HP Certification I

HP0-J28: Implementing HP StorageWorks Virtual Library Systems

Practice Exam: HP0-J28 Exams

Exam Number/Code: HP0-J28

Exam Name: Implementing HP StorageWorks Virtual Library Systems

Questions and Answers: 67 Q&As

([Certification I](#))

Exam : [HP0-J28](#)

"Implementing HP StorageWorks Virtual Library Systems", also known as HP0-J28 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 67 Q&As to your HP0-J28 exam preparation. In the HP0-J28 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification I HP0-J28 (Implementing HP StorageWorks Virtual Library Systems) examination of original title complete coverage. HP0-J28 exam questions help you pass the exam.

Just4Study HP0-J28 Feature:

* High quality - High quality and valued for the HP0-J28 Exam: 100% Guarantee to Pass Your HP0-J28 exam and get your Certification I certification.

* Authoritative - Authoritative braindumps with complete details about HP0-J28 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification I resources, you will minimize your **HP Certification I** cost and be ready to pass your HP0-J28 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification I demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-J28 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-J28 Demo Download

Just4Study offers free demo for Certification I HP0-J28 exam (Implementing HP StorageWorks Virtual Library Systems). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification I HP0-J28** examination of original title complete coverage. HP0-J28 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-J28

Exam Name: Implementing HP StorageWorks Virtual Library Systems(Certification I)

Questions and Answers: 67 Q&A

[HP HP0-J28](#) Test belongs to one of the Certification I certified test, if needs to obtain the Certification I certificate, you also need to participate in other related test, the details you may visit the [Certification I](#) certified topic, in there, you will see all related Certification I certified subject of examination.

Just4Study professional provide Certification I HP0-J28 the newest Q&A, completely covers HP0-J28 test original topic. With our complete Certification I resources, you will minimize your Certification I cost and be ready to pass your HP0-J28 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-J28

Title : Implementing HP StorageWorks Virtual Library Systems

1. When would you opt to use an HP Data Protector environment with Advanced Backup to Disk licensing in conjunction with a virtual library system instead of a traditional backup-to-disk solution? (Select two.)

- A. when you want to use target-based compression
- B. when the environment consists mainly of LAN clients
- C. when you want to use existing SAN storage or locally attached storage
- D. when there are many SAN hosts writing to disk
- E. when there are relatively few SAN hosts writing to disk

Answer: AD

2. What is a benefit of using HP Data Protector Software's capacity-based licensing model with an HP Virtual Library System?

- A. Deduplication is included in the capacity license.
- B. Four times the license capacity is available for short-term use.
- C. It simplifies management of the virtual library devices.
- D. No penalty is imposed when configuring additional virtual drives or libraries.

Answer: D

3. What do the HP StorageWorks Virtual Library System 6200/6600 appliances provide? (Select two.)

- A. resiliency against a single MSA20 volume failure
- B. support of up to two MSA20 disk enclosures at any time
- C. online addition of physical storage capacity
- D. fewer media failures due to the use of virtual media
- E. performance enhancements for single file restores due to lower tape load and positioning/seek times

Answer: DE

4. With the maximum number of supported nodes, running the VLS software version 3.x, how many arrays are supported in a VLS9000?

- A. 8
- B. 16
- C. 32
- D. 64

Answer: B

5. What are features and benefits of accelerated data deduplication? (Select two.)

- A. delivers a platform with integrated data deduplication
- B. uses hash-based chunking code with a design focused on compatibility and cost

- C.leverages object-level differencing code
- D.supports performance increase by adding nodes
- E.provides pre-processing technology - data is first deduplicated and then compressed

Answer: CD

6. Where is the virtual media data (user backup data) on the VLS located?

- A.on a dedicated RAID volume
- B.striped across all RAID LUN volumes
- C.stored on the operating system volume
- D.in a special partition on the first RAID volume

Answer: B

7. What are advantages of having separate zones for disk storage systems and disk-to-disk backup systems in storage area networks? (Select two.)

- A.The physical and virtual tape controllers do not discover disk controllers.
- B.Administrative and management costs are lower.
- C.Tape multipathing functionality can be used to map the physical and virtual devices.
- D.There is less host access and improved target and LUN shifting.
- E.Performance is improved, due to dedicated HBAs for disk and tape access.

Answer: AE

8. What is oversubscription in the context of virtual libraries?

- A.more capacity allocated than physically installed
- B.more libraries created than currently licensed
- C.more virtual drives created than currently licensed
- D.more data streams than the library can process

Answer: A

9. How is storage space assigned between the virtual cartridges and the physical disks in the HP StorageWorks Virtual Library System storage pool?

- A.Storage space is dynamically assigned as it is used.
- B.Each virtual library has a fixed amount of storage space available for cartridges to use.
- C.Each virtual tape drive has a fixed amount of storage space available for cartridges to use.
- D.When the media is created, full storage space is reserved within the storage pool.

Answer: A

10. Which statement is true about automigration using the Smart Copy functionality?

- A.The backup application can immediately use the destination library if the source library fails.
- B.Smart Copy acts as a transparent disk cache to the physical library.
- C.A backup application can only use Smart Copy if it supports the SMI-S interface.
- D.Because the copy jobs are initiated from the virtual library, the backup application will not be aware of any copy failures.

Answer: C

11. What are benefits of storage pools in a virtual library? (Select two.)

- A.Storage pools keep specific backup data physically separate from other backup data.
- B.Multiple pools minimize the impact of a catastrophic array failure.
- C.The virtual library can automatically balance backup jobs over multiple storage pools.
- D.The user can easily optimize the performance on each storage pool.
- E.Maintenance is easier on a system with multiple storage pools.

Answer: AB

12. What is a key functionality offered with HP StorageWorks Virtual Library System storage virtualization?

- A. fully automated capacity addition and removal
- B. reassignment of resources as requirements change
- C. ability to enable and disable tape compression on an as-needed basis
- D. automated LUN to host assignment

Answer: B

13. What is an advantage of using the automigration feature of virtual library systems?

- A. The tapes are analyzed during backup to migrate all files. After the content is decoded, only those files are compared to the same files from the previous backup.
- B. It leverages object-level differencing code with a design centered on performance and scalability.
- C. The destination tapes are block-by-block copies of the source tapes and can easily be restored by any tape library to which the backup application has access.
- D. It delivers fastest restores from recently backed up data, maintains the complete most recent copy of backup data, but eliminates duplicate data in previous backups.

Answer: C

14. Which statement is true regarding the Echo Copy automigration feature of virtual libraries?

- A. It allows you to automatically backup data to a virtual library and to a physical tape library simultaneously.
- B. It allows you to copy backup images from the virtual library to a disk pool without impacting the backup server.
- C. It allows you to move copies of cartridge data from the virtual library to a physical library under the control of the virtual library.
- D. It allows you to move copies of cartridge data from the virtual library to a physical library under the control of the backup application.

Answer: C

15. Which statements are true regarding Echo Copy, assuming the destination library is unpartitioned? (Select two.)

- A. The destination library is not visible to the backup application, so it does not require licensing.
- B. Echo Copy uses an incremental change copy policy.
- C. The destination library can be used for both backup and copy operations.
- D. The backup application is aware of any copy failures to ensure media management consistency.
- E. Copy traffic is no longer routed through a backup server.

Answer: AE
