HP Certification I

HP0-K03: Implementing and Managing HP BladeSystem in the Enterprise

Practice Exam: HP0-K03 Exams

Exam Number/Code: HP0-K03

Exam Name: Implementing and Managing HP BladeSystem in the Enterprise

Questions and Answers: 130 Q&As

([Certification I](#))

Exam : [HP0-K03](#)

"Implementing and Managing HP BladeSystem in the Enterprise", also known as HP0-K03 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 130 Q&As to your HP0-K03 exam preparation. In the HP0-K03 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification I HP0-K03 (Implementing and Managing HP BladeSystem in the Enterprise) examination of original title complete coverage. HP0-K03 exam questions help you pass the exam.

Just4Study HP0-K03 Feature:

* High quality - High quality and valued for the HP0-K03 Exam: 100% Guarantee to Pass Your HP0-K03 exam and get your Certification I certification.

* Authoritative - Authoritative braindumps with complete details about HP0-K03 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification I resources, you will minimize your **HP Certification I** cost and be ready to pass your HP0-K03 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification I demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-K03 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-K03 Demo Download

Just4Study offers free demo for Certification I HP0-K03 exam (Implementing and Managing HP BladeSystem in the Enterprise). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification I HP0-K03** examination of original title complete coverage. HP0-K03 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-K03

Exam Name: Implementing and Managing HP BladeSystem in the Enterprise(Certification I)

Questions and Answers: 130 Q&A

[HP HP0-K03](#) Test belongs to one of the Certification I certified test, if needs to obtain the Certification I certificate, you also need to participate in other related test, the details you may visit the [Certification I](#) certified topic, in there, you will see all related Certification I certified subject of examination.

Just4Study professional provide Certification I HP0-K03 the newest Q&A, completely covers HP0-K03 test original topic. With our complete Certification I resources, you will minimize your Certification I cost and be ready to pass your HP0-K03 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-K03

Title : Integrating and Managing HP BladeSystem in the Enterprise

1. Which tool analyzes the server configuration and recommends an action to resolve known performance problems on HP BladeSystem c-Class server blades?

- A. iLO 2
- B. Onboard Administrator
- C. Performance Management Pack
- D. BladeSystem Integrated Manager

Answer: C

2. What is the purpose of the Insight Display chat mode screen on a Blade Server rack?

- A. to display the active OA IP address and active OA service IP address
- B. to display helpful information such as contact phone numbers on the Insight Display
- C. to communicate between someone in front of the display and the remote administrator using the web interface
- D. to communicate between someone in front of the display and the remote administrator using a cell phone two-way pager

Answer: C

3. The primary Onboard Administrator in a c7000 enclosure is active in a redundant configuration and needs replacing. What must you do?

- A. Power down the enclosure and replace the active controller.
- B. Replace the active controller and restore settings from the redundant one.
- C. Swap the controller and allow the settings to be automatically copied over.
- D. Swap the redundant controller with the active controller and replace the defective controller.

Answer: D

4. You are diagnosing a problem with an HP p-Class BladeSystem infrastructure. The installed server blades or interconnect switches do not power on, but the power supply AC power LEDs are on. None of the fault LEDs are illuminated. You ensured that the power enclosure is properly cabled and connected to the power outlets. What is another possible cause of this issue?

- A. The power zones are set incorrectly.
- B. The power bus bar circuit breakers are in the off position.
- C. The power enclosure circuit breakers are in the off position.
- D. The power supplies are configured for dynamic power saver mode.

Answer: B

5. For troubleshooting reasons, you want to disable dynamic power saving mode on a c-Class power enclosure. What is the correct way to do this?

- A. Slide the switch on the power management module to the on position.
- B. Disable the dynamic power saving mode in RBSU for the first blade in the enclosure.
- C. Log on to the Insight Display and disable the dynamic power saving mode under the power management tab.
- D. Log on to the Onboard Administrator and disable the dynamic power saving mode under the power management tab.

Answer: D

6. Which component of the optional Brocade 4Gb SAN Switch Power Pack can help administrators monitor specific fabric metrics from an SID (Source ID) to a DID (Destination ID), so they can fine-tune and scale the fabric more efficiently?

- A. ISL Trunking
- B. Fabric Watch
- C. Extended Fabric
- D. Advanced Performance Monitoring

Answer: D

7. Your customer is running a Linux-based application on a c-Class server blade and has a performance issue with the application response time. What are the first actions in helping your customer resolve the performance problem? (Select two.)

- A. develop an action plan
- B. complete an environmental assessment
- C. use the Onboard Administrator to update all firmware
- D. determine the tools to use and gather performance data
- E. determine one or more possible reasons for a bottleneck

Answer: BD

8. Which power delivery modes are supported on the HP BladeSystem c-Class? (Select two.)

- A. AC redundant
- B. active/standby
- C. UPS redundant
- D. power supply redundant

Answer: AD

9. What are the common chipsets available for the Fibre mezzanine cards on the c-Class BladeSystem? (Select two.)

- A. Intel
- B. AMD
- C. QLogic
- D. Emulex
- E. Adaptec

Answer: CD

10. For optimal performance of an Infiniband switch in an HP BladeSystem c-Class, where should the mezzanine card in the blade server be installed?

- A. PCI-X slot 1
- B. any PCIe x4 slot
- C. Mezzanine position 1
- D. Mezzanine position 2

Answer: D

11. Where does Performance Management Pack (PMP) derive its statistical analysis from?

- A. CPU Management Port using Microsoft Management Protocol (MMP)
- B. Insight Management Agents using Simple Network Management Protocol (SNMP)
- C. Integrated Performance Management chip using the Desktop Management Protocol (DMI)

D. Integrated Performance Management chip using Simple Network Management Protocol (SNMP)

Answer: B

12. What happens if you install an Emulex 4Gb Fibre Channel HBA card in mezzanine position 1 of the ProLiant BL480c server blades and Cisco Catalyst 3020 switch in interconnect bay 3?

A. The Onboard Administrator allows the Cisco Catalyst 3020 switch to boot up, but disables its downlink ports.

B. The Onboard Administrator allows the Cisco Catalyst 3020 switch to boot up, but disables the mezzanine card.

C. The Onboard Administrator does not allow the Cisco Catalyst 3020 switch to boot up because of the mismatch with the mezzanine card.

D. The Onboard Administrator does not allow the ProLiant BL480c server blades to boot up because of the mismatch with the interconnect switch.

Answer: C

13. What is the default IP address of the front diagnostics port of a p-Class server blade?

A. 127.0.0.1

B. 192.168.1.1

C. 192.168.1.2

D. 192.168.1.5

Answer: B

14. Which UNIX tool is capable of sending an alarm when one of the metrics exceeds a user-defined threshold?

A. sar

B. top

C. iostat

D. vmstat

E. glance

Answer: E

15. Which feature of PMP enables you to compare a newly established performance baseline with a previously created one?

A. static analysis

B. offline analysis

C. online analysis

D. comparative analysis

Answer: B

16. Which tool is designed to reduce the risk of security threats by automating acquisition and deployment of patches, and continuously enforcing their persistence in the Windows operating system environment?

A. Integrated Lights Out (iLO)

B. Virtual Machine Management (VMM)

C. Performance Management Pack (PMP)

D. Vulnerability and Patch Management (VPM)

Answer: D

17. Which database is supported by HP Vulnerability and Patch Management (VPM)?

A. Oracle

B. MySQL

C. Postgresql

D. Microsoft SQL

Answer: D

18. Which Windows Performance Monitor counter is the most important counter for detecting memory bottlenecks in a Windows environment?

- A. disk:writes/second
- B. disk:pages/second
- C. paging file/%usage
- D. disk:pagefaults/second

Answer: B

19. Click the Exhibit button.

You are troubleshooting a configuration problem with linked c7000 enclosures and need to connect directly to the Onboard Administrator with a PC.

Which port is correct to use?

- A. port 1 of the top enclosure
- B. port 1 of the bottom enclosure
- C. port 4 of the top enclosure
- D. port 4 of the bottom enclosure
- E. port 5 of the top enclosure
- F. port 5 of the bottom enclosure

Answer: E

20. Where can you change the rebuild priority for a Smart Array controller on a BL460c?

- A. ACU
- B. ORCA
- C. RBSU
- D. Onboard Administrator

Answer: A
