Exam : IBM LOT-834

Title : IBM Lotus Notes Domino 8 Application Dev Foundation Skills

1. Molly has a Notes application that is used by employees in Europe and Japan. Each group of employees has a server that is in their geographical location. Molly needs to have versions of her application in both locations for efficient access, and the application data and design must stay synchronized in both locations. How can Molly accomplish this?

- A. Create a copy of the database in each location by using the menu option File > Application > New Copy.
- B. Create a replica of the database in each location by using the menu option File > Replication > New Replica.
- C. Create a mirror of the database in each location by using the menu option File > Application > New Mirror.
- D. Create a synchronized copy of the database in each location by using the menu option File > Synchronization > New Copy.

Answer: B

2. Shandi has created a Suggestion database in Designer. She would like to create additional databases based on the Suggestion database design, and she would like to have them automatically updated whenever she changes the original design. How would she accomplish this?

- A. Select the Database Inheritance option for "Allow inheritance" in the additional databases.
- B. Select the Database Inheritance option for "Inherit from master template" in the additional databases.
- C. Select the Database Inheritance option for "Database file is a master template" in the original Suggestion database.
- D. Select the Database Inheritance option for "Allow other databases to inherit design" in the original Suggestion database.

Answer: C

3. Herb has some data to display in a form, and he would like to have it appear in a formatted grid. What option would he use to format this data layout?

- A. Create - Table
- B. Create - Layer
- C. Create - Section - Table
- D. Create - Layout Region - Table

Answer: A

4. Joe wants to display a company logo in the background of a view in his sales application. How can he do this?

- A. Use an Image Resource as the background graphic for the view.
- B. Use a URL as the background graphic for the view, where the URL points to the logo.
- C. Display the view in a frameset, and set the background of the view's frame to an Image Resource or URL depicting the logo.
- D. He can't do this. Views cannot have background graphics.

Answer: A

5. Colby has a default level access of Author in the Suggestion database. She created a new suggestion, but was unable to edit the document later. Why would this problem occur?

- A. The document does not have a Readers type field.
- B. The document does not have an Authors type field.
- C. She needs the "Edit document" option added to her access.
- D. She needs at least Editor access to edit her documents in the database.

Answer: B

6. Cheryl would like to have access to her mail file while she is traveling and disconnected from the network. Once she arrives at her destination, she wants to connect to the network and synchronize her mail file updates with the server version of her mail file. How can she accomplish this?

- A. Create a local copy her mail file.
- B. Create a local replica of her mail file.
- C. Create a local mirror copy of her mail file.
- D. Create a local synchronized copy of her mail file.

Answer: B

7. Tony wants to create a duplicate of the Video application. He wants to keep a version of the data on the same server as the production application but does not want any new documents or document modifications to be replicated into his new database once he creates it. Which one of the following should Tony do to create his archive?

- A. Create a new copy of the database.
- B. Create a replica copy of the database.
- C. Use Windows Explorer to create a copy of the database file.
- D. Create a replica copy of the database and disable replication on the database properties.

Answer: A

8. Christopher is making a new application using the NewVideo Design Template that he plans to customize. He wants to make sure that his new application will not get future modifications to the NewVideo Design Template. Which one of the following should Christopher do to accomplish this?

- A. Create a blank application and refresh the design of the new application using the NewVideo Design Template.
- B. Create a new application from the NewVideo Design Template and deselect "Inherit future design changes" in the New Application dialog box.
- C. Create the new application from the NewVideo Design Template and select "Lock Design Documents" in the application Design properties dialog box.
- D. Create the new application from the NewVideo Design Template and then open the application Design properties and select "Database is a master template"

Answer: B

9. Mac is planning a Change Control application that will be used by thousands of staff located in 10 different countries. What is one thing Mac can do to help optimize the performance of the application for his users?

- A. On the Advanced tab of Database properties, enable "Support specialized response hierarchy" and disable "Allow simple search".
- B. On the Advanced tab of Database properties, enable "Don't support specialized response hierarchy" and disable "Allow simple search".
- C. Use File > Application > New Copy to create a copy of the application on a server in each country, and have users access the application from a local server.
- D. Use File > Replication > New Replica to create a replica of the application on a server in each country, and have users access the application from a local server.

Answer: D

10. Which one of the following database elements is NOT updated when the DESIGN task is run?

- A. Forms
  - B. Views
  - C. Roles
  - D. Agents
- Answer: C
