HP Certification II

HP0-698: Supporting the HP ProLiant Storage Server Product Family

Practice Exam: HP0-698 Exams

Exam Number/Code: HP0-698

Exam Name: Supporting the HP ProLiant Storage Server Product Family

Questions and Answers: 60 Q&As

([Certification II](#))

"Supporting the HP ProLiant Storage Server Product Family", also known as HP0-698 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 60 Q&As to your HP0-698 exam preparation. In the HP0-698 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

Exam : [HP0-698](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification II HP0-698 (Supporting the HP ProLiant Storage Server Product Family) examination of original title complete coverage. HP0-698 exam questions help you pass the exam.

Just4Study HP0-698 Feature:

* High quality - High quality and valued for the HP0-698 Exam: 100% Guarantee to Pass Your HP0-698 exam and get your Certification II certification.

* Authoritative - Authoritative braindumps with complete details about HP0-698 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification II resources, you will minimize your **HP Certification II** cost and be ready to pass your HP0-698 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification II demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-698 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-698 Demo Download

Just4Study offers free demo for Certification II HP0-698 exam (Supporting the HP ProLiant Storage Server Product Family). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification II HP0-698** examination of original title complete coverage. HP0-698 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-698

Exam Name: Supporting the HP ProLiant Storage Server Product Family(Certification II)

Questions and Answers: 60 Q&A

[HP HP0-698](#) Test belongs to one of the Certification II certified test, if needs to obtain the Certification II certificate, you also need to participate in other related test, the details you may visit the [Certification II](#) certified topic, in there, you will see all related Certification II certified subject of examination.

Just4Study professional provide Certification II HP0-698 the newest Q&A, completely covers HP0-698 test original topic. With our complete Certification II resources, you will minimize your Certification II cost and be ready to pass your HP0-698 tests on Your First Try, 100% Money Back Guarantee included!

Exam : HP HP0-698

Title : Supporting the HP ProLiant Storage Server Product Family

1. What does Volume Shadow Copy provide?.

- A. backup to disks
- B. LUN duplication
- C. point in time copies
- D. data replication to a remote site

Answer: C

2. If an NC7771 NIC is teamed with the embedded NC7761 NIC in an HP ProLiant ML370 G4 Storage Server, jumbo frames do NOT function. Why?

- A. The function is not implemented on the NC7771 NIC.
- B. The function is disabled on the NC7771 NIC by default.
- C. NIC teaming always disables the function on the associated NICs.
- D. Teaming with the NC7761 NIC disables the function on the NC7771 NIC.

Answer: D

3. Which slot type should be used for an SA6400 array controller?

- A. 3.3 V PCI or PCI-X slot
- B. 3.3 V PCI express slot
- C. second slot of the first PCI bus
- D. first slot of the tertiary bus

Answer: A

4. What must be done after replacing a CMOS battery on an ML370?

- A. Wait 4 hours to charge the battery.
- B. Reconfigure the system ROM.
- C. Flush the cache to disk.
- D. Delete the cache before connecting storage.

Answer: B

5. You logged in to Remote Desktop twice, finished, and closed the browser window using the "close window button" (x). You cannot access Remote Desktop. Why?

- A. Administrator account is already in use. Try later.
- B. Login process is terminated. Process must be restarted.
- C. Connection is blocked. Target system must be disconnected.
- D. Sessions were improperly exited. Processes must be terminated.

Answer: D

6. In which security environments can HP ProLiant Storage Servers be deployed? Select THREE.

- A. Active Directory Domain
- B. Unix Directory Service
- C. Windows NT Domain
- D. RADIUS Domain
- E. Workgroup
- F. Network Information Services Plus

Answer: ACE

7. A customer complains that a new ProLiant ML350 storage server was deployed without a monitor, keyboard, and mouse. Which answer is correct?

- A. Storage servers are exclusively designed for remote management and are not equipped with monitor, keyboard, and mouse connectors.
- B. A monitor, keyboard, and a mouse are essential for storage server management and are components of the standard equipment.
- C. Storage servers are designed for local or remote management, but can be deployed without a monitor, keyboard, and mouse.
- D. A monitor, keyboard, and a mouse are essential for storage server management, but must be ordered separately.

Answer: C

8. What should you do before replacing any disk drive in an array?

- A. Remove the associated spare disk.
- B. Format the disk before you remove it.
- C. Document array and partition information.
- D. Disable access to the associated logical drives.

Answer: C

9. Which standard HP ProLiant Storage Server models do NOT have the data volumes preconfigured at the factory or by the Quick Restore DVD?

- A. all 1x0 models
- B. all 3x0 and 5xx models
- C. all DL models
- D. all ML models

Answer: B

10. The domain controller configuration functions are missing on an HP ProLiant Storage Server and the customer complains about the incomplete operating system installation. How can the problem be solved?

- A. HP ProLiant Storage Servers provide simultaneous support for multiple domains, but cannot be domain members. An additional server is required.
- B. Domain controller functionality is excluded from HP ProLiant Storage Server software by default. Installation of the DC feature pack is required.
- C. Domain controller functionality is disabled on single HP ProLiant Storage Servers. A cluster configuration is required.
- D. The Windows Storage Server operating system does not support domain controller functionality. An additional server is required.

Answer: D

11. HP ProLiant Storage Server "multiprotocol support" means the support of _____.

- A. IP on 10Mb, 100Mb and 1Gb Ethernet
- B. NFS, FTP, SMB, etc. for client access
- C. SCSI, FC, FTP etc. for storage access
- D. WebUI, iLO and command line interfaces

Answer: B

12. An online spare CANNOT be assigned to which RAID level?

- A. 0
- B. 1
- C. ADG
- D. 5

Answer: A

13. Which protocol is used for network file and print level access in a Microsoft environment?

- A. Network File System
- B. Server Message Block
- C. Sequenced Packet Exchange
- D. Network Transfer File System

Answer: B

14. The operating system of an HP ProLiant Storage Server is corrupted and cannot be booted. What is the recommended method to start the system recovery?

- A. Boot the server from the latest full backup tape.
- B. Reinstall the operating system from the MS WSS DVD set.
- C. Recover the factory default image using the Quick Restore DVD.
- D. Replace the system board and then try to reboot the server.

Answer: C

15. What does network interface controller (NIC) teaming provide? Select TWO.

- A. fault tolerance
- B. better data protection
- C. IP support on Fibre Channel
- D. higher throughput
- E. IP support on SCSI

Answer: AD
