HP Certification I

HP0-775: HP Data Protector Software Application Integration-Windows

Practice Exam: HP0-775 Exams

Exam Number/Code: HP0-775

Exam Name: HP Data Protector Software Application Integration-Windows

Questions and Answers: 128 Q&As

([Certification I](#))

Exam : [HP0-775](#)

"HP Data Protector Software Application Integration-Windows", also known as HP0-775 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 128 Q&As to your HP0-775 exam preparation. In the HP0-775 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification I HP0-775 (HP Data Protector Software Application Integration-Windows) examination of original title complete coverage. HP0-775 exam questions help you pass the exam.

Just4Study HP0-775 Feature:

* High quality - High quality and valued for the HP0-775 Exam: 100% Guarantee to Pass Your HP0-775 exam and get your Certification I certification.

* Authoritative - Authoritative braindumps with complete details about HP0-775 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification I resources, you will minimize your **HP Certification I** cost and be ready to pass your HP0-775 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification I demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-775 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-775 Demo Download

Just4Study offers free demo for Certification I HP0-775 exam (HP Data Protector Software Application Integration-Windows). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification I HP0-775** examination of original title complete coverage. HP0-775 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-775

Exam Name: HP Data Protector Software Application Integration-Windows(Certification I)

Questions and Answers: 128 Q&A

HP HP0-775 Test belongs to one of the Certification I certified test, if needs to obtain the Certification I certificate, you also need to participate in other related test, the details you may visit the [Certification I](#) certified topic, in there, you will see all related Certification I certified subject of examination.

Just4Study professional provide Certification I HP0-775 the newest Q&A, completely covers HP0-775 test original topic. With our complete Certification I resources, you will minimize your Certification I cost and be ready to pass your HP0-775 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-775

Title : HP Data Protector Software Application Integration-Windows

1. What must be done to configure HP Data Protector Software online integration for an Oracle Data Guard standby system?

- A. You must locally reconfigure the standby system.
- B. Configuration must be done on the Cell Manager system only.
- C. The configuration must be distributed manually to all three servers.
- D. The standby and the primary system must be configured individually.

Answer: B

2. What is used by HP Data Protector Software to integrate with databases and to allow the backup and restore of logical units for the application?

- A. database driver files (DDFs)
- B. database link libraries (DLLs)
- C. application disk agents (ADAs)
- D. application programming interfaces (APIs)

Answer: D

3. What is the maximum number of devices used in a backup session for Microsoft Exchange?

- A. equal to the number of storage groups
- B. one for the complete backup specification
- C. equal to the number of databases within a storage group
- D. unlimited, as the storage group can be sub-divided into many objects

Answer: A

4. Which conditions must be met when you duplicate a database with the HP Data Protector Software Oracle integration? (Select two.)

- A. Net service name for the auxiliary instance must be configured.
- B. The entire primary database, together with the archived log files, must be backed up.
- C. Duplicating a database on the same system that the target database resides is not supported.
- D. Archive logs that have not been backed up to tape since the last full backup, are not required for duplication.
- E. To prepare for database duplication, you must first create an auxiliary instance and start it in Mount mode.

Answer: AB

5. Which mode in an SAP R/3 integration prevents you from performing incremental backups?

- A. offline
- B. online
- C. backint

D. circular logging

Answer: C

6. Which tool can be used to check the HP Data Protector Software components of an SAP R/3 integration?

A. util_sap

B. testbar2

C. omnisap

D. omnidbcheck -sap

Answer: B

7. When migrating from a Windows 32-bit cell manager to a new 64-bit machine, what must you do first to the Internal Database (IDB)?

A. Purge any obsolete sessions.

B. Purge the media management database.

C. Back it up and restore it to a temporary location on the 64-bit machine.

D. Create a copy of the database structure in a temporary location on the 32-bit machine.

Answer: C

8. What is the process when configuring the Microsoft Volume Shadow Copy Writers integration in a single server HP Data Protector Software environment?

A. Writers are automatically detected when the VSS specification is created.

B. Set the backup flag of the VSS configuration file on the client and register the client with the cell.

C. Add the VSS configuration file to the application bin directory and register the application in the cell.

D. Use the VSSadmin command to configure each application writer for the number of shadow copies and valid time options.

Answer: A

9. Which Microsoft SQL integration option allows you to backup more than one database at the same time to available devices?

A. load balance

B. device concurrency

C. database parallelism

D. number of concurrent streams

Answer: C

10. How are Oracle backups marked in the HP Data Protector Software internal database, regardless of the Oracle backup type?

A. full

B. differential

C. incremental

D. transaction

Answer: A

11. Which interface does BRARCHIVE use to communicate with HP Data Protector Software?

A. backint

B. RMAN

C. omnisap

D. omnidbutil

Answer: A

12. David uses a Virtual Library System (VLS) for backing up his Oracle archive logs and file server data. He uses a capacity based license for one terabyte. This limit is exceeded during backup. What does HP Data Protector Software do?

- A. generates a minor error and reports it
- B. generates a major error and backup stops immediately
- C. generates a critical error and notifies the HP license team
- D. generates a minor error and the next backup job will not run

Answer: A

13. When creating a backup specification for a Microsoft Exchange Server, what is the recommended maximum number of devices connected directly to the server?

- A. 2
- B. 3
- C. 4
- D. 5

Answer: A

14. Which HP Data Protector Software command and option can you use to test an SAP R/3 integration using the CLI?

- A. omnib -test_bar
- B. saprest -test2_bar
- C. omnisap -config_test
- D. util_sap -<oracle_sid>

Answer: A

15. You are restoring several Microsoft Exchange Server databases from the same storage group. What must you do to ensure they can all be restored in the same session?

- A. Select the Restore in parallel option.
- B. Ensure their backup versions are the same.
- C. Ensure they are all part of the same restore chain.
- D. Use a temporary location and relocate the files later.

Answer: B

16. When is the Microsoft SQL Server backup specification Concurrent streams option available for selection?

- A. when any object is selected
- B. when Inc1 backups are defined
- C. when more than one device is configured
- D. when the entire SQL server database is backed up

Answer: D

17. How does HP Data Protector Software back up the Oracle server configuration files?

- A. with the RMAN API
- B. through the Disk Agent
- C. by using the UMA utility
- D. by submitting the ob2rman.pl command

Answer: B

18. Which location is used by HP Data Protector Software to restore Microsoft Exchange transaction logs?

- A. a directory specified for temporary log files
- B. the Exchange server transaction log directory
- C. the MStemp directory on the HP Data Protector Software Cell Manager
- D. a temporary tablespace in the HP Data Protector Software Internal Database

Answer: A

19. To communicate with the database, the Database Integration Agent needs access information for the application. Where is this information stored?

- A. datalist configuration on the Cell Server
- B. database application and the Cell Server
- C. online integration configuration of the application
- D. zero downtime backup component of the Cell Server internal database

Answer: B

20. How do you back up Microsoft Exchange databases within a storage group?

- A. in parallel
- B. sequentially
- C. oldest files first
- D. longest filenames first

Answer: B

21. Which file system is supported for the backup of VSS writers?

- A. FAT
- B. CIFS
- C. NTFS
- D. NDMP

Answer: C

22. Which VSS writer is used to back up and restore the system resource monitoring and management infrastructure of Microsoft Windows?

- A. WMI Writer
- B. Registry Writer
- C. Resource Writer
- D. IIS Management Writer

Answer: A

23. Where must the Microsoft Exchange Server pre-exec and post-exec commands and scripts reside?

- A. <Data_Protector_home>libexchange on the Cell Manager
- B. <Data_Protector_home>binexchange directory on the Cell Manager
- C. <Data_Protector_home>lib on the Microsoft Exchange Server system
- D. <Data_Protector_home>bin directory on the Microsoft Exchange Server system

Answer: D

24. What is the device concurrency used for Microsoft SQL Server backups?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: A

25. Where must you specify the login credentials with util_oracle8.pl to configure a new Oracle standby database?

- A. Oracle database server
- B. on each Oracle standby instance
- C. HP Data Protector Software Cell Manager
- D. database server and the standby systems

Answer: B

26. What must you consider if the devices used to restore a Microsoft SQL database are different from the devices used for backup?

- A. Rescan device must be enabled.
- B. The number of devices must be the same.

- C. An alternate restore location must be assigned.
- D. Force use of alternate device must be enabled.

Answer: B

27. Why do you duplicate a database with the same database identifier as the production (primary) database?

- A. testing
- B. data mining
- C. standby database creation
- D. LAN-free backup scenario setup

Answer: C

28. What must you do before you can check the Microsoft Exchange Server single mailbox configuration?

- A. Create a system account on the Cell Manager.
- B. Create at least one single mailbox backup specification.
- C. Add the exchange server IP address to the allow_hosts file.
- D. Run the omnichk command with the -singlemailbox option.

Answer: B

29. HP Data Protector Software integration depends on which SAP component?

- A. kernel
- B. archiver
- C. BRTOOLS
- D. BRCONFIG

Answer: C

30. You are restoring a Microsoft Exchange Server using the Restore into mailbox option. What must you ensure on the Exchange Server before starting the restore?

- A. transaction logging is off
- B. destination mailbox exists
- C. recovery mode is enabled
- D. Microsoft Exchange Server services are stopped

Answer: B
