

HP0-Y15 braindumps

HP Certification I

HP0-Y15:

Practice Exam: HP0-Y15 Exams

Exam Number/Code: HP0-Y15

Exam Name:

Questions and Answers: 140 Q&As

([Certification I](#))

Exam : [HP0-Y15](#)

"", also known as HP0-Y15 exam, is a HP certification. With the complete collection of exam questions, Just4Study has assembled to take you through 140 Q&As to your HP0-Y15 exam preparation. In the HP0-Y15 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for HP Certification I HP0-Y15 () examination of original title complete coverage. HP0-Y15 exam questions help you pass the exam.

Just4Study HP0-Y15 Feature:

* High quality - High quality and valued for the HP0-Y15 Exam: 100% Guarantee to Pass Your HP0-Y15 exam and get your Certification I certification.

* Authoritative - Authoritative braindumps with complete details about HP0-Y15 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Certification I resources, you will minimize your **HP Certification I** cost and be ready to pass your HP0-Y15 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Certification I demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the HP0-Y15 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free HP0-Y15 Demo Download

Just4Study offers free demo for Certification I HP0-Y15 exam (). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP Certification I HP0-Y15** examination of original title complete coverage. HP0-Y15 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-Y15

Exam Name: (Certification I)

Questions and Answers: 140 Q&A

[HP HP0-Y15](#) Test belongs to one of the Certification I certified test, if needs to obtain the Certification I certificate, you also need to participate in other related test, the details you may visit the [Certification I](#) certified topic, in there, you

will see all related Certification I certified subject of examination.

Just4Study professional provide Certification I HP0-Y15 the newest Q&A, completely covers HP0-Y15 test original topic. With our complete Certification I resources, you will minimize your Certification I cost and be ready to pass your HP0-Y15 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-Y15

Title : ProCurve Network Access Control

1. Which statements are true about the DHCP quarantine method? (Select two.)

- A. The DNS server for a quarantine subnet is assigned by the enterprise DHCP server.
- B. A quarantine subnet consists of a set of IP addresses dynamically assigned to endpoints.
- C. Endpoint Integrity can be managed for endpoints with static IP addresses by defining exceptions.
- D. A non-quarantine IP address is assigned by the NAC 800 after an endpoint passes integrity testing.
- E. Port 2 of the NAC 800 can be connected to a switch that provides a path to multiple DHCP servers.

Answer: BE

2. A ProCurve 5406zl switch is connected to port 1 of a ProCurve NAC 800 and a DHCP server is connected to port 2 of the NAC 800. You are planning to deploy the ProCurve NAC 800 with the DHCP quarantine method using a shared subnet approach. Which configuration requirement must be satisfied?

- A. The quarantine and non-quarantine subnets defined on the NAC 800 must be the same.
- B. The switch requires that separate VLANs be defined for the quarantine and non-quarantine subnets.
- C. Each switch VLAN supporting the endpoints must use a single IP helper set to the IP address of the NAC 800.
- D. The scope on the DHCP server and the quarantine subnet on the NAC 800 must use non-overlapping IP addresses.

Answer: D

3. Which statements are true about licensing operation on the ProCurve NAC 800? (Select three.)

- A. Endpoints defined as exceptions use a license entry.
- B. License usage is tracked based on unique endpoint MAC addresses.
- C. A Management Server without a license key can support only one Enforcement Server.
- D. A Combination Server without a license key can support only one endpoint for integrity testing and management.
- E. After a device disconnects from the network, the license entry is locked until the lease time for the IP address expires.

Answer: BCD

4. Which configuration task is applicable to the ProCurve NAC 800 inline quarantine method?

- A. Enable the internal firewall.
- B. Specify one or more quarantine subnets.
- C. Add IP address entries to the Accessible Services List.
- D. Select the port to be used for connection to the external network.
- E. Identify the static and DHCP IP address ranges of endpoints to monitor.

Answer: C

5. Which statements are true about ProCurve NAC 800 hardware features? (Select two.)

- A. Only Ethernet port 1 responds to ping requests.
- B. Ethernet port 2 is used to access the Web management interface.
- C. The LCD menu and control buttons can be used to initiate a factory image recovery.

- D. Up to two Ethernet 10/100/1000 Mbps ports are supported depending on the quarantine method.
- E. The console port cable supported for out-of-band management access has an RJ-45 connector.

Answer: DE

6. A network is configured to support a ProCurve NAC 800 operating with the DHCP quarantine method. The NAC 800 is located between a ProCurve 3500yl switch and a DHCP server. How is DHCP traffic processed when an endpoint, that is currently unknown to the NAC 800, sends a DHCP request for an IP address?

- A. The switch requests the endpoint's integrity state from the NAC 800 before forwarding to the DHCP server.
- B. If the NAC 800 receives a DHCP request addressed to the DHCP server, the request is blocked by the NAC 800.
- C. The DHCP server checks the endpoint's integrity state passed to it by the NAC 800 before responding with an IP address.
- D. The DHCP server responds with a quarantine IP address initially and waits for the NAC 800 to indicate the endpoint has passed integrity testing.

Answer: B

7. Which deployment factor needs to be considered when using the ProCurve NAC 800 inline quarantine method?

- A. The NAC 800's internal DHCP server may not provide optimal performance for a very large population of endpoints.
- B. It requires administrator expertise to tailor the internal firewall rules to manage each distinct network environment.
- C. Any entry added to the Accessible Services List must be specified using an IP address instead of a DNS name.
- D. Only 802.1X authentication using an external RADIUS server is supported for endpoints that have passed integrity testing.

Answer: C

8. Which statement is true about the Accessible Services List?

- A. It identifies Internet destinations that endpoints can access after passing Endpoint Integrity testing.
- B. You can configure an IP address and port number of a service that can be accessed by a quarantined endpoint.
- C. The default entries identify services in the enterprise network that can be accessed regardless of Endpoint Integrity state.
- D. It identifies external RADIUS servers the NAC 800 can provide proxy access to when the local RADIUS option is enabled.

Answer: B

9. Which infrastructure defense capabilities are provided by the ProCurve ProActive Defense network security solution? (Select two.)

- A. phishing protection
- B. connection rate filtering
- C. managed security services
- D. vulnerability assessment database
- E. spoofing protection of DHCP traffic

Answer: BE

10. What is an important factor to consider when deploying the ProCurve NAC 800 using the DHCP quarantine method?

- A. The IP address lease duration must be set to five minutes or less on the DHCP server.
- B. The DHCP server requires one additional, non-overlapping scope for every existing DHCP scope.
- C. A switch must support traffic mirroring for each DHCP server protected by the NAC 800.
- D. Endpoint Integrity cannot be enforced for devices using static IP addresses.
- E. The DNS server scope option on the DHCP server must be set to the IP address of the NAC 800.

Answer: D

11. Which statement is true about the ProCurve NAC 800 inline quarantine method? (Select two.)

- A. Port 2 is usually connected to a gateway device such as a ProCurve Secure Router 7000dl.
- B. The NAC 800 provides optional user authentication for endpoints that have passed integrity testing.

- C. This method uses a quarantine subnet to limit network access by quarantined or unknown endpoints.
- D. The Accessible Services List is not supported by this method when quarantined devices are located in an external network.
- E. The NAC 800 functions like a Layer 2 bridge except that it also has a firewall that controls traffic flowing between its two ports.

Answer: AE

12. You are configuring a ProCurve NAC 800 to operate using the DHCP quarantine method. Which parameters are specified when adding a quarantine area? (Select three.)

- A. IP address of the DHCP server
- B. IP address of a RADIUS server
- C. IP address of a default gateway
- D. range of quarantine IP addresses
- E. lease duration time for IP addresses
- F. non-quarantine subnet using CIDR notation
- G. IP address of a DNS server for quarantine subnet
- H. static route for endpoints to use when quarantined

Answer: CDF

13. In a network that includes an Endpoint Integrity solution, which component does a ProCurve Switch 5400zl series correspond to in the Trusted Network Connect architecture?

- A. Network Access Requester
- B. Network Access Authority
- C. Policy Enforcement Point
- D. Policy Decision Point

Answer: C

14. A network is configured to support a ProCurve NAC 800 operating with the DHCP quarantine method. How does an endpoint transition from a quarantine IP address to a non-quarantine IP address after passing integrity testing?

- A. The NAC 800 triggers the switch to re-authenticate the endpoint causing a new DHCP request to be issued.
- B. The NAC 800 sends a DHCP release to the endpoint followed by a DHCP assignment message with the IP address.
- C. The switch stops forwarding DHCP requests from the endpoint to the NAC 800 and instead sends them to the DHCP server.
- D. Any subsequent DHCP request from the endpoint is allowed by the NAC 800 to pass to the DHCP server.

Answer: D

15. Which statement is true about the ProCurve ProActive Defense strategy?

- A. It achieves better-performing, more scalable networks by using high capacity core resources.
- B. It operates at a safe distance from the points of attack and the network resources being attacked.
- C. It makes access and policy enforcement decisions where users and applications connect to the network.
- D. It creates a cost-effective management framework by using core infrastructure protection measures.

Answer: C

16. Network security can be described in terms of multiple layers of security. Which action is an example of a perimeter security measure?

- A. ACLs applied at the core
- B. limiting switch access to RADIUS users
- C. using a secure OS for network application servers
- D. installing a firewall

Answer: D

17. Network security can be described in terms of multiple layers of security. Which security layer does an

unauthorized VLAN correspond to?

- A. infrastructure defense
- B. network access control
- C. control protocol detection
- D. network immunity protection
- E. device-to-device authentication

Answer: B

18. A ProCurve 3500yl switch is connected to port 1 of a ProCurve NAC 800 and a DHCP server is connected to port 2. The DHCP server IP address is 10.1.10.10/24. The NAC 800 IP address is 10.1.10.20/24. The IP address 10.1.24.1/24 is assigned to VLAN 24 on the switch.

Which additional configuration settings would be appropriate for supporting a 10.1.24.0/24 non-quarantine subnet and a 10.1.25.0/24 quarantine subnet? (Select two.)

- A. on the switch, a multinetted IP address of 10.1.25.1/24 assigned to VLAN 24
- B. on the NAC 800, the IP address of the DHCP server specified as 10.1.10.10/24
- C. on the NAC 800, IP addresses 10.1.24.51 through 10.1.24.100 defined as exceptions
- D. on the switch, the IP helper addresses 10.1.10.10 and 10.1.10.20 defined for VLAN 24
- E. on the DHCP server, one scope for 10.1.24.0/24 and a second scope for 10.1.25.0/24

Answer: AD

19. You have just downloaded a system upgrade for the ProCurve NAC 800 using a Web browser on a management station. The system upgrade has been stored on a USB drive and the USB drive has been connected to the ProCurve NAC 800 USB port. What must be done to install the system upgrade from the local USB drive? (Select three.)

- A. The install script must be executed.
- B. The ProCurve Services Partition must be activated.
- C. The access mode must be temporarily set to allow all.
- D. The USB drive must be accessed using the cd command.
- E. The compressed file must be unpacked using the tar command.
- F. A console or SSH session must be established using the root user account.

Answer: DEF

20. You have just completed the initial setup process of the ProCurve NAC 800 using the Web management interface. Which statements are true about the current configuration settings? (Select three.)

- A. The access mode is normal.
- B. All testing methods are disabled.
- C. The root user account is disabled.
- D. One policy group named Default is defined.
- E. An hourly schedule for test updates is active.
- F. All Ethernet ports are blocked except for Web management access.

Answer: ADE
