Exam : [JN0-522](#)

"Juniper Networks Certified Internet Associate, FWV (JNCIA-FWV)", also known as JN0-522 exam, is a Juniper Networks certification. With the complete collection of exam questions, Just4Study has assembled to take you through 266 Q&As to your JN0-522 exam preparation. In the JN0-522 exam resources, you will cover every field and category in Juniper Networks Certification helping to ready you for your successful Juniper Networks Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Juniper Networks JNCIA JN0-522 (Juniper Networks Certified Internet Associate, FWV (JNCIA-FWV)) examination of original title complete coverage. JN0-522 exam questions help you pass the exam.

Just4Study JN0-522 Feature:

* High quality - High quality and valued for the JN0-522 Exam: 100% Guarantee to Pass Your JN0-522 exam and get your JNCIA certification.

* Authoritative - Authoritative braindumps with complete details about JN0-522 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed JNCIA resources, you will minimize your **Juniper Networks JNCIA** cost and be ready to pass your JN0-522 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free JNCIA demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the JN0-522 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free JN0-522 Demo Download

Just4Study offers free demo for JNCIA JN0-522 exam (Juniper Networks Certified Internet Associate, FWV (JNCIA-FWV)). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Juniper Networks JNCIA JN0-522** examination of original title complete coverage. JN0-522 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: JN0-522

Exam Name: Juniper Networks Certified Internet Associate, FWV (JNCIA-FWV)(JNCIA)

Questions and Answers: 266 Q&A

[Juniper Networks JN0-522](#) Test belongs to one of the JNCIA certified test, if needs to obtain the JNCIA certificate, you also need to participate in other related test, the details you may visit the [JNCIA](#) certified topic, in there, you will see all related JNCIA certified subject of examination.

Just4Study professional provide JNCIA JN0-522 the newest Q&A, completely covers JN0-522 test original topic. With our complete JNCIA resources, you will minimize your JNCIA cost and be ready to pass your JN0-522 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Juniper JN0-522

Title : FWV,Associate(JNCIA-FWV)

1. Tunnel binding is accomplished during which part of the VPN configuration process?

- A. Phase 1
- B. Phase 2
- C. Route Creation
- D. Replay protection
- E. Tunnel Interface Creation

Answer: B

2. By default, from which hardware component is the startup copy of the ScreenOS loaded?

- A. ROM
- B. NVRAM
- C. TFTP server
- D. Internal Flash
- E. PCMCIA Card

Answer: D

3. By default, from which hardware component is the startup copy of the ScreenOS loaded?

- A. NVRAM
- B. TFTP server
- C. internal flash
- D. PCMCIA card

Answer: C

4. Click the Exhibit button.

In the exhibit, you configure NAT-src to translate traffic from the Corporate zone to the Internet zone and do not specify a DIP.

Which address will be used as the outbound source address?

- A. 143.45.56.1
- B. 143.45.56.254
- C. NAT-src requires a DIP
- D. the original source address

Answer: A

5. Which statement is correct regarding administrator privileges?

- A. Any Administrator can change their privileges on an as-needed basis

- B. Administrator privileges can only be established and changed by the Root Administrator
- C. Administrator privileges can be established and changed by the Root and All-privilege Administrator
- D. Administrator privileges can only be established by the Root and can be changed by the Root and All-privilege Administrator

Answer: B

6. A ScreenOS firewall has one interface in the user zone and one interface in the servers zone. Both interfaces are addressed and active. The configured policy allows user traffic from the user zone to the FTP server in the servers zone, but the traffic does not cross the firewall from the client to the server.

What is the most likely problem with the firewall?

- A. The ScreenOS firewall has no physical connection to the FTP server.
- B. The ALG option on the ScreenOS firewall has not been enabled for FTP traffic.
- C. The ScreenOS firewall does not have a route defined to the FTP server's subnet.
- D. The ScreenOS firewall does not have a route defined to the FTP client's subnet.

Answer: C

7. Using the CLI, if the startup copy of the ScreenOS is corrupted, from which location can an image be loaded?

- A. TFTP server
- B. internal flash
- C. PCMCIA card
- D. Compact Flash Card

Answer: A

8. Which statement best describes the 'config rollback' feature?

- A. Once the 'config rollback' feature is enabled; it allows the administrator to re-apply a previously saved configuration file from Flash
- B. The 'config rollback' feature is enabled by default; it allows the administrator to re-apply a previously saved configuration file from Flash
- C. Once the 'config rollback' feature is enabled; it allows the administrator to re-apply a locked configuration file from a separate area in Flash
- D. Once the 'config rollback' feature is enabled; it allows the administrator to revert to the prior ScreenOS image in the event an upgrade operation aborts
- E. Once the 'config rollback' feature is enabled; it allows the administrator to revert to the prior ScreenOS image or configuration file in the event an upgrade operation aborts

Answer: C

9. What are the advantages of multiple virtual routers on a NetScreen device?

- A. It creates more secure routing tables that are simpler to administer
- B. It reduces packet-forwarding overhead associated with layer-3 operations
- C. It increases the number of possible routing table entries per NetScreen device
- D. It makes it possible to forward traffic between security zones without a policy lookup

Answer: A

10. Which form of NAT performs bi-directional translation?

- A. VIP
- B. MIP
- C. DIP
- D. NAT-dst
- E. NAT-src

Answer: B

11. Using the CLI, if the startup copy of the ScreenOS on a NS-204 is corrupted, from which two (2) alternate locations can an image be loaded?

- A. ROM
- B. TFTP server
- C. Internal Flash
- D. PCMCIA Card
- E. Compact Flash Card

Answer: BE

12. Click the Exhibit button.

What does this icon indicate?

- A. Logging is enabled on a policy.
- B. Counters are enabled on a policy.
- C. Scheduling is enabled on a policy.
- D. Authentication is enabled on a policy.

Answer: B

13. What is the default mode for an interface in the trust zone?

- A. NAT
- B. route
- C. Layer 2
- D. Layer 3
- E. transparent

Answer: A

14. The CLI command, 'set policy from untrust to trust "ANY" "ANY" "ANY" Permit' is the default configuration policy on which NetScreen device?

- A. NetScreen 500
- B. NetScreen-5XT
- C. NetScreen-5XP
- D. None of the above
- E. NetScreen-200 series

Answer: D

15. Which command is used to avoid IP fragmentation when configuring IPSec on a ScreenOS device?

- A. set flow
- B. set tcp-mss flow
- C. set flow tcp-mss
- D. set mss-flow size

Answer: C

16. Which statement about multi-cell policies is true?

- A. You can apply the negate option to services.
- B. You can apply the negate option to a source address.
- C. You can only use the WebUI to configure multi-cell policies.
- D. You can add up to 32 different addresses or services per cell.

Answer: B

17. Which two statements are accurate about tunnel mode? (Choose two.)

- A. In tunnel mode the IPSec header precedes the original IP header.
- B. Tunnel mode is required in IPSec networks where ESP packets are used.
- C. Tunnel mode is the default mode of operation for IPSec in ScreenOS devices.
- D. Tunnel mode can only be used when operating between IPSec security gateways.

Answer: AC

18. In the packet flow decision process, which pair identifies interzone traffic?

- A. source and destination MAC
- B. source and destination interface
- C. source and destination TCP port
- D. source and destination IP address

Answer: B

19. What are two benefits of configuring a ScreenOS device in transparent mode? (Choose two.)

- A. There is no need to reconfigure the IP addresses of routers or protected servers.
- B. There is no need to create MIPs or VIPs for incoming traffic to reach protected servers.
- C. Policies are easier to create since you do not have to include source and destination IP addresses.
- D. The product can support more VPNs and obtain greater throughput because there is less overhead to manage.

Answer: AB

20. Click the Exhibit button.

In the exhibit, on which interface would you configure a VIP for translating inbound traffic destined for the partner servers?

- A. E1
- B. E2
- C. E7
- D. E8
- E. You cannot use a VIP in this environment; a VIP must be configured in the Untrust zone.

Answer: E
