HP Certification II

HP0-661: NonStop Systems and Technologies

Practice Exam: HP0-661 Exams

Exam Number/Code: HP0-661

Exam Name: NonStop Systems and Technologies

Questions and Answers: 120 Q&As

([Certification II](#))

"NonStop Systems and Technologies", also known as HP0-661 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 120 Q&As to your HP0-661 exam preparation. In the HP0-661 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

Exam : [HP0-661](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification II HP0-661 (NonStop Systems and Technologies) examination of original title complete coverage. HP0-661 exam questions help you pass the exam.

Just4Study HP0-661 Feature:

* High quality - High quality and valued for the HP0-661 Exam: 100% Guarantee to Pass Your HP0-661 exam and get your Certification II certification.

* Authoritative - Authoritative braindumps with complete details about HP0-661 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification II resources, you will minimize your **HP Certification II** cost and be ready to pass your HP0-661 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification II demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-661 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-661 Demo Download

Just4Study offers free demo for Certification II HP0-661 exam (NonStop Systems and Technologies). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification II HP0-661** examination of original title complete coverage. HP0-661 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-661

Exam Name: NonStop Systems and Technologies(Certification II)

Questions and Answers: 120 Q&A

[HP HP0-661](#) Test belongs to one of the Certification II certified test, if needs to obtain the Certification II certificate,

you also need to participate in other related test, the details you may visit the [Certification II](#) certified topic, in there, you will see all related Certification II certified subject of examination.

Just4Study professional provide Certification II HP0-661 the newest Q&A, completely covers HP0-661 test original topic. With our complete Certification II resources, you will minimize your Certification II cost and be ready to pass your HP0-661 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-661

Title : NonStop Systems and Technologies

1. Which component does NOT contain at least one ServerNet Addressable Controller?

- A. IOMF CRU
- B. SWAN concentrator
- C. E4SA
- D. PMF CRU

Answer: B

2. Two processors within a single enclosure connect to each other through which component?

- A. SEBs
- B. PMCU
- C. backplane
- D. IOMFs

Answer: C

3. ServerNet routing tables are generated based on the _____? Select TWO.

- A. SCF configured settings in the \$ZZKRN subsystem
- B. settings in the group ID switches
- C. number of routers between nodes
- D. manner in which the SEB cables are routed
- E. ServerNet topology configuration setting for the group

Answer: BE

4. What are advantages of a message-based operating system architecture? Select TWO.

- A. It supports system and peripheral expansion to match business growth.
- B. All messages are shared between processes using shared-memory buffers.
- C. Programmers can select different memory buffer sizes based on message priority.
- D. Applications do not need to be modified when adding new hardware or processes since the operating system translates device and process names into their physical locations.
- E. Additional networking software is not needed to extend the capability of the message-based operating system to a network of NonStop systems.

Answer: AD

5. Which term identifies a collection of routers and ServerNet links?

- A. adapter
- B. fabric
- C. SAC
- D. LIF

Answer: B

6. Which advantage does the NonStop S-series RISC processor provide over CISC processors in earlier systems?

- A. customized, special purpose instructions
- B. numerous addressing modes
- C. optimized instruction pipelines
- D. multicycle machine instructions

Answer: C

7. Which software is required to implement RDF?

- A. TCP/IP
- B. NonStop TMF
- C. NonStop TS/MP
- D. RSC

Answer: B

8. Which statement best describes disk cache blocks?

- A. Entry sequenced index blocks are always kept in cache.
- B. Different disk cache block sizes exist to assist in performance tuning.
- C. Different file types require different disk cache block sizes.
- D. Changes to disk cache block values take effect after the next system cold load.

Answer: B

9. What is the primary function of the Expand subsystem?

- A. transfers data between geographically dispersed NonStop systems
- B. allows a single node to grow beyond 16 processors
- C. connects multiple NonStop systems together to form one network
- D. connects NonStop systems to systems manufactured by other vendors

Answer: C

10. TSM workstations can be connected to either a public LAN or a dedicated TSM LAN. Which functions are available to TSM when installed for use on the Public LAN? Select TWO.

- A. low level link
- B. service application
- C. EMS event viewer
- D. system start
- E. notification director

Answer: BC

11. Which peripherals can you connect to a NonStop S-series server via AWAN?

- A. ATM devices
- B. standard serial printers
- C. tape drives
- D. X.25 connected devices

Answer: B

12. A service processor _____. Select TWO.

- A. has interfaces to both the ServerNet hardware and the serial maintenance bus (SMB)
- B. runs its own independent operating system
- C. connects directly to system fans
- D. routes Guardian interprocess communications
- E. manages communications only to the processor within its enclosure

Answer: AB

13. Group numbers are important because they _____.
- A. correspond to the processor numbers housed within the group
 - B. identify the system enclosure in which a system component is located
 - C. provide the ability to easily switch disk drives from group to group
 - D. determine the order in which I/O enclosures are added to the system

Answer: B

14. Why does disk I/O throughput improve as systems are expanded?
- A. Disk process checkpointing is reduced.
 - B. More logical volumes are available for use.
 - C. Larger NonStop TMF audit trails are possible.
 - D. The newly added disks are faster.

Answer: B

15. A business transaction consists of _____.
- A. all steps necessary to transform a database from one consistent state to another
 - B. all steps necessary to transform a data file from one consistent state to another
 - C. all steps necessary to transform a local database from one consistent state to another
 - D. an individual record update on a local or remote data file

Answer: A

16. What is a mandatory requirement for installing a single-enclosure NonStop S74000 server?
- A. raised floor
 - B. ventilated room
 - C. air conditioning
 - D. 240V power

Answer: B

17. A ServerNet buffer board is a part of _____.
- A. an IOMF CRU
 - B. a PMF CRU
 - C. a SWAN concentrator
 - D. a PMCU

Answer: A

18. In accessing a local process, users and user programs need only provide the name of the process. Why?
- A. The file system translates the process name to a physical location using internal tables.
 - B. All processes on the system keep tables that contain the names of all other processes on the system.
 - C. A process in a processor can only communicate with other processes in the same processor.
 - D. Processes do not communicate by name as they need to know the location of the process they are trying to access.

Answer: A

19. An enterprise management tool is typically used to operate and manage _____.
- A. computer systems from different vendors
 - B. similar computer systems spread throughout a large enterprise
 - C. distributed database systems on large networks
 - D. multiple databases on a single system

Answer: A

20. Power to the NonStop S-series enclosures is set to the proper voltage by _____.

- A. configuring the power switch on the PMCU
- B. auto-ranging circuitry within the power supply
- C. ordering the proper part number for the voltage required
- D. ordering the power adapter appropriate to the voltage supplied

Answer: B
