HP Certification II

HP0-634: NNM III(7.x) Advanced

Practice Exam: HP0-634 Exams

Exam Number/Code: HP0-634

Exam Name: NNM III(7.x) Advanced

Questions and Answers: 130 Q&As

([Certification II](#))

"NNM III(7.x) Advanced", also known as HP0-634 exam, is a HP certification.

Exam : [HP0-634](#)

With the complete collection of exam questions, Just4Study has assembled to take you through 130 Q&As to your HP0-634 exam preparation. In the HP0-634 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification II HP0-634 (NNM III(7.x) Advanced) examination of original title complete coverage. HP0-634 exam questions help you pass the exam.

Just4Study HP0-634 Feature:

* High quality - High quality and valued for the HP0-634 Exam: 100% Guarantee to Pass Your HP0-634 exam and get your Certification II certification.

* Authoritative - Authoritative braindumps with complete details about HP0-634 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification II resources, you will minimize your **HP Certification II** cost and be ready to pass your HP0-634 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification II demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-634 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-634 Demo Download

Just4Study offers free demo for Certification II HP0-634 exam (NNM III(7.x) Advanced). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification II HP0-634** examination of original title complete coverage. HP0-634 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-634

Exam Name: NNM III(7.x) Advanced(Certification II)

Questions and Answers: 130 Q&A

[HP HP0-634](#) Test belongs to one of the Certification II certified test, if needs to obtain the Certification II certificate,

you also need to participate in other related test, the details you may visit the [Certification II](#) certified topic, in there, you will see all related Certification II certified subject of examination.

Just4Study professional provide Certification II HP0-634 the newest Q&A, completely covers HP0-634 test original topic. With our complete Certification II resources, you will minimize your Certification II cost and be ready to pass your HP0-634 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

reconfigure their ET Zone Configuration.

- A. to create or change a map filter
- B. to load new MIBs for your devices
- C. to activate SNMP Agents on managed nodes
- D. to manage existing nodes that were previously unmanaged

Answer: D

7. What Information is leveraged from NNM to Extended Topology for discovery purposes? Select TWO.

- A. NNM IP address and hostname configuration
- B. PD Probe configuration information
- C. NNM SNMP community string information
- D. NNM Filter configuration
- E. NNM map configuration

Answer: AC

8. Why would you rerun setupExtTopo.ovpl? Select TWO.

- A. to configure Extended Topology discovery to run every 6 hours
- B. to disable certain protocols for Extended Topology
- C. to enable certain protocols for Extended Topology
- D. to add new nodes to each Zone Configuration for Extended Topology
- E. to change SNMP Configuration for Extended Topology

Answer: BC

9. Which files have to be created to configure an Overlapping IP Address Domain configuration? Select TWO.

- A. oad.seed
- B. private_ip.conf
- C. dupip.seed
- D. ovdupip
- E. dupip.conf

Answer: CE

10. What is the purpose of the ovet_bridge process?

- A. to poll bridges and hubs
- B. to create seed files for ET Discovery
- C. to maintain the ET topology database
- D. to poll all nodes for connectivity information

Answer: B

11. The status of devices in Overlapping Address Domains are monitored by _____

- A. netmon
- B. ovet_poll
- C. ovet_oad
- D. ovet_disco
- E. ovtopmd

Answer: B

12. How can you configure syslog message patterns in an NNM standalone configuration?

- A. Create pattern configurations with setupSyslog.ovpl -config and deploy with ovsyslogcfg -deploy.
- B. Use NNM event configuration GUI to create syslog message pattern.
- C. Use OVO Management Console for configuration and deployment of syslog message pattern.
- D. Create pattern configurations with ovsyslogcfg and deploy with setupSyslog.ovpl -deploy.

Answer: D

13. How would you determine how long an interface has been in the critical status in Neighbor Views?

- A. Select the interface and then select the menu Fault -> Alarms.
- B. Right-click on the node and select Status.
- C. Right-click on the interface and select Status Poll.
- D. Place the cursor over the interface.

Answer: D

14. What type of statistical information is available in the Polling/Analysis summary tab in NNM Home Base? Select TWO.

- A. nodes polled using SNMP
- B. nodes polled using ICMP
- C. interfaces polled using SNMP
- D. addresses polled using ICMP

Answer: CD

15. What is the best description of NNM Extended Topology recurring discovery?

- A. Recurring discovery updates discovered information between two discovery cycles.
- B. Recurring discovery updates data about the network continuously.
- C. Recurring discovery captures data about the network as it exists during a discovery cycle regardless of previously discovered information.
- D. Recurring discovery captures data about the network regarding previously discovered information.

Answer: C

16. How do you display long label names for devices on a map?

- A. In a Dynamic View, select View -> Labels -> Long Name.
- B. In ow, select View -> Labels -> Long Name.
- C. Use the -u option for the ipmap process.
- D. In a Dynamic View, right-click the device symbol and select Details.

Answer: A

17. The default popup menu on a selected node in the Dynamic Views allows you to _____. Select TWO.

- A. telnet to the node
- B. change the status of the node
- C. start a SSH session to the node
- D. perform trace route to the node
- E. view the alarms for that node

Select TWO.

Answer: AD
