

## LOT-803 braindumps IBM Lotus Certification

**LOT-803: Using LotusScript in IBM Lotus Domino 8 Applications**

**Practice Exam:** LOT-803 Exams

**Exam Number/Code:** LOT-803

**Exam Name:** Using LotusScript in IBM Lotus Domino 8 Applications

**Questions and Answers:** 151 Q&As

( [Lotus Certification](#) )

"Using LotusScript in IBM Lotus Domino 8 Applications", also known as LOT-803 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 151 Q&As to your LOT-803 exam preparation. In the LOT-803 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification. Exam : [LOT-803](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM Lotus Certification LOT-803 (Using LotusScript in IBM Lotus Domino 8 Applications) examination of original title complete coverage. LOT-803 exam questions help you pass the exam.

### **Just4Study LOT-803 Feature:**

\* High quality - High quality and valued for the LOT-803 Exam: 100% Guarantee to Pass Your LOT-803 exam and get your Lotus Certification certification.

\* Authoritative - Authoritative braindumps with complete details about LOT-803 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Lotus Certification resources, you will minimize your **IBM Lotus Certification** cost and be ready to pass your LOT-803 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free Lotus Certification demo before you decide to buy it in <http://www.Just4Study.com>.

### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the LOT-803 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

### **Free LOT-803 Demo Download**

Just4Study offers free demo for Lotus Certification LOT-803 exam (Using LotusScript in IBM Lotus Domino 8 Applications). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **IBM Lotus Certification LOT-803** examination of original title complete coverage. LOT-803 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

**VUE/Prometric Code: LOT-803**

Exam Name: Using LotusScript in IBM Lotus Domino 8 Applications( Lotus Certification )

Questions and Answers: 151 Q&A

**IBM LOT-803** Test belongs to one of the Lotus Certification certified test, if needs to obtain the Lotus Certification certificate, you also need to participate in other related test, the details you may visit the [Lotus Certification](#) certified topic, in there, you will see all related Lotus Certification certified subject of examination.

Just4Study professional provide Lotus Certification LOT-803 the newest Q&A, completely covers LOT-803 test original topic. With our complete Lotus Certification resources, you will minimize your Lotus Certification cost and be ready to pass your LOT-803 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

Exam : IBM LOT-803

Title : Using LotusScript in IBM Lotus Domino 8 Applications

1. Neala is using a hidden field on the Request form to store a temporary value for the request status. Since this field will not be stored, Neala has created it as a Computed for display field. Neala is trying to use the code below to set the tempStatus field to "Draft" when a new document is created with the Request form. An error message displays whenever a new Request is created. What could be the problem?

```
Sub Postopen(Source As Notesuidocument)
```

```
  If Source.IsNewDoc Then
```

```
    Call Source.FieldSetText( "tempStatus", "Draft" )
```

```
  End If
```

```
End Sub
```

- A. In order for the FieldSetText method to be used, a field must be editable. Hidden fields are not editable.
- B. The Postopen event occurs before the user has input focus, so only back-end methods will work from this event.
- C. In order for the FieldSetText method to be used, a field must be editable. Computed for display fields are not editable.
- D. The Postopen event occurs after the document has opened, but Computed for display fields are not available for manipulation until after the user has input focus.

Answer: C

2. The NotesStream class is used to read and write which of the following?

- A. Files
- B. Network sockets
- C. Domino server console commands
- D. Binary data in NotesRich Text fields (like attachments and inline images)

Answer: A

3. Avery has been asked to write a web service in his Domino application. The web service will allow an Oracle application to query the Movie Rental database with a member identification number and receive a list of all movies the member has rented in the last 30 days. What are the language options available to Avery for writing this web service?

- A. LotusScript and Java
- B. LotusScript, but not Java
- C. Java, but not LotusScript
- D. LotusScript, Java, and @Formula

Answer: A

4. For agents that run on new and modified documents, newly received mail documents, or newly modified documents, what method can you use to make each document as "processed" to ensure that a document gets processed by the agent only once (unless it's modified, mailed, or pasted again)?

- A. NotesView.UpdateAll
- B. NotesDocument.SetProcessed
- C. NotesDocumentCollection.Stamp
- D. NotesSession.UpdateProcessedDoc

Answer: D

5. Ichiro needs to write an agent to read a comma-delimited ASCII file of data about parts that his company uses when building computers. The data is from one of the parts suppliers, and includes 10 fields in each record. Ichiro needs to extract the Part Number, Part Description, and Price from each input record and update his company's Inventory database with the current data. How should Ichiro proceed?

- A. Create a user-defined data Type to represent a Part. Write a 'getter' method for each of the 3 fields that need to be accessed from the data Type.
- B. Create a user-defined class to represent the ASCII file. Write a 'getter' method to retrieve each record, and use the NotesStream.SplitText method to extract the fields.
- C. Create a user-defined class to represent the Parts data. Use notesDOMTextNode.SplitText( ", " ) to parse each field into the appropriate member variable.
- D. Create a user-defined data Type to represent the structure of the Parts data. Each field of a given input record can be referenced using the appropriate member variable.

Answer: D

6. Marvin wants to export a given Notes document to a DXL text file. How would he accomplish this task?

- A. He would use the NotesXMLTransformer class to copy the document directly to a text file
- B. He would use the ExportDXL method of the NotesDocument class to send the document to a NotesStream that writes to a text file
- C. He would create a NotesDXLExporter object, set the input to the Notes document in question, and set the output to a NotesDXLOutput object that writes to a text file
- D. He would create a NotesDXLExporter object, set the input to the Notes document in question, and set the output to a string that indicates the path of the text file he wants to create.

Answer: D

7. Given the following piece of code, where "doc" is a NotesDocument:

```
fieldValue = doc.GetItemValue("Title")  
Print "This document's title is" _fieldValue(0)
```

Which of the following is a correct example of using the "Extended class" syntax to replace the example code above?

- A. Print "This document's title is" \_doc.Title
- B. Print "This document's title is" \_doc.Title(0)
- C. Print "This document's title is" \_doc.GetField.Title
- D. Print "This document's title is" \_doc.GetField.Title(0)

Answer: B

8. Aitana is working in the company's Inventory database. She wants to create an array called 'Assembly' that will be used to reference 10 instances of the Part class. Aitana can create a single instance of the Part class using code like this:

```
Dim myPart As New Part
```

But she is having a problem creating the 'Assembly' array. What is wrong with the following line of code:

```
Dim Assembly(9) As New Part
```

- A. The New keyword cannot be used to declare an array of object reference variables.
- B. 'Assembly' is a reserved word in LotusScript, and cannot be used as a variable name.
- C. If an array declared as Assembly(9) is to hold 10 elements, Option Base 0 must be used.
- D. An array cannot be used to hold multiple Class instances.

Answer: A

9. The Salary form needs an AuditHistory field. When documents are changed, Sahir's script must record the

date/time, editor's name, and values of all changed fields before and after the change. The solution must also be usable in other forms, and must work without modification, even if new fields are added to the forms. How can Sahir do this?

- A. Write Entering event code for each field, recording field values. Write Exiting events to update AudiHistory if the values change.
- B. Write Postopen event code to populate a list with item names and item values as the document is opened. Write Querysave event code to examine current item values, and update AudiHistory for any changed items.
- C. Write onFocus event code to populate a hidden temporary field with the item values. Write onChange event code to update the AuditHistory if the field is changed.
- D. Write onload event code to populate a list with item names and item values as the document is opened. In the form onExit event, write code to examine current item values and update AudiHistory for any items that changed.

Answer: B

10. The error message "Error loading USE or USELSX module" can be caused by which of the following?

- A. An improperly defined Const value
- B. An ODBC connection that cannot be made
- C. An attempt to use NotesUIWorkspace in a background scheduled agent
- D. A script library that can't be found or needs to be recompiled using "Recompile All LotusScript"

Answer: D
