

HP0-758 braindumps

HP Certification I

HP0-758: HP ProCurve Mobility

Practice Exam: HP0-758 Exams

Exam Number/Code: HP0-758

Exam Name: HP ProCurve Mobility

Questions and Answers: 60 Q&As

([Certification I](#))

"HP ProCurve Mobility", also known as HP0-758 exam, is a HP certification.

Exam : [HP0-758](#)

With the complete collection of exam questions, Just4Study has assembled to take you through 60 Q&As to your HP0-758 exam preparation. In the HP0-758 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification I HP0-758 (HP ProCurve Mobility) examination of original title complete coverage. HP0-758 exam questions help you pass the exam.

Just4Study HP0-758 Feature:

* High quality - High quality and valued for the HP0-758 Exam: 100% Guarantee to Pass Your HP0-758 exam and get your Certification I certification.

* Authoritative - Authoritative braindumps with complete details about HP0-758 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification I resources, you will minimize your **HP Certification I** cost and be ready to pass your HP0-758 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification I demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-758 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-758 Demo Download

Just4Study offers free demo for Certification I HP0-758 exam (HP ProCurve Mobility). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification I HP0-758** examination of original title complete coverage. HP0-758 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-758

Exam Name: HP ProCurve Mobility(Certification I)

Questions and Answers: 60 Q&A

[HP HP0-758](#) Test belongs to one of the Certification I certified test, if needs to obtain the Certification I certificate, you

also need to participate in other related test, the details you may visit the [Certification I](#) certified topic, in there, you will see all related Certification I certified subject of examination.

Just4Study professional provide Certification I HP0-758 the newest Q&A, completely covers HP0-758 test original topic. With our complete Certification I resources, you will minimize your Certification I cost and be ready to pass your HP0-758 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-758

Title : HP ProCurve Mobility

1. You have a client who wants to improve security on his wireless network by implementing WPA in place of WEP. He is worried that not all of his clients will be able to make the switch to the new security protocol. You reassure him that most of his clients will be able to make the switch with a simple firmware upgrade because both WEP and WPA can use the same encryption algorithm. Which encryption algorithm is supported by both WEP and WPA?

- A. 3DES
- B. CAST
- C. RC4
- D. DES
- E. AES

Answer: C

2. When used in conjunction with WEP, the 802.1X protocol provides a dynamic _____ key for each individual client and a dynamic _____ key for packets destined for all clients.

- A. broadcast, session
- B. multicast, session
- C. broadcast, multicast
- D. session, broadcast

Answer: D

3. You are installing a wireless network inside the local branch of a savings bank. The branch has two floors. The lobby, bank clerk and vault are on the first floor, and there are offices and conference rooms for the bank officers on the second floor. Which object will likely cause the most signal degradation or cancellation to a 2.4GHz transmission?

- A. plasterboard in the second floor conference room
- B. fiberglass ceiling tiles in the lobby
- C. wire-mesh safety glass in front of the bank clerk
- D. oak panelling in the bank president's office

Answer: C

4. A ProCurve 420 has been installed in a network that has no DHCP server. On which IP address would you be able to communicate with the access point to provide initial configuration?

- A. 10.0.0.1
- B. 42.0.0.1
- C. 172.16.1.1
- D. 192.168.1.1

Answer: D

5. Your customer has told you that he is allocating the 10.1.1.0/24 subnet for use in his wireless network. Which command will statically assign an IP address of 10.1.1.10 with a default gateway of 10.1.1.1 to an HP ProCurve 420 Access Point?

- A. HP Procurve Access Point 420(if-wireless g)# ip address 10.1.1.10 255.255.255.0 10.1.1.1
- B. HP Procurve Access Point 420# ip address 10.1.1.10 255.255.255.0 10.1.1.1
- C. HP Procurve Access Point 420(if-ethernet)# ip address 10.1.1.10 255.255.255.0
- D. HP Procurve Access Point 420(if-ethernet)# ip address 10.1.1.10 255.255.255.0 10.1.1.1

Answer: D

6. Your customer is a convention center that wants to provide 802.11b networking to trade show booths. The convention floor space is a very large area with high ceilings. A typical trade show may have over 300 booths, and any booth may request wireless services for the show at any time in any location. Prior to implementation, what is the best course of action in determining the appropriate distance between access points?

- A. Ask permission to test signal strength and coverage with one AP and one client at various locations during a live trade show.
- B. Divide the total square footage into cell sizes based on client density
- C. Evenly divide up the convention space based on square footage to create equal sized cells
- D. Estimate the number of stations and evenly spread out the appropriate number of APs that maximizes bandwidth per station

Answer: A

7. Site surveys are best done at the pre-sales stage in order to provide a customer with a rough estimate of what their investment will be. What are some important results derived from a site survey? Select TWO.

- A. How far should the APs be spaced apart (what cell size is needed)?
- B. Are there available dedicated power circuits for AP usage to limit noise feedback?
- C. Base estimated cell radius of 33 meters supporting 60-90 users at 5.5 Mbps aggregate bandwidth.
- D. How many APs will be required in a given area (cell density)?
- E. Use an Ultrasonic Wave Analyzer to test signal to noise ratio for proper placement of access points.

Answer: AD

8. Which actions should be taken to test access point coverage during a site survey? Select THREE.

- A. Temporarily install an access point to test and measure signal to noise ratio levels.
- B. Use a wireless enabled portable device running an SNR analyzer tool.
- C. Configure all access points to use the same channel and enable bridge mode operation on all access points. Test connectivity and roaming once the site AP's are setup in bridge mode.
- D. Enable and verify 802.1X security to insure proper signal encryption and strength.
- E. Configure overlapping cells using non-overlapping channels and test for coverage.
- F. Configure WEP keys on client and access points.
- G. Configure a WDS link between two access points.

Answer: ABE

9. During a wireless network installation, you install ProCurve 150wl radio cards in slot B of your client's ProCurve 520wl. Which SSID should you expect to see on a client station when the access points are first powered up?

- A. Enterprise Wireless B
- B. Enterprise Wireless AP
- C. My Wireless Network B
- D. ProCurve Wireless

Answer: C

10. Your client has installed ProCurve 420s to provide wireless network access for his employees. When the access points are first powered on in a default state, which username/password pair would allow you to access the configuration interface?

- A. admin/password
- B. [blank]/public
- C. admin/[blank]
- D. [blank]/password

Answer: C

11. You have been called in by a customer who has lost the management password for her 520wl access point. After trying several possible combinations, you decide to reset the access point to factory default configuration. How do you do this?

- A. Select RE-INITIALIZE in the web interface.
- B. Press the RESET button for about 10 seconds.
- C. Press the RELOAD button for about 10 seconds.
- D. Reboot the Access Point.
- E. Toggle the Access Point's on/off switch.

Answer: C

12. You have a client who is upgrading his wireless network to improve security. He is going to implement Enterprise WPA instead of WEP. Which benefits will he gain by using WPA? Select TWO.

- A. better encryption of data using 3DES instead of RC4
- B. port-access authentication using 802.1X
- C. seamless roaming through the use of a linger timer
- D. per packet encryption key rotation using TKIP
- E. client/access point authentication using shared keys

Answer: BD

13. While working with a ProCurve 420, your customer notices a file called "dfmt-img.bin" in the flash memory of her access point. What is the purpose of this image file on the access point?

- A. It is the default system image and will always be used to boot the access point.
- B. It is the default location for the most current configuration file
- C. It is a default system image that can be used if the current system image is corrupted.
- D. It has no purpose

Answer: C

14. You are installing a new wireless network and have decided to use WPA as your security protocol. Which specific protocol provides for dynamic re-keying of encryption keys in WPA?

- A. RC4
- B. TLS
- C. TKIP
- D. WPA-PSK

Answer: C

15. Your client has installed ProCurve 520wls to provide wireless network access for his employees. When the access points are first powered on in a default state, which username/password pair would allow you to access the configuration from the web interface?

- A. [blank]/public
- B. admin/[blank]
- C. admin/password
- D. [blank]/password

Answer: A
