- C. owner name
- D. manufacturer
- E. operating system
- F. primary node name
- G. owner phone number

Answer: BEF

2. Which event sources can be monitored using agentless monitoring with OM for Windows? (Select two.)

- A. SNMP
- B. process monitors
- C. Windows event logs
- D. Windows service monitors
- E. Windows Management Interface

Answer: AE

3. Which management environment/situation would require you to purchase Target Connector licenses? (Select two.)

- A. individual external nodes monitored via SNMP
- B. receiving messages from a SiteScope integration
- C. one license only per external node covering an IP range
- D. receiving messages from a Microsoft System Center integration
- E. configured but non-deployed managed nodes that are created for server-based flexible management

Answer: AD

4. To log in to the web console, you must supply the user name and password of a user that is a member of which user groups? (Select three.)

- A. Users
- B. Administrators
- C. Domain Users
- D. HP-OVE-GROUP
- E. HP-OVE-ADMINS
- F. HP-OVE-OPERATORS

Answer: BEF

5. Which capabilities are available for monitoring agentless nodes with OM for Windows? (Select two.)

- A. heartbeat polling
- B. all monitoring through the use of policies requires a proxy system
- C. no requirement for additional software or OM for Windows licenses
- D. direct monitoring of SNMP and WMI without the use of a proxy system
- E. any OM for Windows policy type can be utilized when using a proxy system

Answer: AB

6. What are the roles of the message/action agent? (Select three.)

- A. receiving action requests from the action server
- B. forwarding messages to a trouble ticket system
- C. communicating with multiple management servers
- D. running multiple commands and tools simultaneously
- E. buffering messages in case the management server is NOT available

Answer: CDE

7. What are the functions of the message server in OM for Windows? (Select two.)

- A. The message server receives messages from nodes.
- B. The message server publishes message state changes via WMI.
- C. The message server forwards messages to a trouble ticket system.
- D. The message server stores audit information in the SQL server database.
- E. The message server queues messages if the communication to the console is broken.

Answer: AB

8. What happens if you have placed version 1.0 of a policy in Policy Management->Policies Groups->MyWebServers and then create version 1.1 of the same policy below Policy Management->Policies Grouped by Type?

- A. Version 1.0 and version 1.1 of the policy are now in the policy group.
- B. Version 1.0 of the policy in the policy group is automatically updated to version 1.1.
- C. Version 1.0 of the policy in the policy group is NOT automatically updated to version 1.1.
- D. Version 1.1 of the policy CANNOT be created because version 1.0 is already in a policy group.

Answer: C

9. With what can you export/import user roles?

- A. ovpmutil
- B. ovextract
- C. opccfgdwn and opccfgupld
- D. user roles configuration editor

Answer: A

10. What are the roles of the status engine? (Select two.)

- A. The status engine reports on status of commands and tools.
- B. The status engine ignores messages that are owned by operators.
- C. The status engine maintains the status of node groups assigned to operator(s).
- D. The status engine maintains the status of a service, service component and hosted services.

Answer: CD

11. User roles can be applied to members of which Windows user group?
