HP Certification III

HP0-236: Supporting SAN Infrastructure & Solutions

Practice Exam: HP0-236 Exams

Exam Number/Code: HP0-236

Exam Name: Supporting SAN Infrastructure & Solutions

Questions and Answers: 55 Q&As

([Certification III](#))

"Supporting SAN Infrastructure & Solutions", also known as HP0-236 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 55 Q&As to your HP0-236 exam preparation. In the HP0-236 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

Exam : [HP0-236](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification III HP0-236 (Supporting SAN Infrastructure & Solutions) examination of original title complete coverage. HP0-236 exam questions help you pass the exam.

Just4Study HP0-236 Feature:

* High quality - High quality and valued for the HP0-236 Exam: 100% Guarantee to Pass Your HP0-236 exam and get your Certification III certification.

* Authoritative - Authoritative braindumps with complete details about HP0-236 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification III resources, you will minimize your **HP Certification III** cost and be ready to pass your HP0-236 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification III demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-236 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-236 Demo Download

Just4Study offers free demo for Certification III HP0-236 exam (Supporting SAN Infrastructure & Solutions). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification III HP0-236** examination of original title complete coverage. HP0-236 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-236

Exam Name: Supporting SAN Infrastructure & Solutions(Certification III)

Questions and Answers: 55 Q&A

[HP HP0-236](#) Test belongs to one of the Certification III certified test, if needs to obtain the Certification III certificate, you also need to participate in other related test, the details you may visit the [Certification III](#) certified topic, in there, you will see all related Certification III certified subject of examination.

Just4Study professional provide Certification III HP0-236 the newest Q&A, completely covers HP0-236 test original topic. With our complete Certification III resources, you will minimize your Certification III cost and be ready to pass your HP0-236 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-236

Title : Supporting SAN Infrastructure & Solutions

1. What does the HP SAN Security Services Product provide?

- A. security services which include the implementation of third party security products
- B. security services which include security review, planning and ongoing audit
- C. fiber optic components which do not emit electromagnetic radiation
- D. product specific installation and maintenance, but no security audit

Answer: B

2. A customer requests an inventory and storage resource planning tool in a SAN environment. What is the recommended software?

- A. Array Configuration Utility
- B. HP OpenView Storage Builder
- C. HP OpenView Storage Allocator
- D. Storage System Array Controller Software

Answer: B

3. Which environment supports a direct Fibre Channel connection between a storage array and server?

- A. NonStop server with XP array
- B. NonStop server with EVA array
- C. MPIO with EVA array
- D. Microsoft Cluster with MSA1000

Answer: A

4. What do you recommend if a performance bottleneck is discovered on a link between a 1 Gbps and a 2 Gbps B-series switch?

- A. Implement trunking on this link.
- B. Implement port channeling on this link.
- C. Use multi-mode cable instead of single mode.
- D. Replace the 1 Gbps switch with a 2 Gbps switch.

Answer: D

5. How can you activate optional security features on M-series switches?

- A. Enable Secure Fabric mode.
- B. Use VSANs instead of zones.
- C. Enable Enterprise Fabric mode.
- D. Use object level zoning.

Answer: C

6. What is the meaning of multipathing in a SAN environment?
- A. a general term for trunking and port channeling
 - B. at least two separate data paths between server and storage
 - C. a SAN topology where any switch has at least two links to any other switch
 - D. at least two inter-switch links between switches

Answer: B

7. A complex SAN designed for applications with small IOs is used primarily by applications with large IOs. What is the impact to the SAN?

- A. The supported hop count is reduced.
- B. There may be congestion on inter-switch links.
- C. None. SAN design is not dependent on application IO size.
- D. The buffer-to-buffer credit on the storage system must be recalculated.

Answer: B

8. Which zoning type is supported if B-series switches are connected to third-party switch products?

- A. switch/port level
- B. AL_PA level
- C. mixed
- D. WWN level

Answer: D

9. Which security feature in an M-series environment allows only registered servers or storage systems to connect to the fabric?

- A. fabric binding
- B. switch binding
- C. WWN zoning
- D. VSAN

Answer: B

10. Which ports should you use on a B-series switch to establish two Wavelength Division Multiplexing links to a remote site?

- A. ports which belong to the same "Quad"
- B. ports which belong to different "Quads"
- C. ports on different switches
- D. only 2 Gbps ports

Answer: B

11. What must you use to establish a communication link between two existing fabrics with different PID bit settings?

- A. a router
- B. a bridge
- C. virtual SANs
- D. tunneling

Answer: A

12. What is the most effective way to integrate 2 Gbps switches in existing 1 Gbps switch fabrics with many-to-many access?

- A. Use 2 Gbps as core and 1 Gbps as edge switches.
- B. Use 1 Gbps as core and 2 Gbps as edge switches.
- C. Create separate zones for the 1 Gbps and 2 Gbps switches.
- D. Use trunking to link every two 1 Gbps ports to a 2 Gbps connection.

Answer: A

13. What allows you to check if the configuration of a new switch is compatible with an existing fabric configuration in a B-series fabric?

- A. Network View
- B. Fabric Manager
- C. High Availability Fabric Manager
- D. OpenView SAN Manager

Answer: B

14. Which factor can reduce the performance between devices in a Fibre Channel SAN?

- A. hop count
- B. switch latency
- C. inter-switch link latency
- D. inter-switch link congestion

Answer: D

15. What should be the maximum number of active storage controller ports per inter-switch link in a high throughput computing environment?

- A. 2
- B. 4
- C. 10
- D. 20

Answer: D
