Exam : IBM LOT-959

Title : IBM WebShere Portal 6.1 Application Development

1. The Web 2.0 theme with support for client-side aggregation is based on the differential page rendering (DPR) model. What key performance feature is provided by DPR?

- A. Caching of portlet content.
- B. Automatically converts server side portlets to client side portlets.
- C. Only refreshes portions of the page that were affected by user interaction.
- D. Allows faster performing portlets to render prior to slower running portlets.

Answer: C

2. A large motorcycle manufacturer has an internet portal that serves owners and dealers of their motorcycles. The motorcycle manufacturer has the asked the portal architect to provide options for providing portal users with features to share their experiences with their motorcycles, talk about rides they're taken, and join communities of other motorcycle riders with similar interests to theirs. What solution is available to enable these types of features within portal?

- A. The Content Accelerator provides these types of features.
- B. The Process Accelerator provides these types of features.
- C. The Dashboard Accelerator provides these types of features.
- D. The Collaboration Accelerator provides these types of features.

Answer: A

3. A medical equipment manufacturer has upgraded to WebSphere Portal V1 and would like to leverage features available in portlets running on a separate corporate portal. It is decided the integration will be implemented using WSRP 2.0. At a minimum what must be done in order to take advantage of the new WSRP 2.0 features such as resource serving in WebSphere Portal V1?

- A. Enable WSRP 2.0 in administration console.
- B. Build a consumer portlet based on the JSR 168 Portlet specification
- C. Build a consumer portlet based on the JSR 268 Portlet specification
- D. Integration with WSRP 2.0 not supported in WebSphere Portal V6.1

Answer: C

4. A customer has requirements to remotely search portal user profiles based on attributes of the profile using web services. How can this be accomplished in portal?

- A. By means of the Remote Portal Search Service
- B. By means of the Remote PUMA SPI REST Service
- C. By means of the Remote Virtual Member Manager Service
- D. By means of the user repository API and wrap web services around API calls

Answer: B

5. A traditional J2EE web application is being ported to WebSphere Portal V6.1 as a portlet application. It's expected many of the actions performed by the new portlet application will require significant processing to generate the expected output. To improve performance this output should be cached based on specific request parameters and attributes. What portal feature provides this type of caching?

- A. Portal Caching
- B. Session Caching
- C. Output Caching
- D. Portlet Fragment Caching

Answer: D

6. What additional step is necessary when deploying the Remote Rendering Portlet to a page that uses the client-side aggregation mode?

- A. No additional steps are necessary.
- B. Remove the Remote Rendering Portlet from the blacklist.
- C. Create an HTTP proxy for AJAX to allow the portlet to render content
- D. This is not possible as the Remote Rendering Portlet is not compatible with Portal Web 2.0 theme.

Answer: C

7. What browser restrictions, if any, exists for clients connecting to WebSphere Portal to display content?

- A. None
- B. Clients must be running Microsoft Internet Explorer V7 or Firefox V1.5.0.7
- C. Clients can run any version of Microsoft Internet Explorer or Firefox browsers
- D. Clients must be running Microsoft Internet Explorer V6 or greater or Firefox V2.0

Answer: A

8. How can a non-J2EE web application located on a separate domain from portal be integrated into portal without programming and provide bookmarkability?

- A. Configure non-J2EE application to display within RSS Portlet
- B. Configure non-J2EE application to display within iFrame Portlet
- C. Configure non-J2EE application to display within Web Content Viewer Portlet
- D. Configure non-J2EE application to display within WebSphere Application Integrator Portlet

Answer: D

9. What portlet is available from the IBM Portlet Catalog for integrating Google Gadgets for web pages into portal pages?

- A. Feed Reader Portlet
- B. WSRP Proxy Portlet
- C. Web Content Viewer Portlet
- D. IBM Portlet for Google Gadgets

Answer: D

10. The IT department of the UNSC company recently implemented portal and needs to surface some employee data in portlets. However they don't have any Java or Portal development experience and only a handful of them have developed web applications. Why would WebSphere Portlet Factory be a good choice for them?

- A. Portlet Factory can display their data in a sortable list without additional Java code.
- B. Portlet Factory can connect to their backend data.
- C. Portlet Factory will allow them to implement configurable portlets.
- D. Portlet Factory generates the Java code necessary to deploy portlets to WebSphere Portal without the developer knowing Java and allows them to focus on the UI and application logic.

Answer: D
