HP Certification III

HP0-791: HP Procurve Convergence

Practice Exam: HP0-791 Exams

Exam Number/Code: HP0-791

Exam Name: HP Procurve Convergence

Questions and Answers: 60 Q&As

([Certification III](#))

Exam : [HP0-791](#)

"HP Procurve Convergence", also known as HP0-791 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 60 Q&As to your HP0-791 exam preparation. In the HP0-791 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification III HP0-791 (HP Procurve Convergence) examination of original title complete coverage. HP0-791 exam questions help you pass the exam.

Just4Study HP0-791 Feature:

* High quality - High quality and valued for the HP0-791 Exam: 100% Guarantee to Pass Your HP0-791 exam and get your Certification III certification.

* Authoritative - Authoritative braindumps with complete details about HP0-791 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification III resources, you will minimize your **HP Certification III** cost and be ready to pass your HP0-791 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification III demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-791 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-791 Demo Download

Just4Study offers free demo for Certification III HP0-791 exam (HP Procurve Convergence). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification III HP0-791** examination of original title complete coverage. HP0-791 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-791

Exam Name: HP Procurve Convergence(Certification III)

Questions and Answers: 60 Q&A

[HP HP0-791](#) Test belongs to one of the Certification III certified test, if needs to obtain the Certification III certificate,

you also need to participate in other related test, the details you may visit the [Certification III](#) certified topic, in there, you will see all related Certification III certified subject of examination.

Just4Study professional provide Certification III HP0-791 the newest Q&A, completely covers HP0-791 test original topic. With our complete Certification III resources, you will minimize your Certification III cost and be ready to pass your HP0-791 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-791

Title : HP ProCurve Convergence

1. Under what condition does the IEEE 802.1p field provide end-to-end prioritization?

- A. source and destination hosts are in the same VLAN
- B. the network is experiencing high levels of congestion
- C. all switches can classify traffic based on DSCP
- D. all links in the path between source and destination are tagged

Answer: D

2. You are planning a network upgrade at a small company. During a meeting, you learn that the customer will install VoIP telephones that set Layer 2 and Layer 3 priority markers for all voice traffic. The VoIP traffic will not cross any WAN links. To support these phones, the customer's new ProCurve 5300xl series switches will require _____.

- A. rate limiting on all ports that support VoIP phones
- B. GMB settings for voice traffic
- C. an IEEE 802.1p-to-DSCP map for voice traffic
- D. no QoS configuration changes

Answer: D

3. At a customer site, you must determine if the default settings for ProCurve 5300xl series switches will provide adequate QoS for a multimedia training application. To make this determination, you must learn if the application _____.

- A. uses TCP or UDP as a transport protocol
- B. inserts Layer 2 or Layer 3 priority markers
- C. supports Guaranteed Minimum Bandwidth
- D. distributes content through IP multicast

Answer: B

4. What is the measurable degree to which an IT staff can successfully guarantee the predictable behavior of network services?

- A. Type of Service (ToS)
- B. Class of Service (CoS)
- C. Quality of Service (QoS)
- D. Guarantee of Service (GoS)

Answer: C

5. A user of a new VoIP infrastructure reports that she unintentionally speaks at the same time as the person on the other end of the line. This condition could be caused by excessive _____.

- A. jitter

- B. delay
- C. echo
- D. packet collisions

Answer: B

6. In comparison to streaming video traffic, voice traffic is typically more _____.

- A. difficult to route
- B. insensitive to jitter
- C. sensitive to delay
- D. bandwidth-intensive

Answer: C

7. Why does network congestion often cause more network congestion?

- A. QoS settings require switches to retransmit all real-time traffic.
- B. TCP applications request retransmission of dropped packets.
- C. 802.1p priorities are ignored after congestion reaches a user-defined threshold.
- D. RSVP routers allocate more bandwidth to UDP applications.

Answer: B

8. How many priority levels are specified by the IEEE 802.1p standard?

- A. 4
- B. 8
- C. 16
- D. 32

Answer: B

9. You are designing a QoS solution for a customer site. While reviewing the client's current infrastructure, you notice that a ProCurve 5308xl series switch provides 100Base-TX connections for 145 general office users. The switch has a gigabit uplink to the network core. If all end-users are simultaneously communicating with the network core, when is the uplink congested?

- A. whenever end users require more than 0.7 percent of available bandwidth
- B. whenever end users require more than 7 percent of available bandwidth
- C. under no circumstances
- D. during IP multicast transmissions

Answer: B

10. In a converged network, what does video traffic require in comparison to voice traffic?

- A. less delay
- B. higher priority
- C. more bandwidth
- D. more expensive cabling

Answer: C

11. How does the ProCurve Adaptive EDGE Architecture support convergence?

- A. by enhancing edge compression of video streams
- B. by ensuring that traffic is prioritized at the edge of the network
- C. by translating analog signals to digital signals at the edge of the network
- D. by supporting a variety of Layer 3 protocols at the edge and in the core of the network

Answer: B

12. Ethernet and IP are the fundamental technologies for converged networks because they _____. Select TWO.

- A. offer mature standards

- B. tolerate high packet loss
- C. are widely deployed
- D. offer high levels of security
- E. aren't disrupted by power outages

Answer: AC

13. A converged network _____.

- A. can transmit voice, video, and data over a single infrastructure
- B. deploys circuit-switching instead of packet-switching
- C. can serve more users than a conventional IP network
- D. features an edge-oriented architecture

Answer: A

14. At default settings, all managed ProCurve switches can _____.

- A. classify traffic according to TCP port number
- B. translate Layer 2 priority markers to Layer 3 priority markers
- C. classify traffic based on priority markers set by other devices
- D. map DSCP values to physical queues

Answer: C

15. What is IP Type of Service (ToS) an example of?

- A. hard QoS
- B. soft QoS
- C. continual QoS
- D. virtual QoS

Answer: B
