HP0-429: Installing&Supporting Standerd HP SAN Environments

Practice Exam: HP0-429 Exams

Exam Number/Code: HP0-429

Exam Name: Installing&Supporting Standerd HP SAN Environments

Questions and Answers: 61 Q&As

([Certification III](#))

"Installing&Supporting Standerd HP SAN Environments", also known as HP0-429 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 61 Q&As to your HP0-429 exam preparation. In the HP0-429 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

Exam : [HP0-429](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification III HP0-429 (Installing&Supporting Standerd HP SAN Environments) examination of original title complete coverage. HP0-429 exam questions help you pass the exam.

Just4Study HP0-429 Feature:

* High quality - High quality and valued for the HP0-429 Exam: 100% Guarantee to Pass Your HP0-429 exam and get your Certification III certification.

* Authoritative - Authoritative braindumps with complete details about HP0-429 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification III resources, you will minimize your **HP Certification III** cost and be ready to pass your HP0-429 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification III demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-429 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-429 Demo Download

Just4Study offers free demo for Certification III HP0-429 exam (Installing&Supporting Standerd HP SAN Environments). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **HP Certification III HP0-429** examination of original title complete coverage.HP0-429 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: HP0-429

Exam Name: Installing&Supporting Standerd HP SAN Environments(Certification III)

Questions and Answers: 61 Q&A

[HP HP0-429](#) Test belongs to one of the Certification III certified test, if needs to obtain the Certification III certificate, you also need to participate in other related test, the details you may visit the [Certification III](#) certified topic, in there, you will see all related Certification III certified subject of examination.

Just4Study professional provide Certification III HP0-429 the newest Q&A, completely covers HP0-429 test original topic. With our complete Certification III resources, you will minimize your Certification III cost and be ready to pass your HP0-429 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-429

Title : Installing & Supporting Standard HP SAN Environments

1. You are adding a new switch to an existing environment. How can you avoid fabric segmentation?

- A. Assign unique domain IDs to the switches.
- B. Register all domain IDs in the fabric name service.
- C. Set up trusts between switches with different domain IDs.
- D. Assign the same domain IDs to all switches connected by ISLs.

Answer: A

2. While executing several switchShow commands on a B-Series switch, you notice that Port 0 remains a G_Port.

What is a possible reason?

- A. faulty port connected
- B. faulty NL_Port connected
- C. functional N_Port connected
- D. functional E_Port connected

Answer: A

3. Which M-series feature key is required to implement fabric binding and switch binding?

- A. SANtegrity
- B. Open Trunking
- C. FICON management server
- D. open systems management server

Answer: A

4. In the port error statistics of a Fibre Channel switch port where an HBA is connected, you discover a high ENC_IN (encoding error in frame) count. What are possible causes? (Select three.)

- A. HBA
- B. cable
- C. switch
- D. HBA receiver
- E. switch receiver
- F. HBA transmitter
- G. switch transmitter

Answer: BEF

5. What can cause a changed hardware path to a connected disk after a switch replacement in an HP-UX environment with multiple B-Series switches? (Select two.)

- A. Zoning on the new switch is not configured correctly.

- B. Simple Name Service is not copied to the new switch.
- C. Core switch PID format parameter differs from the old one.
- D. New switch has a domain ID which differs from the old one.
- E. Disk (storage controller port) is connected to a different switch port.

Answer: DE

6. What is the best method to consolidate C-Series SAN islands into a common infrastructure without compromising availability, manageability and network security?

- A. Zone the SAN.
- B. Configure LSANs.
- C. Implement VSANs.
- D. Link islands with multi-protocol router.

Answer: C

7. An M-series switch is reset to factory default and Open Trunking becomes inoperable. How do you solve the problem?

- A. Reboot the switch.
- B. Power cycle the switch.
- C. Reinstall the feature keys.
- D. Disconnect and reconnect the switch.

Answer: C

8. You add a switch to a B-series fabric. Its IP address is unknown, so you must use the serial port. Which port attributes must be configured in the terminal emulation in addition to 8 bit, no parity, 1 stop bit?

- A. 9600baud, no flow control
- B. 19200baud, no flow control
- C. 9600baud, hardware flow control
- D. 19200baud, hardware flow control

Answer: A

9. Where do you find information about all working devices connected to the fabric?

- A. Name Server available from every switch
- B. Node List available on the principal switch
- C. Distributed Node Server List available on every switch
- D. configuration documentation available at the customer site

Answer: A

10. What is the maximum number of addressable ports per B-series switch running in Native Address mode?

- A. 8
- B. 16
- C. 32
- D. 64

Answer: B

11. You are replacing the active control processor card, CTP2, of an M-series Director switch. Which action is required before removing the CTP?

- A. Shut down CTP2.
- B. Make CTP2 passive.
- C. Power off the switch.
- D. Shut down the switch.

Answer: B

12. To solve a customer problem, a remote login to a recently installed High Availability Fabric Manager appliance is

required. The customer does not know the username and password. Which factory default login should be used?

- A. admin / password
- B. Administrator / password
- C. administrator / Password
- D. Administrator / Administrator

Answer: B

13. An HAFM (High Availability Fabric Manager) appliance must be shut down for maintenance reasons. Which operations are not interrupted?

- A. logging events
- B. switch monitoring
- C. Fibre Channel traffic
- D. configuration changes

Answer: C

14. Which HP tool is recommended to manage an M-series fabric consisting of Director and Edge switches?

- A. Web Tools
- B. Fabric Manager
- C. Embedded Web Server
- D. High Availability Fabric Manager

Answer: D

15. Which security mechanism describes hard zoning?

- A. login authentication
- B. access authorization
- C. network authentication
- D. discovery authorization

Answer: B
