HP Certification III

HP0-276: OpenVMS Version 7.x to 8.2 Migrarion

Practice Exam: HP0-276 Exams

Exam Number/Code: HP0-276

Exam Name: OpenVMS Version 7.x to 8.2 Migrarion

Questions and Answers: 180 Q&As

([Certification III](#))

"OpenVMS Version 7.x to 8.2 Migrarion", also known as HP0-276 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 180 Q&As to your HP0-276 exam preparation. In the HP0-276 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

Exam : [HP0-276](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification III HP0-276 (OpenVMS Version 7.x to 8.2 Migrarion) examination of original title complete coverage. HP0-276 exam questions help you pass the exam.

Just4Study HP0-276 Feature:

* High quality - High quality and valued for the HP0-276 Exam: 100% Guarantee to Pass Your HP0-276 exam and get your Certification III certification.

* Authoritative - Authoritative braindumps with complete details about HP0-276 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification III resources, you will minimize your **HP Certification III** cost and be ready to pass your HP0-276 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification III demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-276 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-276 Demo Download

Just4Study offers free demo for Certification III HP0-276 exam (OpenVMS Version 7.x to 8.2 Migrarion). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **HP Certification III HP0-276** examination of original title complete coverage.HP0-276 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: HP0-276

Exam Name: OpenVMS Version 7.x to 8.2 Migrarion(Certification III)

Questions and Answers: 180 Q&A

[HP HP0-276](#) Test belongs to one of the Certification III certified test, if needs to obtain the Certification III certificate,

you also need to participate in other related test, the details you may visit the [Certification III](#) certified topic, in there, you will see all related Certification III certified subject of examination.

Just4Study professional provide Certification III HP0-276 the newest Q&A, completely covers HP0-276 test original topic. With our complete Certification III resources, you will minimize your Certification III cost and be ready to pass your HP0-276 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-276

Title : OpenVMS Security Administration

1. User PHILBY, UIC [SIS,PHILBY], holds rights identifiers LONDON and CAMBRIDGE and executes the command TYPE *.* in a directory containing the following files. Which file will cause auditing messages to be sent to the security operator consoles?

- A. SOVIET.DAT [SIS,MACLEAN] (RWED,RWED,RE,)
(ALARM=SECURITY,ACCESS=READ+FAILURE)
(IDENTIFIER=OXFORD,ACCESS=READ)
(IDENTIFIER=HARVARD,ACCESS=NONE)
- B. AMERICAN.DAT [CIA,BURGESS](RWED,RWED,,)
(IDENTIFIER=LONDON,ACCESS=NONE)
(IDENTIFIER=CAMBRIDGE,ACCESS=READ)
(AUDIT=SECURITY,ACCESS=READ+SUCCESS)
- C. BRITISH.DAT [CIA,BLUNT] (RWED,RWED,,)
(ALARM=SECURITY,ACCESS=READ+SUCCESS)
(IDENTIFIER=CAMBRIDGE,ACCESS=READ)
(IDENTIFIER=LONDON,ACCESS=NONE)
- D. GERMAN.DAT [SYSTEM] (RWED,RWED,RE,)
(AUDIT=SECURITY,ACCESS=READ+FAILURE)
(IDENTIFIER=OXFORD,ACCESS=NONE)
(DEFAULT_PROTECTION,ACCESS=READ)

Answer: C

2. An organization has several OpenVMS clusters. How can you ensure a single sign-on authentication mechanism with a common password across all clusters?

- A. this is not possible
- B. copy the SYSUAF file from a master cluster to the other clusters once a day
- C. the same password on multiple clusters is permitted when clusters have a "trust" relationship between accounts (eg: proxy accounts)
- D. implement an external authentication mechanism

Answer: D

3. Which two mechanisms allow authentication of network access to a system without explicit login? Select two.

- A. SSH
- B. LDAP
- C. proxy account
- D. active directory
- E. Advanced Server

Answer: AC

4. Click the Exhibit button.

Which user is logged in via SSH?

- A. Q
- B. BOND
- C. SYSTEM
- D. M

Answer: A

5. Which two objects are accessible to processes with specific authorized privileges enabled? Select two.

- A. queues are read/write accessible to processes with OPER privilege
- B. VMSMAIL and Internet mail are read/write accessible to users with NETMBX privilege
- C. the user authorization file is read/write accessible to processes with WORLD privilege
- D. system logical name tables are read/write accessible to processes with SYSNAM privilege
- E. page and swap file contents are read/write accessible to processes with PSWAPM privilege

Answer: AD

6. A system manager wants to ensure that non-privileged users can only access those files for which they already know the file name. How can files in a directory be protected so this is accomplished?

- A. set directory protection to execute, and file access as required
- B. set directory protection to control, and file access as required
- C. set directory protection to no access, and file access as required
- D. it is not possible to do this

Answer: A

7. What is the purpose of "high water marking"?

- A. limit the use of XFC (eXtended File Cache) buffers
- B. prevent a process from exhausting its FILLM quota
- C. prevent an application from writing file data beyond the disk quota limit
- D. prevent reading file data beyond the point in a file which has been written

Answer: D

8. What is the maximum length of an OpenVMS username in the default configuration?

- A. 12 characters
- B. 16 characters
- C. 20 characters
- D. 24 characters

Answer: A

9. What is the purpose of "erase on delete"?

- A. ensure that disk blocks are removed from the user's disk quota
- B. ensure that disk blocks are written regularly to avoid subsequent bad block errors
- C. overwrite file data to flush original disk blocks from XFC (eXtended File Cache) memory
- D. overwrite file data in every block to prevent subsequent 'scavenging' of reallocated disk blocks

Answer: D

10. What are three OpenVMS protected object classes? Select three.

- A. user
- B. XFC cache
- C. global section
- D. event flag cluster
- E. logical name table

Answer: CDE

11. What is the default protection mask set by the system parameter RMS_FILEPROT value=64000 (decimal)?

- A. (S:RWED,O:RWED,G:RE,W:)
- B. (S:RWE,O:RWE,G:RE,W:RE)
- C. (S:RWED,O:RWED,G:RE,W:RE)
- D. (S:RWE,O:RWE,G:RE,W:RE)

Answer: A

12. A backup system disk copy is missing. What are two of the vulnerabilities that are introduced? Select two.

- A. protected system files and data can be read
- B. licenses can be extracted from LMF\$LURT.DAT
- C. usernames and their associated privileges can be listed
- D. passwords can be directly extracted from SYSUAF.DAT
- E. passwords can be directly extracted from VMS\$PASSWORD_HISTORY.DATA

Answer: AC

13. What are five valid characters in OpenVMS passwords within the default configuration? Select five.

- A. letters A-Z (case insensitive)
- B. multinational (accented) letters
- C. digits 0-9
- D. dot (.)
- E. space ()
- F. dollar \$
- G. underscore (_)

Answer: ACEFG

14. What are two elements of CLUSTER_AUTHORIZE.DAT? Select two.

- A. cluster number
- B. cluster incarnation time
- C. cluster password
- D. cluster account passwords
- E. cluster authorized interconnects

Answer: AC

15. When writing secure command procedures, why should READ/PROMPT be used instead of INQUIRE?

- A. because INQUIRE only works with captive accounts
- B. because INQUIRE echoes user input back to the terminal by default
- C. because READ/PROMPT does not perform symbol substitution on the user input
- D. because READ/PROMPT creates an audit trail record in SECURITY.AUDIT\$JOURNAL

Answer: C

16. Which two options are valid access modes (e.g. in AUTHORIZE)? Select two.

- A. BATCH
- B. DETACHED
- C. NETWORK
- D. PRIVILEGED
- E. SUPERVISOR

Answer: AC

17. Which three are valid components of an object's security profile? Select three.

- A. object owner
- B. access control list
- C. process quotas

- D. alarm journal entry
- E. object protection mask

Answer: ABE

18. Which feature of OpenVMS allows verification of the integrity and authenticity of product installation kits?

- A. sFTP
- B. DCE Remote Procedure Call
- C. Kerberos with Secure Delivery
- D. PCSI with Secure Delivery based on CDSA

Answer: D

19. Policy requires that a particularly sensitive application is available only when two specific users are present. What is the relevant OpenVMS security mechanism?

- A. an application-specific captive account with primary and secondary passwords
- B. two non-privileged accounts with synchronized passwords
- C. two-factor authentication
- D. ACL access to the application

Answer: A

20. What two benefits can account quotas provide on an OpenVMS system? Select two.

- A. user and group (departmental) chargeback capabilities
- B. allows interactive users to run faster than batch jobs
- C. allow different behaviors for multiple applications at the same time
- D. minimize the impact of users or applications on other users
- E. maximize throughput of specially-designed applications on OpenVMS systems

Answer: CD
