

## HP0-065 braindumps

### HP Certification III

**HP0-065: Planning and Designing ProLaint Solutions for the Enterprise**

**Practice Exam:** HP0-065 Exams

**Exam Number/Code:** HP0-065

**Exam Name:** Planning and Designing ProLaint Solutions for the Enterprise

**Questions and Answers:** 134 Q&As

( [Certification III](#) )

Exam : [HP0-065](#)

"Planning and Designing ProLaint Solutions for the Enterprise", also known as HP0-065 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 134 Q&As to your HP0-065 exam preparation. In the HP0-065 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification III HP0-065 (Planning and Designing ProLaint Solutions for the Enterprise) examination of original title complete coverage. HP0-065 exam questions help you pass the exam.

#### **Just4Study HP0-065 Feature:**

\* High quality - High quality and valued for the HP0-065 Exam: 100% Guarantee to Pass Your HP0-065 exam and get your Certification III certification.

\* Authoritative - Authoritative braindumps with complete details about HP0-065 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification III resources, you will minimize your **HP Certification III** cost and be ready to pass your HP0-065 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free Certification III demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-065 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free HP0-065 Demo Download**

Just4Study offers free demo for Certification III HP0-065 exam (Planning and Designing ProLaint Solutions for the Enterprise). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **HP Certification III HP0-065** examination of original title complete coverage.HP0-065 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: HP0-065**

Exam Name: Planning and Designing ProLaint Solutions for the Enterprise( Certification III )

Questions and Answers: 134 Q&A

[HP HP0-065](#) Test belongs to one of the Certification III certified test, if needs to obtain the Certification III certificate, you also need to participate in other related test, the details you may visit the [Certification III](#) certified topic, in there, you will see all related Certification III certified subject of examination.

Just4Study professional provide Certification III HP0-065 the newest Q&A, completely covers HP0-065 test original topic. With our complete Certification III resources, you will minimize your Certification III cost and be ready to pass your HP0-065 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-065

Title : Planning and Designing ProLaint Solutions for the Enterprise

1. When configuring the authorizations for the System Management Homepage (SMH) on a Linux server, what should the system manager do to allow access for the root user?

- A. Create a password for root in SMH.
- B. Add root to the administrators group in SMH.
- C. Import the password file from Linux into SMH.
- D. Enter the root username and password to log into SMH.

Answer: D

2. What integrates with the System Management Homepage to enable network administrators to maintain detailed server inventory and track historical configuration changes?

- A. Version Control Agents (VCA)
- B. HP Insight Diagnostics Online
- C. Array Configuration Utility (ACU)
- D. Open Services Event Manager (OSEM)

Answer: B

3. Which management protocol is used by the Onboard Administrator for BladeSystem c-Class to send event notifications for thresholds and faults to HP Systems Insight Manager (HP SIM)?

- A. eXtended Management Layer (XML) protocol
- B. Web-based Enterprise Management (WBEM)
- C. Windows Management Instrumentation (WMI)
- D. Simple Network Management Protocol (SNMP)

Answer: D

4. What action does HP Systems Insight Manager (HP SIM) take when a blade server is identified through another system in the same rack or enclosure?

- A. The system is catalogued to be polled during the next discovery task
- B. Associations are made between the blade server operating system to the next blade server operating system using the Interconnect ID.
- C. Associations are made between the iLO and the enclosure in which the system resides.
- D. HP Systems Insight Manager (HP SIM) requests all relevant information about the blade server to the HP BladeSystem Integrated Manager.

Answer: C

5. When looking into HP Systems Insight Manager (HP SIM), an administrator detects an issue with a c-Class server blade. However, in the Onboard Administrator, everything looks fine. What could be the reason?

- A. The Onboard Administrator is running in a different VLAN than the HP SIM server.
- B. The c-Class server blades are running an older version of the HP management agents.
- C. The Onboard Administrator status does not include information from the agents running on the blades.
- D. The management link between the c-Class server blades and the Onboard Administrator is not configured.

Answer: C

6. What is the recommended method of configuring the access security control between HP Systems Insight Manager (HP SIM) and the System Management Homepage (SMH)?

- A. configure trust by name in HP SIM
- B. configure trust by certificate in the SMH
- C. import the SSH private key generated by HP SIM into SMH
- D. synchronize the password files between SMH and HP SIM

Answer: B

7. What is one of the primary responsibilities of Integrated Lights-Out (iLO) in the server blade p-class architecture?

- A. Control the distribution of virtual IP-addresses and link them to the physical MAC addresses.
- B. Control and regulate access to the power management module when using the RS-232 connection method.
- C. Monitor and control the communication on the network bus used by the power and enclosure management module.
- D. Assist in managing power resources by acting as an intelligent interface to the server blade infrastructure and its power management module.

Answer: D

8. What is downloaded from an HP website when updating the patch database used by Vulnerability and Patch Management (VPM)?

- A. updated VPM software, if available
- B. latest patches from different vendors
- C. latest vulnerability scan definition files
- D. newer version of the Radia patch agent, if available

Answer: C

9. What is used to secure access to the System Management Homepage? (Select two.)

- A. IP restriction
- B. Secure Shell (SSH)
- C. web-based secured login
- D. SNMP community names
- E. multiple login authentications

Answer: AC

10. Which application requires 100% uptime, where unavailability can have catastrophic business impact?

- A. mission-critical application
- B. business-critical application
- C. continuous effort application
- D. disaster-recovery application

Answer: A

11. Which tool gives you an intuitive and secure interface to review in-depth information on hardware configuration, performance metrics and system thresholds and is part of the ProLiant Support Pack?

- A. HP Control Tower
- B. HP System Management Homepage
- C. HP Performance Management agents
- D. HP Systems Insight Manager (HP SIM)

Answer: B

12. The following questions are asked during which part of the planning cycle?

What is the expected availability of the new solution?

What is the projected role of the new server?

What kind of system management tools are required?

- A. site survey
- B. scope of work
- C. needs analysis
- D. implementation timeline

Answer: C

13. E-commerce sites are an example of which implementation?

- A. mission-critical application
- B. business-critical application
- C. continuous effort application
- D. disaster-recovery application

Answer: B

14. What is used by Integrated Lights-Out (iLO) to improve security? (Select two.)

- A. XML scripting
- B. Secure Shell (SSH)
- C. Virtual password store
- D. Secure Sockets Layer (SSL)
- E. Secure Task Execution (STE)

Answer: BD

15. Which layer-two protocol provides neighbor device discovery and runs on all networking devices such as routers, bridges and switches?

- A. Cisco Discovery Protocol (CDP)
- B. Transmit Control Protocol (TCP)
- C. Virtual Router Redundancy Protocol (VRRP)
- D. Simple Network Management Protocol (SNMP)

Answer: A

16. Which feature in Intelligent Networking Pack (INP) allows the creation of groups inside a single team, where each group is assigned one or more teamed ports?

- A. fast path failover
- B. router path failover
- C. dual channel teaming
- D. dual channel load balancing

Answer: C

17. Which HP SAN design is recommended for anyone just starting with SAN technology?

- A. HP standard design
- B. variation of an HP standard design
- C. flexible design using HP standard design
- D. custom design using HP StorageWorks SAN design rules

Answer: A

18. What do you need to access the Onboard Administrator for a BladeSystem c-Class enclosure remotely? (Select two.)

- A. a standard USB cable
- B. an RS-232 serial cable
- C. a compatible web browser

- D. a terminal emulation program
- E. the Onboard Administrator IP address

Answer: CE

19. What benefit is provided from a fault-tolerant system?
- A. 99.99% availability
  - B. maximum availability regardless of the circumstances
  - C. clustering with failover processes and application monitoring
  - D. component level redundancy, with a limited percentage of downtime

Answer: B

20. What can be imported into the System Management Homepage to increase security?
- A. local server certificate
  - B. encrypted password file
  - C. Secure Shell (SSH) public key
  - D. 128bit RC4 encryption license

Answer: A
