HP0-794: Implementing Windows Server 2003 on HP ProLiant Cluster Solutions

Practice Exam: HP0-794 Exams

Exam Number/Code: HP0-794

Exam Name: Implementing Windows Server 2003 on HP ProLiant Cluster Solutions

Questions and Answers: 69 Q&As

([HP MASE](#))

Exam : [HP0-794](#)

"Implementing Windows Server 2003 on HP ProLiant Cluster Solutions", also known as HP0-794 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 69 Q&As to your HP0-794 exam preparation. In the HP0-794 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP HP MASE HP0-794 (Implementing Windows Server 2003 on HP ProLiant Cluster Solutions) examination of original title complete coverage. HP0-794 exam questions help you pass the exam.

Just4Study HP0-794 Feature:

* High quality - High quality and valued for the HP0-794 Exam: 100% Guarantee to Pass Your HP0-794 exam and get your HP MASE certification.

* Authoritative - Authoritative braindumps with complete details about HP0-794 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed HP MASE resources, you will minimize your **HP HP MASE** cost and be ready to pass your HP0-794 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free HP MASE demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-794 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-794 Demo Download

Just4Study offers free demo for HP MASE HP0-794 exam (Implementing Windows Server 2003 on HP ProLiant Cluster Solutions). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **HP HP MASE HP0-794** examination of original title complete coverage.HP0-794 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: HP0-794

Exam Name: Implementing Windows Server 2003 on HP ProLiant Cluster Solutions(HP MASE)

Questions and Answers: 69 Q&A

[HP HP0-794](#) Test belongs to one of the HP MASE certified test, if needs to obtain the HP MASE certificate, you also need to participate in other related test, the details you may visit the [HP MASE](#) certified topic, in there, you will see all related HP MASE certified subject of examination.

Just4Study professional provide HP MASE HP0-794 the newest Q&A, completely covers HP0-794 test original topic. With our complete HP MASE resources, you will minimize your HP MASE cost and be ready to pass your HP0-794 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-794

Title : Implementing Windows 2003 on HP ProLiant Clusters

1. The ProLiant DL380 Packaged Cluster with MSA500 supports how many additional storage enclosures?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

2. Which adjustments should be made to the network adapter that has been set to Internal Cluster Communications Only? Select THREE.

- A. Designate the adapter as the primary NIC in a fault-tolerant team.
- B. Remove all protocols other than TCP/IP and disable the Media Sense feature.
- C. Set the adapter to a specific speed of 10Mb/s or 100Mb/s.
- D. Set the adapter to use NetBIOS.
- E. Set the adapter duplex mode to half duplex.
- F. Use the auto-detect setting on the network adapter for the private interconnect.

Answer: BCE

3. What is the maximum number of drive letters per cluster for shared drives with Microsoft Windows Server 2003?

- A. 18
- B. 19
- C. 20
- D. 23

Answer: D

4. The HP ProLiant DL380 Packaged Cluster with MSA1000 supports how many additional storage enclosures?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

5. What is the leading cause of downtime?

- A. hardware failures
- B. operational activities
- C. software failures

D. infrastructure problems

Answer: D

6. What is least likely to fail in a Windows Server 2003 network environment?

A. hardware

B. applications

C. operating system

D. operational issues

E. infrastructure (building, power, network)

Answer: A

7. Which component of Insight Manager 7 enables you to browse cluster and component status in a tree hierarchy?

A. Systems Manager

B. Cluster Monitor

C. Cluster Manager

D. Management Services

Answer: B

8. Which description accurately depicts an HP Multi-Server Card?

A. It supports up to 64 network devices within a single UPS group and provides unattended, sequential shutdown of every device in that group, regardless of the operating system.

B. It enables each load segment to function as a separate UPS with individual shutdown schedules and load segment configurations.

C. It detects and warns users of power failures and manages a safe system shutdown before the backup power supply is exhausted.

D. It allows for the safe installation of new batteries through the front panel, without powering down the connected equipment.

Answer: B

9. When creating a clustered volume mount point on a cluster node, which requirement must be met? The partition to be mounted must be _____.

A. created on the Quorum disk

B. mounted to a shared disk in a different group

C. created on a non-clustered disk

D. formatted using NTFS

Answer: D

10. Cluster.exe can be used to _____.

A. launch the Cluster Monitor utility

B. administer clusters

C. launch Microsoft Cluster Administrator

D. power down the cluster

Answer: B

11. Which tasks have been identified by HP as important when planning network capacity and the graceful failover and fallback of cluster resources and services? Ensure that: _____. Select TWO.

A. each cluster node has processors of sufficient speed to handle the maximum client load of the entire cluster

B. the surviving node network speed and protocol will handle the maximum number of I/Os necessary to support critical services

C. the throughput of the NIC on the surviving node is sufficient to handle the maximum network load for peak load cluster services

D. each individual cluster node can handle the maximum number of clients that can attach to the cluster

E. the shared storage capacity is sufficient to handle the load of the entire cluster

Answer: BD

12. ProLiant clusters can achieve availability levels 2 and 3 of the standard availability levels defined by the industry and adopted by HP. What is a characteristic of these availability levels?

- A. Work stops.
- B. Performance degradation can result.
- C. Transactions must be rerun.
- D. Shutdown is uncontrolled.

Answer: B

13. Which HP PCI-to-Fibre Channel host bus adapter (HBA) uses the small form factor transceiver connection and supports the MSA1000?

- A. 32-bit/33MHz HBA using the Tachyon chipset
- B. 64-bit/33MHz HBA using the Emulex chipset
- C. 64-bit/66MHz FCA-2101 HBA using the QLogic chipset
- D. 64-bit/66MHz HBA using the Tachyon chipset

Answer: C

14. What enables restoring Exchange databases to an online production server?

- A. Shadow Backup Copy
- B. Recovery Storage Group
- C. Mailbox Recovery Center
- D. Mobile Exchange Solution Package

Answer: B

15. Which SQL Server clustering requirement changed between SQL 0 and SQL 2000?

- A. Only licenses for the first node in the cluster were required for SQL 7.0; all nodes must have licenses for SQL 2000.
- B. Multiple virtual SQL servers could not run on the same set of disks for SQL 7.0, but can run on the same set of disks for SQL 2000.
- C. Binaries are on the shared disk for SQL 7.0, but on the local disk for SQL 2000.
- D. Microsoft Transaction Server and Microsoft Queue Manager are no longer included as components of SQL 2000.

Answer: C
