Exam : IBM LOT-981

Title : IBM Lotus Notes 8.5 Building the Infrastructure

1. Due to space considerations on her Domino server, Anissa has had to locate new databases under a folder not in the Domino data directory. Instead she has placed them on the F drive. Which one of the following should Anissa use to make these databases accessible to the users?

- A. Database Link
- B. Directory Link
- C. Profile Document
- D. File Protection Document

Answer: B

2. Latrice set up domain searching. Which one of the following is referenced when a domain search is made?

- A. Domain Catalog
- B. Database Catalog
- C. Domino Directory
- D. Directory Assistance

Answer: A

3. You have elected to create a marker so clients can update their reference to a database called MARKETING.NSF. However, you did not select a designated destination server. Which of the following is the result of this action?

- A. The client will remove the bookmark reference for the database
- B. The client will search all servers in the domain for a replica of the database and modify the bookmark
- C. The client will search all known cluster servers only for a replica of the database and modify the bookmark
- D. The client will prompt the user to specify servers to search for a replica of the database and modify the bookmark

Answer: A

4. The Domino administrator has created a response file for a silent server installation. What parameter must be run on the server to utilize this response file?

- A. setup.exe -silent -options c:tempinstall.txt
- B. nsetup.exe -silent -options c:tempinstall.txt
- C. setup.exe -response -options c:tempinstall.txt
- D. silent.exe -response -options c:tempinstall.txt

Answer: A

5. What are the two types of DDM Web probes?

- A. Uptime and Failure
- B. Logging and Failure
- C. Performance and Enabled

D. Best Practices and Configuration

Answer: D

6. A condensed Directory Catalog is defined as which of the following?

- A. A primary directory that is created by default upon the first Domino server installation
- B. An optional directory that aggregates user and group entries from one or more Domino Directories
- C. A required database that contains all of the databases on the server which is updated nightly through a default server task
- D. A database that performs a nightly task of removing duplicate person and group entries by comparing the primary and all secondary directories that are configured

Answer: B

7. Sal set up a mail routing event generator. What does this generator provide?

- A. It loads all mail tasks on the server
- B. Create entries in the EVLOG.NSF database
- C. It tests connectivity to all other mail servers in the domain
- D. It sends a mail trace message to a specified user's mail server

Answer: D

8. If the Fault Analyzer task locates duplicate fault reports, which is the next step the task will take?

- A. The new crash is reported as a response to the original crash
- B. The new crash is not reported due to it matching a previous fault reported
- C. The new crash is reported as a new document but a doclink is created to the original
- D. The new crash is reported as a new document and no reference to matching documents can be created

Answer: A

9. Billy wishes to use compression on his Domino servers for client connectivity. What steps must Billy do to make this function?

- A. Enable binding on the client port; restart the client; disable tunneling on the server port; restart the server port
- B. Disable binding on the client port; restart the client; enable encryption on the server port; restart the server port
- C. Enable compression on the server port; restart the server port; enable compression on the client port; restart the client
- D. Disable encryption on the server port; restart the server port; enable tunneling on the server port; restart the server port

Answer: C

10. You have noticed that the mail-in database that stores server diagnostic information is growing large. It is possible to limit messages for automatic diagnostic data collection by adjusting what setting?

- A. Diagnostic file patterns
- B. Maximum size of diagnostic message including attachments (in MB)
- C. Minimum size of collection message including attachments (in MB)
- D. The name of the mail-in database used for receiving automatic diagnostic data

Answer: B
