

GB0-363English braindumps

H3C HCSE

GB0-363English: Designing Enterprise-level Networks

Practice Exam: GB0-363English Exams

Exam Number/Code: GB0-363English

Exam Name: Designing Enterprise-level Networks

Questions and Answers: 317 Q&As

([HCSE](#))

"Designing Enterprise-level Networks", also known as GB0-363English Exam : [GB0-363English](#) exam, is a H3C certification. With the complete collection of exam questions, Just4Study has assembled to take you through 317 Q&As to your GB0-363English exam preparation. In the GB0-363English exam resources, you will cover every field and category in H3C Certification helping to ready you for your successful H3C Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for H3C HCSE GB0-363English (Designing Enterprise-level Networks) examination of original title complete coverage. GB0-363English exam questions help you pass the exam.

Just4Study GB0-363English Feature:

* High quality - High quality and valued for the GB0-363English Exam: 100% Guarantee to Pass Your GB0-363English exam and get your HCSE certification.

* Authoritative - Authoritative braindumps with complete details about GB0-363English exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed HCSE resources, you will minimize your **H3C HCSE** cost and be ready to pass your GB0-363English exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free HCSE demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the GB0-363English exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free GB0-363English Demo Download

Just4Study offers free demo for HCSE GB0-363English exam (Designing Enterprise-level Networks). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **H3C HCSE GB0-363English** examination of original title complete coverage. GB0-363English Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: GB0-363English

Exam Name: Designing Enterprise-level Networks(HCSE)

Questions and Answers: 317 Q&A

H3C GB0-363English Test belongs to one of the HCSE certified test, if needs to obtain the HCSE certificate, you also need to participate in other related test, the details you may visit the [HCSE](#) certified topic, in there, you will see all related HCSE certified subject of examination.

Just4Study professional provide HCSE GB0-363English the newest Q&A, completely covers GB0-363English test original topic. With our complete HCSE resources, you will minimize your HCSE cost and be ready to pass your GB0-363English tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HuaWei GB0-363English

Title : Designing Enterprise-level Networks

1. On the basis of the port-based dynamic NAT, GRE can work properly after NAT traversal.

- A. True
- B. False

Answer: B

2. Which is the encapsulation format used in ADSL dial-up access initiated from PC? ()

- A. IPoA
- B. IPoEoA
- C. PPPoA
- D. PPPoEoA

Answer: D

3. In a Layer 2 switching network, if only IGMP Snooping is enabled on the switch, what will happen? ()

- A. Multicast fails.
- B. Multicast works properly, but IGMP Snooping cannot correctly record the member port information.
- C. Multicast works properly, and IGMP Snooping can correctly record the member port information.
- D. IGMP Snooping will work properly if IGMP Spoofing is enabled.

Answer: A

4. The VPN network security design include ().

- A. Tunnel and encryption
- B. Data authentication
- C. User identification & device authentication
- D. Intrusion detection & network access control
- E. Routing protocol authentication

Answer: ABCD

5. The superiority of OSPF to RIP includes ().

- A. Variable long subnet mask
- B. Multicasting update
- C. Protocol packet authentication
- D. No routing loop
- E. Fast convergence

Answer: DE

6. To prevent route spoofing, it is preferred to set the OSPF enabled interface that is connected to the users intranet to the Silent state and enable MD5 authentication.

- A. True
- B. False

Answer: B

7. The hierarchical network model consists of ().

- A. Core layer
- B. Convergence layer
- C. Access layer
- D. Network layer

Answer: ABC

8. The common security equipment includes the Firewall, Intrusion Detection System (IDS) and Intrusion Prevention System (IPS). The IDS serves as the gateway and is deployed on the path of main service traffic, while the Firewall and IPS are deployed on the bypass.

- A. True
- B. False

Answer: B

9. What advantages does the hierarchical network model have?().

- A. Easy to expand
- B. Easy to troubleshoot
- C. Easy to manage
- D. Saving cost

Answer: ABCD

10. Which of the following descriptions about dynamic routing protocol is correct? ()

- A. The fundamentals of RIPv6 are the same as those of RIPv2, but RIPv6 speeds up convergence compared with RIPv2.
- B. The packet format of OSPFv3 is the same as that of OSPF, but OSPFv3 can support IPv6.
- C. MBGP is the unique EGP routing protocol in the IPv6 network.
- D. IS-IS supports multiple protocols so that it can support IPv6 without any modification.

Answer: C

11. PIM-SM may not need RP.

- A. True
- B. False

Answer: B

12. In an MSTP region, all switches must support the MSTP. There is not such a switch that supports RSTP or STP only.

- A. True
- B. False

Answer: A

13. The security services in the Open System Interconnection security architecture include () and anti-DoS.

- 1) Authentication
- 2) Access control
- 3) Data privacy service
- 4) Data integrity service

- A. 1) and 2)
- B. 1), 2) and 3)
- C. 2) and 4)

D. 1), 2), 3) and 4)

Answer: D

14. If the data link layer protocol in the OSPF P2P network is PPP, two OSPF routers whose interface addresses are in different subnets can still establish adjacency and learn the routing information correctly.

A. True

B. False

Answer: A

15. To transit a SOHO network to IPv6, we should ().

A. Choose an appropriate tunnel technology to access the IPv6 Internet according to the access mode provided by the ISP

B. Use the dual-stack technology to enable all the hosts to access IPv6 and IPv4 network concurrently

C. Use 6to4 technology to access the IPv6 Internet if the ISP does not provide any IPv6 access

D. Use the 6PE technology to access the IPv6 Internet if the ISP provides 6PE access

Answer: AC

16. Which of the following descriptions about the BGP route aggregation is correct? ()

A. It advertises the aggregation route only.

B. It cannot aggregate routes and advertises the original routes only.

C. It can advertise the aggregation route and the original routes.

D. The original AS-Path attribute is changed during route aggregation.

Answer: C

17. Which of the following descriptions about QoS is/are correct? ()

A. Traffic policing can be applied on the inbound or outbound interfaces.

B. Traffic shaping can be applied on the inbound or outbound interfaces.

C. Congestion management and queue scheduling can be applied on the inbound or outbound interfaces.

D. RED and WRED are used to avoid TCP global synchronization.

Answer: AD

18. Which of the following descriptions about the network core layer is correct? ()

A. The core layer serves to exchange data packets.

B. The complex QoS policy must be performed at the core layer.

C. The core layer should use the star topology.

D. Routers at the core layer do not need backup.

Answer: A

19. Which of the following is/are correct about data link layer backup? ()

A. The PPP MP can provide automatic backup and load balancing among the links in a bundle.

B. The dial-watch continuously sends ICMP packets to detect whether the peer is reachable.

C. IEEE 802.3ad can provide automatic backup and load balancing among the links in a bundle.

D. The RPR uses the probe packet at the data link layer to realize self-healing in case of link failure.

Answer: AD

20. Which of the following port states is/are defined in both STP and RSTP? ()

A. Disabled

B. Blocking

C. Listening

D. Learning

E. Forwarding

Answer: DE
