HP0-461: Supporting the Enterprise Virtual Array (EVA) Storage Family

Practice Exam: HP0-461 Exams

Exam Number/Code: HP0-461

Exam Name: Supporting the Enterprise Virtual Array (EVA) Storage Family

Questions and Answers: 62 Q&As

([Certification II](#))

"Supporting the Enterprise Virtual Array (EVA) Storage Family ", also known as HP0-461 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 62 Q&As to your HP0-461 exam preparation. In the HP0-461 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

Exam : [HP0-461](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification II HP0-461 (Supporting the Enterprise Virtual Array (EVA) Storage Family) examination of original title complete coverage. HP0-461 exam questions help you pass the exam.

Just4Study HP0-461 Feature:

* High quality - High quality and valued for the HP0-461 Exam: 100% Guarantee to Pass Your HP0-461 exam and get your Certification II certification.

* Authoritative - Authoritative braindumps with complete details about HP0-461 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification II resources, you will minimize your **HP Certification II** cost and be ready to pass your HP0-461 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification II demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-461 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-461 Demo Download

Just4Study offers free demo for Certification II HP0-461 exam (Supporting the Enterprise Virtual Array (EVA) Storage Family). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **HP Certification II HP0-461** examination of original title complete coverage.HP0-461 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: HP0-461

Exam Name: Supporting the Enterprise Virtual Array (EVA) Storage Family (Certification II)

Questions and Answers: 62 Q&A

[HP HP0-461](#) Test belongs to one of the Certification II certified test, if needs to obtain the Certification II certificate, you also need to participate in other related test, the details you may visit the [Certification II](#) certified topic, in there, you will see all related Certification II certified subject of examination.

Just4Study professional provide Certification II HP0-461 the newest Q&A, completely covers HP0-461 test original topic. With our complete Certification II resources, you will minimize your Certification II cost and be ready to pass your HP0-461 tests on Your First Try, 100% Money Back Guarantee included!

Exam : HP HP0-461

Title : Supporting the Enterprise Virtual Array (EVA) Storage Family

1. Which restriction applies to a "snapclone replica resync"?

- A. The target is presented.
- B. The two vdisks differ in size.
- C. The two vdisks had no previous snapclone relationship.
- D. The two vdisks participate in sharing relationships.

Answer: C

2. Which Storage System Scripting Utility command interrogates the array and creates a script that can be used later to re-create the system?

- A. monitor config "filename"
- B. sssuconfig cell "filename"
- C. save configuration "filename"
- D. capture configuration "filename"

Answer: D

3. Which replication method is compliant with both the Fast Recovery Solution and Volume Shadow Services?

- A. preallocated snapshot
- B. virtually instantaneous snapclone
- C. space efficient snapshot
- D. three-phase snapclone

Answer: D

4. What does the Storage System Scripting Utility allow?

- A. fault reporting to a remote connection
- B. the issuing of commands to manage the EVA
- C. use of scripts compiled for HSGxx controllers
- D. communication between Storage Management Appliance and HSV110 controllers

Answer: B

5. Which management interface is available for the model 352 Fibre Channel loop switch?

- A. telnet using a serial line (RS232)
- B. hyperterminal using the device loops
- C. GUI using a web browser
- D. menu buttons using the Operator Control Panel

Answer: C

6. When is the appropriate time to create the container for a three-phase snapclone?

- A. immediately before its actual use
- B. well before its actual use
- C. immediately before the cache is flushed
- D. between the cache mode swap and the "flick-of-the-switch" commitment

Answer: B

7. Within the Command View EVA host wizard, what does the WWNs pulldown display?

- A. assigned host WWNs seen by the array
- B. unassigned host WWNs seen by the array
- C. assigned host WWNs seen by the Storage Management Server
- D. unassigned host WWNs seen by the Storage Management Server

Answer: B

8. The size of the backend loop switch event log is limited to 3000 events. What happens after the maximum is reached?

- A. Event logging stops.
- B. The oldest events are overwritten.
- C. A new log file is created.
- D. The event log is automatically cleared.

Answer: B

9. Which cache mode is used during the three-phase snapclone process just before the "flick-of-the-switch" commitment is issued?

- A. write-back
- B. write-through
- C. write-behind
- D. read-ahead

Answer: B

10. By default, newly added physical disk drives in an EVA storage system are automatically added to a ____.

- A. host folder
- B. pool of virtual disks
- C. secondary disk group
- D. pool of ungrouped disks

Answer: D
