HP Certification II

HP0-656: DATA PROTECTOR 5.5 BASICS FOR UNIX

Practice Exam: HP0-656 Exams

Exam Number/Code: HP0-656

Exam Name: DATA PROTECTOR 5.5 BASICS FOR UNIX

Questions and Answers: 136 Q&As

([Certification II](#))

Exam : [HP0-656](#)

"DATA PROTECTOR 5.5 BASICS FOR UNIX", also known as HP0-656 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 136 Q&As to your HP0-656 exam preparation. In the HP0-656 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification II HP0-656 (DATA PROTECTOR 5.5 BASICS FOR UNIX) examination of original title complete coverage. HP0-656 exam questions help you pass the exam.

Just4Study HP0-656 Feature:

* High quality - High quality and valued for the HP0-656 Exam: 100% Guarantee to Pass Your HP0-656 exam and get your Certification II certification.

* Authoritative - Authoritative braindumps with complete details about HP0-656 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification II resources, you will minimize your **HP Certification II** cost and be ready to pass your HP0-656 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification II demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-656 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-656 Demo Download

Just4Study offers free demo for Certification II HP0-656 exam (DATA PROTECTOR 5.5 BASICS FOR UNIX). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification II HP0-656** examination of original title complete coverage. HP0-656 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-656

Exam Name: DATA PROTECTOR 5.5 BASICS FOR UNIX(Certification II)

Questions and Answers: 136 Q&A

[HP HP0-656](#) Test belongs to one of the Certification II certified test, if needs to obtain the Certification II certificate, you also need to participate in other related test, the details you may visit the [Certification II](#) certified topic, in there, you will see all related Certification II certified subject of examination.

Just4Study professional provide Certification II HP0-656 the newest Q&A, completely covers HP0-656 test original topic. With our complete Certification II resources, you will minimize your Certification II cost and be ready to pass your HP0-656 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-656

Title : Data Protector 5.5 Basics for Windows

1. Which inode time is used to detect files for incremental backups?

- A. access time
- B. creation time
- C. modification time
- D. defragmentation time

Answer: C

2. To view a finished session that is no longer displayed in the Data Protector "Monitor" context, you must view the session in which context?

- A. View
- B. Internal Database
- C. Reporting
- D. Devices and Media

Answer: B

3. Which file system action is required before you perform a raw disk backup?

- A. verify
- B. check
- C. mount
- D. unmount

Answer: D

4. How can you prevent multiple hosts from simultaneously attempting to utilize a device in one Data Protector cell?

- A. logical lock
- B. device lock
- C. lock names
- D. physical lock

Answer: C

5. Which process or service runs on the Data Protector cell manager and starts backup and restore sessions?

- A. Data Protector Inet
- B. Cell Request Server (CRS)
- C. Raima Database Server (RDS)
- D. Media Management Process (MMD)

Answer: B

6. When using the Restore from Media option, which configuration guideline should you consider regarding the required memory?

- A. number_of_files multiplied by 100 bytes
- B. number_of_files multiplied by 200 bytes
- C. number_of_directories multiplied by 100 bytes
- D. number_of_directories multiplied by 200 bytes

Answer: B

7. Where are file system and host backup specifications stored?

- A. /opt/omni/datalists
- B. /opt/omni/backuplists
- C. /etc/opt/omni/datalists
- D. /etc/opt/omni/barlists

Answer: C

8. When performing a manual configuration using the command line, you can create a new logical device by defining it in a temporary file in the devices directory. How is the Media Management database updated with this information?

- A. automatically when the device schedule is invoked
- B. with the omnidownload command
- C. with the omniupload command
- D. with the omniupdate command

Answer: C

9. What happens if the backup chain is broken and you start a restore?

- A. The restore aborts.
- B. A warning message displays.
- C. Only the full backup is restored.
- D. It is not possible to browse the restore GUI.

Answer: B

10. How many disk agents are started if you perform a parallel restore?

- A. one for each disk
- B. one for each tape
- C. one for each client
- D. one for each object

Answer: D

11. What is the advantage of a Data Protector session restore?

- A. The database will not be used.
- B. It is fast since it is restoring only whole volumes.
- C. All objects from a backup can be restored together.
- D. It does not require any control as it is restoring everything.

Answer: C

12. When defining a logical tape library device, the access to a library is split into two paths. What are the paths?

Select TWO.

- A. data path
- B. SCSI path
- C. control path
- D. network path

Answer: AC

13. It is useful in dynamic environments to perform a backup that uses which object type?

- A. file system object
- B. client object
- C. disk object
- D. database object

Answer: B

14. What is the full path to the Data Protector Web reporting Java applet on a UNIX Client?

- A. /opt/omni/java/sbin/WbReporting.html
- B. /etc/opt/omni/java/sbin/WebReporting.html
- C. /opt/omni/java/bin/WebReporting.html
- D. /opt/omni/bin/java/WebReporting.htm

Answer: C

15. A tape library with two drives is connected to two hosts (host A and host B) using SCSI. Each host is accessing one drive through a dedicated SCSI connection. Host B also has access to the robotics interface. Which statement is true in this configuration?

- A. This configuration is not possible in a SCSI environment because all hosts need physical access to the robotics controller.
- B. Host A will need the media agent to control the robotics and perform all library operations for the local drive.
- C. Host B will need the media agent to control the robotics and perform all library operations.
- D. Both hosts A and B will require a "direct library" configuration to allow shared network control of the robotics.

Answer: C

16. How is a disk image restore performed?

- A. file-by-file
- B. object-by-object
- C. block-by-block
- D. directory-by-directory

Answer: C

17. The file demo.txt in the directory tree /usr/demo was created on January 4, 2003. It was modified on January 10, 2003. A full backup took place on January 5, 2003, followed by incrementals on January 6, 7 and 8.

When using the "restore version" option within the GUI, how many versions will be displayed?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: A

18. To verify the logical device configuration using the GUI; load a tape into the drive, then right-click on the created drive to display the pop-up menu. From this menu, which option do you select to verify the device operations?

- A. eject medium
- B. scan medium
- C. check media state
- D. verify tape
- E. confirm mount request

Answer: B

19. What could cause an export of a tape within a library to fail?

- A. if all drives are busy
- B. if the mailslot is full
- C. if the robotics is busy
- D. if the media is protected

Answer: D

20. The object option "Display Statistics" is turned on in the GUI while configuring and running a backup. What does it show in addition to standard messaging?

- A. kilobytes per second for each object
- B. object detail retained for a specific date
- C. three levels of detail on files and directories
- D. the number of files handled during a backup session

Answer: A
