### H3C HCSE

#### **GB0-323English: Constructing Enterprise-level Switching Networks**

**Practice Exam:** GB0-323English Exams

**Exam Number/Code:** GB0-323English

**Exam Name:** Constructing Enterprise-level Switching Networks

**Questions and Answers:** 300 Q&As

( [HCSE](#) )

Exam : [GB0-323English](#)

"Constructing Enterprise-level Switching Networks", also known as GB0-323English exam, is a H3C certification. With the complete collection of exam questions, Just4Study has assembled to take you through 300 Q&As to your GB0-323English exam preparation. In the GB0-323English exam resources, you will cover every field and category in H3C Certification helping to ready you for your successful H3C Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for H3C HCSE GB0-323English (Constructing Enterprise-level Switching Networks) examination of original title complete coverage. GB0-323English exam questions help you pass the exam.

#### **Just4Study GB0-323English Feature:**

\* High quality - High quality and valued for the GB0-323English Exam: 100% Guarantee to Pass Your GB0-323English exam and get your HCSE certification.

\* Authoritative - Authoritative braindumps with complete details about GB0-323English exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed HCSE resources, you will minimize your **H3C HCSE** cost and be ready to pass your GB0-323English exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free HCSE demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the GB0-323English exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free GB0-323English Demo Download**

Just4Study offers free demo for HCSE GB0-323English exam (Constructing Enterprise-level Switching Networks). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **H3C HCSE GB0-323English** examination of original title complete coverage.GB0-323English Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: [GB0-323English](#)**

Exam Name: Constructing Enterprise-level Switching Networks( HCSE )

[H3C GB0-323English](#) Test belongs to one of the HCSE certified test, if needs to obtain the HCSE certificate, you also need to participate in other related test, the details you may visit the [HCSE](#) certified topic, in there, you will see all related HCSE certified subject of examination.

Just4Study professional provide HCSE GB0-323English the newest Q&A, completely covers GB0-323English test original topic. With our complete HCSE resources, you will minimize your HCSE cost and be ready to pass your GB0-323English tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HuaWei GB0-323English

Title : Constructing Enterprise-level Switching Networks

1. Which of the following is wrong about VRRP? ( )

- A. VRRP is a virtual redundant gateway protocol.
- B. VRRP supports hot-standby.
- C. VRRP groups do not support authentication.
- D. The virtual IP address of the VRRP group can act as the gateway of PCs.

Answer: C

2. SwitchA is an H3C S Layer-2 switch. PC1, PC2 and PC3 connect to E0/1, E0/2 and E0/3 of SwitchA. The three ports belong to VLAN 10, VLAN 20 and VLAN 30 respectively. A server connects to port G1/1 of the switch, which belongs to VLAN100. The PCs are required to isolate from each other, and the PCs shall be able to access the server. After completing the configuration, which of the following statements is right about the switch ports? ( )

- A. E0/1 is an access port, with the PVID VLAN 10.
- B. E0/2 is a hybrid port, with the Untagged VLAN ID 100, and the Tagged VLAN ID 10.
- C. E0/2 is a Hybrid port, with the Untagged VLAN IDs 20 and100, and the Tagged VLAN ID none.
- D. G1/1 is a Hybrid port, with the Untagged VLAN IDs 10, 20, and 30, and the Tagged VLAN ID 100.

Answer: C

3. Which of the following statements is right about 802.1x ports? ( )

- A. 802.1x supports the port-based authentication only.
- B. The ports of authenticator fall into controlled ports and uncontrolled ports.
- C. Uncontrolled ports always forward bi-directionally whether the authentication is passed or not.
- D. Controlled ports transmit EAPOL protocol packets only.

Answer: BC

4. The length of PAUSE MAC control frame defined in IEEE802.3x is ( ).

- A. 16 bytes
- B. 32 bytes
- C. 64 bytes
- D. 96 bytes

Answer: C

5. Which of the following is correct about the PIM Hello message? ( ):

- A. The Hello message is sent periodically to all PIM routers in multicast group 224.0.0.13 to establish PIM neighbourhood.

- B. The Hello message is used to select the DR on the multi-access network.
- C. As the IGMP message, the Hello message is used to maintain the relationship between interfaces and host members.
- D. When IGMP V1 is adopted on the interface, the Hello message is used to select the DR as the IGMP V1 querier.
- Answer: ABD

6. On the H3C S middle-end/low-end switches, STP is enabled by default. ( )

- A. True
- B. False

Answer: B

7. VLAN can be defined based on ( ).

- A. IP addresses
- B. Network layers
- C. MAC addresses
- D. Ports

Answer: ACD

8. The reason why RSTP can implement fast restoration of the network is that ( ).

- A. RSTP reduces the delay from the Blocking state to the Forwarding state.
- B. The port will enter the Forwarding state immediately if the old Root port turn in the Blocking state and the remote end of the new Root port is in the Forwarding state.
- C. A non-edge Designated port needs only one handshake with the downstream bridge to transfer from the Blocking state to the Forwarding state quickly.
- D. Soon after the bridge is started, the edge port enters the Forwarding state without delay.

Answer: ABCD

9. Which of the following statements is correct? ( )

- A. igmp timer query seconds is used to set the interval of the query packet sending on the switch.
- B. igmp timer query seconds is used to set the maximum response time in the query packet.
- C. igmp max-response-time seconds is used to set the maximum response time in the query packet.
- D. igmp timer other-querier-present seconds is used to set the timeout time of the snooping querier on the switch.

Answer: ACD

10. Which of the following is not a multicast routing protocol? ( )

- A. PIM-SM
- B. PIM-DM
- C. DVMRP
- D. IGMP

Answer: D

11. Which of the following is right about the GARP application? ( )

- A. The switches in a network domain automatically share the VLAN information and multicast group configuration information.
- B. The whole switching network can be monitored precisely through a switch.
- C. The changed VLAN or multicast group configuration will be advertised to the whole switching network dynamically, thus reducing the maintenance cost and improving the reliability.
- D. Plug-and-play of VLANs and multicast groups are implemented.

Answer: ABCD

12. Two 100Mbps copper interfaces interconnect with each other. One of them is set to be 100Mbps/full-duplex, and the other one is set to be auto negotiation. The speed and duplex mode of the auto negotiation end will be ( ).

- A. 100Mbps/ full-duplex

- B. 100Mbps/Half-duplex
- C. 10Mbps/ full-duplex
- D. 10Mbps/Half-duplex

Answer: B

13. Which of the following methods cannot be used to configure H3C middle-end and low-end switches? ( )

- A. Console
- B. Xmodem
- C. Telnet
- D. Dial-up with Modems

Answer: B

14. 801D defines the Disabled state of STP. Which of the following is correct about the port in the Disabled state? ( )

- A. It does not receive/send any packet.
- B. It does not receive/forward data. It receives but does not send BPDUs, and does not learn addresses.
- C. It does not receive/forward data. It receives and forwards BPDUs, and does not learn addresses.
- D. It does not receive/forward data. It receives and forwards BPDUs. It begins to learn addresses.
- E. It receives or forwards data. It receives and forwards BPDUs. It begins to learn addresses.

Answer: A

15. In STP, it is suggested to modify the value of Max Age indirectly through setting the network diameter. ( )

- A. True
- B. False

Answer: A

16. On the H3C switch, VRRP can be used to implement ( ).

- A. Gateway backup of the LAN
- B. Gateway backup of the WAN
- C. Load balance
- D. Port monitoring for improving network reliability

Answer: ACD

17. IGMP is a signaling protocol between hosts and the router, which defines the mechanism to establish and maintain the multicast membership between hosts and the router. ( )

- A. True
- B. False

Answer: A

18. Multicast protocols fall into group member management protocols and multicast routing protocols. Which of the following is a group member management protocol? ( )

- A. GVRP
- B. GMRP
- C. IGMP
- D. PIM

Answer: C

19. Which of the following is right about CSMA/CD? ( )

- A. It is a telecommunication mechanism adopting the CDMA technology.
- B. CSMA/CD means Carrier Sense Multiple Access with Collision Detection.
- C. It is supported by Ethernet switches, bridges, and hubs.
- D. It is the next generation communication technology.

Answer: B

20. STP is a routing protocol.

A. True

B. False

Answer: B
