LOT-801: IBM Lotus Notes Domino 8 Application Development Update

Practice Exam: LOT-801 Exams

Exam Number/Code: LOT-801

Exam Name: IBM Lotus Notes Domino 8 Application Development Update

Questions and Answers: 120 Q&As

([Lotus Certification](#))

Exam : [LOT-801](#)

"IBM Lotus Notes Domino 8 Application Development Update", also known as LOT-801 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 120 Q&As to your LOT-801 exam preparation. In the LOT-801 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM Lotus Certification LOT-801 (IBM Lotus Notes Domino 8 Application Development Update) examination of original title complete coverage. LOT-801 exam questions help you pass the exam.

Just4Study LOT-801 Feature:

* High quality - High quality and valued for the LOT-801 Exam: 100% Guarantee to Pass Your LOT-801 exam and get your Lotus Certification certification.

* Authoritative - Authoritative braindumps with complete details about LOT-801 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Lotus Certification resources, you will minimize your **IBM Lotus Certification** cost and be ready to pass your LOT-801 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Lotus Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the LOT-801 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free LOT-801 Demo Download

Just4Study offers free demo for Lotus Certification LOT-801 exam (IBM Lotus Notes Domino 8 Application Development Update). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **IBM Lotus Certification LOT-801** examination of original title complete coverage. LOT-801 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: LOT-801

Exam Name: IBM Lotus Notes Domino 8 Application Development Update(Lotus Certification)

Questions and Answers: 120 Q&A

IBM LOT-801 Test belongs to one of the Lotus Certification certified test, if needs to obtain the Lotus Certification certificate, you also need to participate in other related test, the details you may visit the [Lotus Certification](#) certified topic, in there, you will see all related Lotus Certification certified subject of examination.

Just4Study professional provide Lotus Certification LOT-801 the newest Q&A, completely covers LOT-801 test original topic. With our complete Lotus Certification resources, you will minimize your Lotus Certification cost and be ready to pass your LOT-801 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM LOT-801

Title : IBM Lotus Notes Domino 8 Application Development Update

1. Nina has been asked to add several views to the Sales.nsf database, many of which are to include multiple sorted columns and multiple user-sortable columns. How can she help minimize the impact to the server from these new views?

- A. Select the "Defer index creation until first use" Advanced Option from the Advanced tab of the database properties.
- B. Open each view that includes sorted or user-sortable columns. Select the "Defer index creation until first use" Index option from the Advanced tab of the view properties.
- C. Open each view that includes sorted columns. From the Sorting tab of the column properties of each sorted column, select the "Defer index creation until first use" option.
- D. Open each view that includes a user-sortable column. From the Sorting tab of the column properties of each user-sortable column, select the "Defer index creation until first use" option.

Answer: D

2. Kyle is designing a Composite Application that can send a user name from a form to a view, by clicking a button on the form. He knows he wants to define a Wiring property called ReceiveUserName that will be used when the view is receiving a user name string that is published by the form. When he opens the Property Broker Editor to define "ReceiveUserName", what does he define it as?

- A. Type
- B. Action
- C. Event
- D. Property

Answer: B

3. Samir wants to design and deploy a Composite Application that consists of components from two Lotus Notes databases that both reside on the same Domino Server. He would like to include the Composite Application definition inside one of the Lotus Notes databases, to make it easier to deploy and replicate. Can he do this?

- A. No, a Composite Application definition must be hosted on a WebSphere Portal server.
- B. No, a Composite Application definition must reside in a Lotus Notes database that is based on the "Blank Composite Application" template.
- C. Yes, he simply needs to click the "New Composite Application" button in the Composite Applications - Application section of the Database design and begin writing the definition.
- D. Yes, but first he needs to define the Composite Application in the Composite Application Editor and save the resulting XML file. Then he can create a new definition in the Composite Applications - Application section of the Database design and import the XML.

Answer: D

4. Beatrice created a new Composite Application database in the Notes 8 client, but when she opens it up she sees a

grey page that says "This Application page does not contain any content." What does she have to do next?

- A. Click the menu option "View - Design" to open the database in Domino Designer to edit the Composite Application definition.
- B. Click the menu option "Actions - Edit Application" to open the database in the Composite Application Editor to edit the Composite Application definition.
- C. Double-click the grey page to open the database in the Composite Application Editor to edit the Composite Application definition.
- D. Right-click the grey page to open the database in Domino Designer to edit the Composite Application definition.

Answer: B

5. Scott has just created a new NSF-based Composite Application. He has added two components to his application and is about to close the Composite Application Editor (CAE). What does he need to do if he now wants to see how his Composite Application appears in the user interface?

- A. Scott will not be able to open the Composite Application within the user interface yet. The database launch properties must first be set to "Launch as Composite Application".
- B. Nothing. The CAE is opened from within the Composite Application. When Scott exits the CAE, he is automatically presented again with the Composite Application, open in the user interface.
- C. Scott will not be able to open the Composite Application within the user interface yet. He will first need to open the Composite Application using Domino Designer and set the Wiring Properties.
- D. When Scott exits the CAE, he is back at the Notes Workspace, just as when exiting other NSF-based applications. Double-click on the Composite Application's icon on the Workspace to open it in the user interface.

Answer: B

6. When Bert is designing his Composite Application, he wants to have a Notes view that publishes a UserName property to another view and also to a Notes form that is open in edit mode. How does he do this?

- A. He simply uses the Composite Application Editor to wire all three components together.
- B. He creates one Composite Application that wires the two views together, and then a second Composite Application that incorporates the first one, with the first view wired to the form.
- C. Because each component can only publish a single property, he has to wire the first view publish the user name to the second view, and then wire the second view to publish the user name to the form.
- D. Because he can publish a property only to a single component, he has to make his first view publish two properties (e.g. UserName1 and UserName2) that both have the same data, so that one of the properties is wired to the second view and the other is wired to the form.

Answer: A

7. Barry has just closed the Property Broker Editor after specifying input and output Action parameters for his Composite Application Editor (CAE). He notices a curved arrow icon in Domino Designer next to the name of the Wiring Property. What should Barry do to ensure that his changes are saved within his Domino application?

- A. Click the "Refresh" button, and then click the "Open" button in the window that displays.
- B. Nothing. The Property Broker automatically saves changes inside the Domino application.
- C. Click the "Merge WSDLs" button and click "OK" in the confirmation prompt that then displays.
- D. Open the Wiring Property properties and ensure that the "Store in NSF" option is selected. The changes will be saved within the Domino application when Domino Designer is closed.

Answer: A

8. Kristen has been asked to develop a Composite Application to "wire" the Customer, Orders, and Inventory applications together. She understands that this will result in communication among the different pieces of the new application. How does this communication work?

- A. Components use the Composite Application Broker to communicate with each other. The Composite Application Editor is used to define Actions and their parameters, and to configure Property Broker options.
- B. Components use the Composite Application Broker to communicate with each other. The Composite Application Editor is launched from Domino Designer to define Broker Properties and configure Actions and their parameters.
- C. Components use the Property Broker to communicate with each other. The Property Broker Editor is launched

directly from Domino Designer (or can be launched via the CAE) to define Properties and configure Actions and their parameters.

D. Components use the Property Broker to communicate with each other. Domino Designer must first be used to define the Wiring Properties.

Composite Application Broker options can then be configured using the Composite Application Editor or from within Domino Designer.

Answer: C

9. Myrtle is modifying the design of a View in a Notes database, so it can update a published Property that the other components in a Composite Application can respond to. Where does she write code that updates a Property?

A. In a view action

B. In the OnSelect event of the view

C. In the QueryModeChange event of the view

D. In the Initialize subroutine of the Global section of the view

Answer: B

10. The new Rich Text Lite "Thumbnail" input type allows you to specify the height and width of the thumbnail image, along with what other attribute?

A. File type

B. Color depth

C. Image resolution

D. Attachment name

Answer: D
