

## HP0-850 braindumps

### HP Certification I

#### HP0-850: Integrating Oracle9i with hp Platforms

**Practice Exam:** HP0-850 Exams

**Exam Number/Code:** HP0-850

**Exam Name:** Integrating Oracle9i with hp Platforms

**Questions and Answers:** 238 Q&As

( [Certification I](#) )

"Integrating Oracle9i with hp Platforms", also known as HP0-850 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 238 Q&As to your HP0-850 exam preparation. In the HP0-850 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

Exam : [HP0-850](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification I HP0-850 (Integrating Oracle9i with hp Platforms) examination of original title complete coverage. HP0-850 exam questions help you pass the exam.

#### **Just4Study HP0-850 Feature:**

\* High quality - High quality and valued for the HP0-850 Exam: 100% Guarantee to Pass Your HP0-850 exam and get your Certification I certification.

\* Authoritative - Authoritative braindumps with complete details about HP0-850 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification I resources, you will minimize your **HP Certification I** cost and be ready to pass your HP0-850 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free Certification I demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-850 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free HP0-850 Demo Download**

Just4Study offers free demo for Certification I HP0-850 exam (Integrating Oracle9i with hp Platforms). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification I HP0-850** examination of original title complete coverage. HP0-850 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

#### **VUE/Prometric Code: HP0-850**

Exam Name: Integrating Oracle9i with hp Platforms( Certification I )

Questions and Answers: 238 Q&A

[HP HP0-850](#) Test belongs to one of the Certification I certified test, if needs to obtain the Certification I certificate, you

also need to participate in other related test, the details you may visit the [Certification I](#) certified topic, in there, you will see all related Certification I certified subject of examination.

Just4Study professional provide Certification I HP0-850 the newest Q&A, completely covers HP0-850 test original topic. With our complete Certification I resources, you will minimize your Certification I cost and be ready to pass your HP0-850 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

*Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.*

Exam : HP HP0-850

Title : Integrating Oracle9i with hp Platforms

1. You create an index on the social security numbers column of your employee information table. What will the RDBMS use to determine if your company employs a person with a certain social security number?

- A. direct index access
- B. existence check
- C. sequential index access
- D. The RDBMS does not use an index.

Answer: B

2. If you have a high volume of random disk I/O requests, what provides the highest disk subsystem performance?

- A. fast transfer protocol
- B. large number of disk drives and proper data distribution
- C. large number of high-bandwidth disk controllers
- D. low number of fast-spinning disk drives

Answer: B

3. Which attribute is not a characteristic of data warehouse systems?

- A. little or no growth after data is loaded
- B. consolidation of data from various information systems
- C. small number of users executing highly complex transactions
- D. heavy utilization of temporary workspace

Answer: A

4. Which components define an Oracle instance?

- A. Oracle instance processes
- B. Database and its data files
- C. System Global Area (SGA)
- D. Oracle instance processes and SGA

Answer: D

5. What software is required to run the ProLiant Transaction Processing Sizer for Oracle9i offline?

- A. HP Insight Manager
- B. Survey Utility
- C. Microsoft Internet Information Server
- D. MSDE or Microsoft SQL Server

Answer: C

6. Which statement is false?

- A. The lack of memory can exhibit itself as a disk bottleneck.
- B. If the sum of operating system memory, Oracle9i memory, and non-Oracle application memory exceeds physical RAM; memory paging will occur.
- C. You should tune memory after you tune the disk subsystem.
- D. You should tune the application and SQL before making a final determination of the physical memory in your system.

Answer: C

7. Where does the ProLiant Performance Analyzer store collected information for future playback?

- A. In a local encrypted binary file.
- B. In an MSDE or Microsoft SQL Server database.
- C. In an online ActiveAnswers repository.
- D. In an Oracle database.

Answer: B

8. Which Oracle view should you query to determine the library cache hit rate?

- A. V\$LIBRARYCACHE
- B. V\$ROWCACHE
- C. V\$SESSTAT
- D. V\$SGASTAT

Answer: A

9. Which Oracle StatsPack collection level retrieves high-resource SQL statistics?

- A. level 0
- B. level 1
- C. level 5
- D. level 6

Answer: C

10. What is the recommended strategy for tuning the Process Global Area (PGA) working memory? Configure the PGA \_\_\_\_\_.

- A. to complete 100% of the operations in a single pass
- B. to complete 100% of the operations in two passes
- C. to complete 90% of the operations in a single pass and 10% of the operations in two passes
- D. for a 90% cache hit rate

Answer: C

11. What measures disk subsystem performance in bandwidth-intensive environments?

- A. GB/hr
- B. MB/s
- C. random I/O requests per second
- D. transactions per second

Answer: B

12. Which network setting enables the application to maximize the usage of the operating system file cache?

- A. maximize data throughput for file sharing
- B. maximize data throughput for network applications
- C. minimize memory used
- D. balance

Answer: A

13. What is the recommended method for speeding up decision-support queries that are executed serially?

- A. add more processors

- B. configure more dispatchers
- C. increase the size of the System Global Area (SGA)
- D. use concurrency-inducing technology, such as the Oracle Parallel Query

Answer: D

14. Your disk subsystem volume contains ten 9.1GB, 10K-rpm disk drives with a random I/O requests-per-second rate of 90. You have deployed RAID 0 over these drives. You measure a combined logical transfer rate of 1500 I/O requests-per-second and determine that the disk queue length for this volume is 67. What should you do to increase the system performance?

- A. Both the random I/O requests-per-second rate per disk drive and the disk queue length indicate a disk bottleneck. Add more disk controllers.
- B. Both the random I/O requests-per-second rate per disk drive and the disk queue length indicate that the disk subsystem is not a performance bottleneck. An investigation into other system areas is necessary.
- C. The random I/O requests-per-second rate per disk drive indicates a disk bottleneck, which is also confirmed by the longer-than-recommended disk queue length. Adding more disk drives is necessary to increase the performance.
- D. The random I/O requests-per-second rate per disk drive indicates a disk bottleneck, which is also confirmed by the longer-than-recommended disk queue length. Before adding more disk drives, an analysis of the memory utilization is necessary.

Answer: D

15. What sustained processor queue length indicates processor congestion?

- A. 2
- B. 4
- C. two times the number of processors
- D. four times the number of processors

Answer: A

16. To avoid a livelock, you should design your transactions to:

- A. obtain an exclusive lock and monitor its idle time. If the idle time is too long, release the exclusive lock and try a shared lock first.
- B. obtain an update lock before attempting to obtain an exclusive lock, which enables the RDBMS to block new shared locks until your transaction can obtain the exclusive lock it wants and completes execution.
- C. wait until all shared locks on the data set are released before attempting to obtain an exclusive lock.
- D. acquire an update lock and monitor its idle time. If the idle time is too long, release the update lock and try a shared lock first.

Answer: B

17. What action is indicated to the RDBMS when a transaction issues the ROLLBACK statement as the last SQL statement?

- A. Free up an occupied database buffer.
- B. Initiate the failover procedure.
- C. Abort the transaction and undo its effects on the database.
- D. Revert to a stored procedure.

Answer: C

18. Click the Exhibit button.

You query the DB\_CACHE\_ADVICE view and retrieve the results listed in the table displayed in the Exhibit. If you decrease the current database buffer cache by 92MB, what would be the increase in database buffer cache misses?

- A. 13%
- B. 33%
- C. 74%
- D. 100%

Answer: C

19. What must be true for Oracle9i to collect wait event statistics? The \_\_\_\_\_.

- A. BSTAT/ESTAT tools must be installed
- B. Oracle StatsPack must be installed
- C. timed\_statistics option must be set to 1
- D. V\$system\_event table must be manually created

Answer: C

20. A transaction becomes committed and its changes are permanent when \_\_\_\_\_.

- A. Oracle completes the next scheduled checkpoint.
- B. the transaction issues the CHECKPOINT statement and Oracle finishes the checkpoint.
- C. the transaction issues the COMMIT statement and Oracle completes the corresponding write to the redo log.
- D. the transaction issues the COMMIT statement.

Answer: C
