HP Certification III

HP0-082: OpenVMS Advanced System Administration.Performance. support

Practice Exam: HP0-082 Exams

Exam Number/Code: HP0-082

Exam Name: OpenVMS Advanced System Administration.Performance. support

Questions and Answers: 141 Q&As

([Certification III](#))

Exam : [HP0-082](#)

"OpenVMS Advanced System Administration.Performance. support", also known as HP0-082 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 141 Q&As to your HP0-082 exam preparation. In the HP0-082 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification III HP0-082 (OpenVMS Advanced System Administration.Performance. support) examination of original title complete coverage. HP0-082 exam questions help you pass the exam.

Just4Study HP0-082 Feature:

* High quality - High quality and valued for the HP0-082 Exam: 100% Guarantee to Pass Your HP0-082 exam and get your Certification III certification.

* Authoritative - Authoritative braindumps with complete details about HP0-082 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification III resources, you will minimize your **HP Certification III** cost and be ready to pass your HP0-082 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification III demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-082 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-082 Demo Download

Just4Study offers free demo for Certification III HP0-082 exam (OpenVMS Advanced System Administration.Performance. support). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **HP Certification III HP0-082** examination of original title complete coverage.HP0-082 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: HP0-082

Exam Name: OpenVMS Advanced System Administration.Performance. support(Certification III)

Questions and Answers: 141 Q&A

[HP HP0-082](#) Test belongs to one of the Certification III certified test, if needs to obtain the Certification III certificate, you also need to participate in other related test, the details you may visit the [Certification III](#) certified topic, in there, you will see all related Certification III certified subject of examination.

Just4Study professional provide Certification III HP0-082 the newest Q&A, completely covers HP0-082 test original topic. With our complete Certification III resources, you will minimize your Certification III cost and be ready to pass your HP0-082 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-082

Title : OpenVMS Advanced System Administration. Performance. Support

1. What improvement results from issuing the following command?

SET RMS_DEFAULT/QUERY_LOCK=DISABLE

- A. read performance for all files
- B. read performance for shared files
- C. read and write performance for all files
- D. read and write performance for shared files

Answer: B

2. Which utility must be invoked after replacing a Fibre Channel tape device?

- A. SANCP
- B. INSTALL
- C. SYSMAN
- D. SYSGEN
- E. WWIDMGR

Answer: C

3. A privileged kernel mode program is designed to operate on an SMP system. Which synchronization technique coordinates access to shared memory management structures?

- A. paging
- B. spinlocks
- C. mailboxes
- D. event flags

Answer: B

4. Click the Exhibit button.

Which statement is true?

- A. Paged Dynamic Memory is badly fragmented.
- B. Nonpaged Dynamic Memory should be increased.
- C. Lock Manager Dynamic Memory should be increased.
- D. Lookaside space is too small for optimal performance.

Answer: B

5. Why is the Dedicated CPU Lock Manager enabled?

- A. to monitor lock remastering
- B. to increase the availability of CPUs in an SMP system

- C. to decrease the number of resources on a CPU specific lock tree
- D. to reduce MP Synchronization time on systems with heavy lock activity

Answer: D

6. Click the Exhibit button.

Which term best describes the OpenVMS cluster shown in the exhibit?

- A. fault tolerant
- B. non-redundant
- C. highly available
- D. disaster tolerant

machine with an I/O bottleneck

- D. in a non-SMP machine with an I/O bottleneck

Answer: C

7. Users are reporting that the system is running slower than normal. The information displayed by a MONITOR MODES command indicates that the INTERRUPT mode usage is much higher than normal. What is a possible cause?

- A. Excessive use of RMS is occurring.
- B. The base priority of users has increased.
- C. DCL programs are running on the system.
- D. There is an increase in distributed lock processing.

Answer: D

8. Which process scheduling priority is a real-time priority?

- A. 4
- B. 8
- C. 16
- D. 64

Answer: C

9. Which system parameter restricts the amount of physical memory that can be consumed by the eXtended File Cache (XFC)?

- A. XFC_MAX_CACHE
- B. VCC_CACHE_SIZE
- C. FILE_CACHE_MAX
- D. VCC_MAX_CACHE

Answer: D

10. A customer is losing old versions of a data file that must be kept. Which ACE will help to determine the cause?

- A. (IDENTIFIER=AUDIT, ACCESS=R+W+D+C+S)
- B. (AUDIT=SECURITY, ACCESS= R+W+D+C+S)
- C. (IDENTIFIER=AUDIT, OPTIONS=DEFAULT, ACCESS=R+W+D+C+F)
- D. (AUDIT=SECURITY, OPTIONS=DEFAULT, ACCESS= R+W+D+C+F)

Answer: B

11. Which LINK qualifier will prevent an image from being installed with privilege?

- A. /SYSTEM
- B. /NOSYSLIB
- C. /TRACEBACK
- D. /SECTION_BINDING=CODE

Answer: C

12. Which pair of interconnects supports a multi-site cluster separated by more than 50km?

- A. CI and Memory Channel
- B. Fibre Channel and Ethernet
- C. CI and FDDI
- D. Memory Channel and Fibre Channel

Answer: B

13. An OpenVMS Integrity server was added to an existing OpenVMS Alpha cluster, sharing the existing SYSUAF.DAT. Users running a migrated application on the Integrity server experience occasional problems related to UAF quotas.

Which group of quotas is most likely responsible?

- A. BIOLM, DIOLM, TQELM
- B. ENQLM, FILLM, JTQUOTA
- C. BYTLM, PGFLQUO, WSQUO
- D. ASTLM, PRCLM, WSEXTENT

Answer: C

14. A customer requires a low-end OpenVMS cluster using Fibre Channel and shared storage.

Which configuration is the most appropriate solution for a limited budget?

- A. two servers with two Host Bus Adapters and two network cards each and an MSA1000
- B. two servers with one Host Bus Adapter and two network cards each, one Fibre Channel SAN switch, one pair of HSV100 controllers and a network switch
- C. two servers with two Host Bus Adapters and two network cards each, two Fibre Channel SAN switches, two pairs of HSV100 controllers and a network switch
- D. two servers with one Host Bus Adapter and one network card each, one Fibre Channel SAN switch and one pair of HSV100 controllers

Answer: D

15. Fast Path is enabled on an SMP system, but all I/O operations appear to be using the primary CPU. Which parameter should be checked?

- A. CPU_AFFINITY
- B. PREFERRED_CPU
- C. IO_PREFER_CPUS
- D. PREFERRED_PATH

Answer: C

16. Many processes on a system are in RWMPB or RWPFW state. What is a probable cause?

- A. Lock requests are stalled.
- B. The look-aside lists are full.
- C. The page file is full.
- D. The paged pool has expanded.

Answer: C

17. Under which condition is enabling Fast Path likely to improve performance?

- A. in an SMP machine with the primary CPU saturated
- B. in a non-SMP machine with a saturated CPU
- C. in an SMP machine with an I/O bottleneck
- D. in a non-SMP machine with an I/O bottleneck

Answer: A

18. Click the Exhibit button.

Which statement regarding the system parameters is true?

- A. GBLPAGFIL is too small.
- B. PAGEDYN should be reduced.

- C. NPAGEDYN should be increased.
- D. LCKMGRDYN should be increased.

Answer: C

19. Which synchronization mechanism allows cooperating processes to coordinate their access to a named resource in a clustered environment?

- A. mutex
- B. spinlock
- C. logical names
- D. distributed lock manager

Answer: D

20. What does the GALAXY system parameter do?

- A. defines the number of instances in a hard partition
- B. controls participation of the instance in a GALAXY memory sharing set
- C. defines the number of CPUs that are assigned to an instance
- D. limits the amount of shared memory in a GALAXY community

Answer: B
