Hitachi Hitachi Data Systems

HH0-005: TagmaStore AMS and WMS-Installation and Configuration

Practice Exam: HH0-005 Exams

Exam Number/Code: HH0-005

Exam Name: TagmaStore AMS and WMS-Installation and Configuration

Questions and Answers: 40 Q&As

([Hitachi Data Systems](#))

"TagmaStore AMS and WMS-Installation and Configuration", also known as HH0-005 exam, is a Hitachi certification. With the complete collection of exam questions, Just4Study has assembled to take you through 40 Q&As to your HH0-005 exam preparation. In the HH0-005 exam resources, you will cover every field and category in Hitachi Certification helping to ready you for your successful Hitachi Certification.

Exam : [HH0-005](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Hitachi Hitachi Data Systems HH0-005 (TagmaStore AMS and WMS-Installation and Configuration) examination of original title complete coverage. HH0-005 exam questions help you pass the exam.

Just4Study HH0-005 Feature:

* High quality - High quality and valued for the HH0-005 Exam: 100% Guarantee to Pass Your HH0-005 exam and get your Hitachi Data Systems certification.

* Authoritative - Authoritative braindumps with complete details about HH0-005 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Hitachi Data Systems resources, you will minimize your **Hitachi Hitachi Data Systems** cost and be ready to pass your HH0-005 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Hitachi Data Systems demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HH0-005 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HH0-005 Demo Download

Just4Study offers free demo for Hitachi Data Systems HH0-005 exam (TagmaStore AMS and WMS-Installation and Configuration). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Hitachi Hitachi Data Systems HH0-005** examination of original title complete coverage. HH0-005 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HH0-005

Exam Name: TagmaStore AMS and WMS-Installation and Configuration(Hitachi Data Systems)

Questions and Answers: 40 Q&A

[Hitachi HH0-005](#) Test belongs to one of the Hitachi Data Systems certified test, if needs to obtain the Hitachi Data Systems certificate, you also need to participate in other related test, the details you may visit the [Hitachi Data Systems](#) certified topic, in there, you will see all related Hitachi Data Systems certified subject of examination. Just4Study professional provide Hitachi Data Systems HH0-005 the newest Q&A, completely covers HH0-005 test original topic. With our complete Hitachi Data Systems resources, you will minimize your Hitachi Data Systems cost and be ready to pass your HH0-005 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Hitachi HH0-005

Title : TagmaStore AMS and WMS-Installation and Configuration

1. Which statement regarding Cache Partition Manager is correct?

- A.It allows upgrading the controller Cache online.
- B.It allows switching on/off Read after Write for SATA drives.
- C.It is used to set boundaries between Read and Write Cache.
- D.It allows separating slow LUNs from fast LUNs in the Cache.

Answer: D

2. Which statement correctly describes the difference between AMS200 and AMS500 back-end loop architectures?

- A.The AMS200 has two independent back-end loops.
- B.The AMS200 has only one logical loop per controller that is shared by all HDDs.
- C.In the AMS200 the same ALPA can occur on the two different physical loops on the same controller.
- D.The AMS200 uses two different World-Wide-Names (WWNs) for connectors #0 and #1 on each controller.

Answer: B

3. Which combination of features and parameters can be configured with the AMS/WMS Cache Partition Manager?

- A.Partitioning of the Cache, Cache partition segment size, HDD stripe size, Read-data mirroring on/off
- B.Partitioning of the Cache, Cache partition stripe size, HDD segment size, Write-data mirroring on/off
- C.Partitioning of the Cache, Cache partition segment size, HDD stripe size, Write-data mirroring on/off
- D.Partitioning of the Cache, Cache partition segment size, HDD stripe size, Cache destage algorithm

Answer: C

4. An AMS500 connected to a host running Hitachi Dynamic Link Manager (HDLM) software has the Data Share Mode set to on. The host is using multi-path to access the same single LUN through the four front-end FC ports of the AMS500.

Which two statements are true? (Choose two.)

- A.Host I/Os switch to non-owner path if all owner paths are down.
- B.Host I/Os go through all the four FC ports of the AMS500 at same time.
- C.By default, Host I/Os only go through the owner path via owner controller FC ports.
- D.Host I/Os do not need switching paths with Data Share Mode on when all owner paths are down.

Answer: AC

5. Which three restrictions related to the controller front-end architecture apply to the WMS100 and AMS200 series? (Choose three.)

- A.The transfer rate for both mini-hub connectors must be set to the same speed.
- B.Both connectors on the same mini-hub must be connected to the same Fabric.
- C.The microcode disables the second mini-hub connector in case of Fabric connection.

- D.Both connectors on the same mini-hub must be connected through a Fabric to different hosts.
- E.The LUN management functions must be used to share the original port by 2 hosts through the same mini-hub.

Answer: ACE

6. A customer has an AMS500 consisting of:

Unit 00: RKM with six 300GB FC HDDs in position 00 to 05.

Unit 01: RKAJAT with five 250GB SATA HDDs in position 00 to 04 and four 400GB SATA HDDs in position 05 to 08.

Unit 02: same as Unit 01.

You now want to create a R5(7+1) SATA RAID Group.

What happens if you choose the Automatic selection button in the RAID Group creation dialog and your parity group value is 1?

- A.You cannot define a SATA RAID Group before the definition of a spare disk.
- B.The RAID Group will be created using Unit 01 HDDs 00 to 04 and Unit 02 HDDs 00 to 02.
- C.The dialog will end with an error because (7+1) is not an appropriate size for a SATA RAID Group.
- D.The Automatic creation dialog will choose SATA HDDs in sequential order, which is Unit 01 HDDs 00 to 07.

Answer: B

7. Which two statements relating to the concept of LUN ownership and its implication on configuration best practices in HDLM and non-HDLM environments are correct? (Choose two.)

- A.HDLM can only fail-over to the other controller.
- B.HDLM can automatically fail-back to the original path.
- C.When one LUN switches ownership, all other LUNs on the same controller follow.
- D.When a LUN is no longer accessed via the owning controller, but via the non-owning controller, it will change ownership after sixty seconds.

Answer: BD

8. An AMS200 has the optional FC host interface feature installed.

Which two statements correctly describe the FC port configuration supported by this storage subsystem? (Choose two.)

- A.Maximum one FC interface port per controller
- B.Maximum two FC interface ports per controller
- C.Maximum three FC interface ports per controller
- D.Maximum four FC interface ports per system

Answer: BD

9. Which two statements relating to AMS/WMS microcode upgrade are correct? (Choose two.)

- A.The AMS/WMS microcode is by default located on the System Area of the first five hard disk drives.
- B.The AMS/WMS hard disk drive Roaming feature allows for the microcode to be stored onto the User Area of any hard disk.
- C.It is possible to perform an online microcode upgrade using the Web Tool when the Host application runs HDLM multi-path support.
- D.It is possible to perform an online microcode upgrade using Storage Navigator Modular when the Host application runs HDLM multi-path support via both controllers.

Answer: AD

10. A customer using an AMS500 with mixed FC and SATA drives wants to take advantage of the HDD Roaming feature. You have started to define a RAID Group R5(4+1) with a FC disk in unit 0 position 0.

Which three valid options can you now consider? (Choose three.)

- A.Spread the R5(4+1) group over several RKAJs.
- B.Extend the defined R5(4+1) group into a (5+1) group on the fly.
- C.Assign four FC disks and one SATA disk to the R5(4+1) group.
- D.Choose any other position in the subsystem for defining a FC spare disk.
- E.Add any other FC disk of any size and speed to the RAID Group starting at 0,0.
