: GB0-283English Exams

Exam Number/Code: GB0-283English

Exam Name: Constructing Enterprise-level Routing Networks

Questions and Answers: 300 Q&As

([HCSE](#))

"Constructing Enterprise-level Routing Networks", also known as GB0-283English exam, is a H3C certification. With the complete collection of exam questions, Just4Study has assembled to take you through 300 Q&As to your GB0-283English exam preparation. In the GB0-283English exam resources, you will cover every field and category in H3C Certification helping to ready you for your successful H3C Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for H3C HCSE GB0-283English (Constructing Enterprise-level Routing Networks) examination of original title complete coverage. GB0-283English exam questions help you pass the exam.

Just4Study GB0-283English Feature:

* High quality - High quality and valued for the GB0-283English Exam: 100% Guarantee to Pass Your GB0-283English exam and get your HCSE certification.

* Authoritative - Authoritative braindumps with complete details about GB0-283English exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed HCSE resources, you will minimize your **H3C HCSE** cost and be ready to pass your GB0-283English exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free HCSE demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the GB0-283English exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free GB0-283English Demo Download

Just4Study offers free demo for HCSE GB0-283English exam (Constructing Enterprise-level Routing Networks). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **H3C HCSE GB0-283English** examination of original title complete coverage. GB0-283English Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: GB0-283English

Exam Name: Constructing Enterprise-level Routing Networks(HCSE)

Questions and Answers: 300 Q&A

[H3C GB0-283English](#) Test belongs to one of the HCSE certified test, if needs to obtain the HCSE certificate, you also need to participate in other related test, the details you may visit the [HCSE](#) certified topic, in there, you will see all related HCSE certified subject of examination.

Just4Study professional provide HCSE GB0-283English the newest Q&A, completely covers GB0-283English test original topic. With our complete HCSE resources, you will minimize your HCSE cost and be ready to pass your GB0-283English tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HuaWei GB0-283English

Title : Constructing Enterprise-level Routing Networks

1. Which of the following descriptions about QoS at the access, convergence and core layers is/are correct? ()

- A. QoS is implemented identically in the access, convergence and core layers.
- B. Packets are classified and marked in the access layer.
- C. No QoS mechanism should be configured in the access layer.
- D. Usually, the queuing mechanism (such as CBQ) and the congestion avoidance mechanism (such as WRED) should be used in the convergence layer.

Answer: BD

2. When a BGP Speaker advertises the imported IGP routes to the IBGP neighbor, the AS-Path value is the local AS number.

- A. True
- B. False

Answer: B

3. A BGP router receives a new route from its EBGP peer, which of the following descriptions is correct? ()

- A. The router will immediately send the route to its BGP peers.
- B. The router will look up this route in its routing table. If the route is not recorded in the routing table, it will send the route to its BGP peers.
- C. The router will check the sent routes information. If it never sends such a route, it will send the route to its BGP peers.
- D. The router will check the sent routes information. If it has sent such a route, it will not send the route to its BGP peers.

Answer: C

4. As described in the OSPF protocol, there must be an Area 0 in the network running OSPF.

- A. True
- B. False

Answer: B

5. The ASBR imports four external routes, 192.168.0.0/24, 192.168.1.0/24, 192.168.2.0/24 and 192.168.0/24. These routes are aggregated to one route 192.168.0.0/22 by the ABR. Which routes will the ABR redistribute to the other areas? ()

- A. One aggregation route
- B. The four original routes
- C. One aggregation route and the four original routes

D. None

Answer: B

6. Which of the following descriptions about route import is/are correct? ()

A. A routing protocol can import the routes discovered by other routing protocols to enrich its routing information.

B. While importing routes from a routing protocol to another, we can define a route-policy to filter out the unexpected routes.

C. In the process of route importing, it is necessary to specify a metric for the imported route if the target routing protocol cannot directly use the metric of the source routing protocol.

D. Bi-directional importing indicates that two routing protocols import the routes from each other. It may cause routing loop.

Answer: ABCD

7. What is the meaning of the BGP command aggregate 10.110.0.0 255.255.0.0 suppress-policy test ? ()

A. Advertise the aggregation route only

B. Advertise the aggregation route and all the aggregated routes

C. Advertise the aggregation route and some aggregated routes that meet the filtering conditions

D. Advertise the aggregated routes only,

Answer: C

8. The default preference of OSPF route in the H3C router is ().

A. 5

B. 10

C. 15

D. 20

Answer: B

9. Compared with IPv4, the IPv6 address is extended to ().

A. 128 bits

B. 164 bits

C. 64 bits

D. 256 bits

Answer: A

10. As shown in the figure, Area 1 is an NSSA area and RouterD is the ABR of the area. The configuration on RouterD is as follows:

```
ospf 1
```

```
area 0.0.0.1
```

```
network 10.45.0.0 0.0.0.255
```

```
nssa default-route-advertise
```

```
#
```

```
area 0.0.0.0
```

```
network 4.4.4.4 0.0.0.0
```

```
network 10.34.0.0 0.0.0.255
```

Which of the following descriptions about the above network diagram and configuration is correct? ()

A. RouterD redistributes a Type 7 LSA for a default route in Area 1. RouterE and RouterF can receive this LSA.

B. RouterD redistributes a Type 5 LSA for a default route in Area 1. RouterE and RouterF can receive this LSA.

C. RouterC can receive a Type 5 LSA for a default route redistributed by RouterD.

D. None of the above

Answer: A

11. OSPF is based on the () algorithm.

A. DV

- B. SPF
 - C. HASH
 - D. 3DES
- Answer: B

12. The BGP mandatory attributes include ().

- A. Origin
- B. AS-Path
- C. Next-hop
- D. MED
- E. Local-preference
- F. Community

Answer: ABC

13. Which of the following descriptions about queue is correct? ()

- A. WFQ discarding mechanism is Tail Drop on each queue, the same as CQ.
- B. WFQ classifies data flow by using ACL.
- C. CBWFQ is an improvement of WFQ using the same basic scheduling as WFQ.
- D. LLQ will first check the low-latency queue and take packets from the queue. Only when there is no packet in the low-delay queue, it will take the packets from other queues. In addition, it uses other mechanisms to avoid starving to death of the queues.

Answer: D

14. Which of the following descriptions about the IPSec Security Association (SA) is/are correct? ()

- A. The data security service provided by IPSec is realized through SAs.
- B. One SA is a unidirectional logical connection between two IPSec peers.
- C. The inbound data flow and outbound data flow are respectively processed by the inbound SA and outbound SA.
- D. SAs can be set up by the means of manual configuration or automatic negotiation.

Answer: ABCD

15. Which of the following descriptions about OSPF is correct? ()

- A. Data is sent by means of multicast.
- B. On receipt of a route update, a router immediately advertises its routing table to its neighbors.
- C. Routing loop can be avoided by poison reverse.
- D. Support equal-cost multipath .

Answer: D

16. The multicast address used by OSPF is ().

- A. 224.0.0.5
- B. 224.0.0.6
- C. 224.0.0.9
- D. 224.0.0.10

Answer: AB

17. Which of the following descriptions about OSPF STUB area is wrong? ()

- A. A backbone area cannot be configured as STUB area and a virtual link cannot pass through a STUB area.
- B. It is unnecessary to configure this attribute on all routers in a STUB area.
- C. There is no ASBR in a STUB area.
- D. After an area is configured as STUB area, the Type 3 LSA of other areas can be propagated in this area.

Answer: B

18. CAR is realized at the IP layer so that it can only limit the traffic of IP packets. Compared with CAR, LR can limit all the traffic passing through the physical interface.

- A. True
- B. False

Answer: A

19. Which of the following descriptions about route aggregation in OSPF is/are wrong? ()

- A. The ABR can automatically summarize routes without manual configuration.
- B. Aggregation can be made only on the ABR.
- C. The router serving as the ABR and the ASBR concurrently cannot summarize routes.
- D. The ASBR can summarize all external routes.

Answer: ABCD

20. Which of the following descriptions about BGP route aggregation is/are correct? ()

- A. Route aggregation is to aggregate routes of all segments into one or more aggregation routes so as to reduce the size of routing table.
- B. If the keyword detail-suppressed is added to the BGP summary command, only the aggregation routes are advertised.
- C. BGP route aggregation takes effect on the route imported through the network command only.
- D. BGP route aggregation takes effect on the route imported through the import command only.

Answer: AB
