

## NS0-910 braindumps

### Network Appliance NAC-NIE

#### NS0-910: tCache Internet Access and Security

**Practice Exam:** NS0-910 Exams

**Exam Number/Code:** NS0-910

**Exam Name:** tCache Internet Access and Security

**Questions and Answers:** 100 Q&As

( [NAC-NIE](#) )

"tCache Internet Access and Security", also known as NS0-910 exam, is a Network Appliance certification. With the complete collection of exam questions, Just4Study has assembled to take you through 100 Q&As to your NS0-910 exam preparation. In the NS0-910 exam resources, you will cover every field and category in Network Appliance Certification helping to ready you for your successful Network Appliance Certification.

Exam : [NS0-910](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Network Appliance NAC-NIE NS0-910 (tCache Internet Access and Security) examination of original title complete coverage. NS0-910 exam questions help you pass the exam.

#### **Just4Study NS0-910 Feature:**

\* High quality - High quality and valued for the NS0-910 Exam: 100% Guarantee to Pass Your NS0-910 exam and get your NAC-NIE certification.

\* Authoritative - Authoritative braindumps with complete details about NS0-910 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed NAC-NIE resources, you will minimize your **Network Appliance NAC-NIE** cost and be ready to pass your NS0-910 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free NAC-NIE demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the NS0-910 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free NS0-910 Demo Download**

Just4Study offers free demo for NAC-NIE NS0-910 exam (tCache Internet Access and Security). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Network Appliance NAC-NIE NS0-910** examination of original title complete coverage. NS0-910 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

**VUE/Prometric Code: NS0-910**

Exam Name: tCache Internet Access and Security( NAC-NIE )

Questions and Answers: 100 Q&A

[Network Appliance NS0-910](#) Test belongs to one of the NAC-NIE certified test, if needs to obtain the NAC-NIE certificate, you also need to participate in other related test, the details you may visit the [NAC-NIE](#) certified topic, in there, you will see all related NAC-NIE certified subject of examination.

Just4Study professional provide NAC-NIE NS0-910 the newest Q&A, completely covers NS0-910 test original topic. With our complete NAC-NIE resources, you will minimize your NAC-NIE cost and be ready to pass your NS0-910 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Network Appliance NS0-910

Title : Network Appliance NetCache Internet Access and Security Exam

1. A router performs which one of the following functions for NetCache proxies?

- A. It fragments large packets into smaller chunks that the NetCache appliance can handle.
- B. It tags Etherchannel packets for pre-processing.
- C. It delivers inbound packets from other networks and sends outbound packets destined for other networks.
- D. It strips virus packets out before they can infect the NetCache appliance.

Answer: C

2. Which FOUR cache control headers below are valid? (Choose 4)

- A. Cache-Control: no-cache
- B. Pragma: do-not-cache
- C. Cache-Control: no-store
- D. Cache-Control: private
- E. Pragma: no-cache

Answer: ACDE

3. Which ICAP vectoring method does the anti-virus scanning use?

- A. RESPMOD\_PRECACHE
- B. REQMOD\_PRECACHE
- C. RESPMOD\_POSTCACHE
- D. REQMOD\_POSTCACHE

Answer: A

4. Given the following service farm configuration, which request will be directed to the ICAP application?

config.icapv1.farm3.attr = \marketing\_req\_precache REQMOD\_PRECACHE on rr on weak

- A. Requests about to be initiated by NetCache to the server
- B. Requests from the client before NetCache has initiated a request to the server
- C. Requests from the client after NetCache has initiated a request to the server
- D. Responses to requests initiated by NetCache after being cached on disk
- E. Responses to requests initiated by NetCache before being cached on disk

Answer: B

5. Which protocol entries are recorded in the Web access log file?

- A. HTTP, FTP, RTSP
- B. HTTP, FTP, Gopher
- C. RTSP, NNTP
- D. Telnet, SNMP, SSH

Answer: B

6. Which TWO of the following server types can function as a logging target for NetCache? (Choose 2)

- A. FTP
- B. CIFS
- C. HTTP
- D. NFS

Answer: AC

7. What is the difference between TCP\_MISS/200 and TCP\_HIT/200?

- A. The "miss" means that the requested object could not be found and an error is returned to the client. The "hit" means that TCP is used.
- B. The "miss" means...that the NetCache will use UDP instead. A "hit" means that TCP is used.
- C. he "miss" means...retrieved by the NetCache appliance. The "hit" means that the NetCache appliance already.
- D. The "miss" means that the object was in the cache but not available because either its TTL expired or the entry was flagged by a third party content filter such as a virus scanner. The "hit" means that the TTL was still current.

Answer: C

8. Which FOUR are licensed protocols? (Choose 4)

- A. DNS caching
- B. ICAP
- C. HTTPS Proxy
- D. HTTP Proxy
- E. GRM Server

Answer: BCDE

9. What is the advantage of using multiple authentication servers with a NetCache appliance?

- A. NetCache will deny requests if authentication isn't provided within 200ms.
- B. They ensure authenticated access if authentication server fails.
- C. They ensure authenticated access across multiple domains.
- D. Authentication uses encryption and is CPU-intensive.

Answer: B

10. Which FOUR are key steps in the authentication process? (Choose 4)

- A. verify protocol authentication settings (authenticates the user)
- B. verify ACL permission settings for the applicable group in the NetCache user database
- C. verify whether SmartFilter or WebWasher DynaLocator denies the request
- D. verify connectivity to logging server
- E. allow or deny the request, based on the results of the authentication process

Answer: ABCE

11. What is the command to view the names and locations of the log files from the command line?

- A. log -l
- B. nclog -l
- C. nclog -va
- D. show config.admin.log

Answer: B

12. Where is authentication server information logged?

- A. Web Access log
- B. Messages log
- C. FTP log
- D. client browser

E. SMB Instant Messaging

Answer: B

13. Of the following choices, which TWO are paths to configure logging? (Choose 2)

- A. Setup > System > Logging
- B. Setup > Maintenance > Logging
- C. Setup > HTTP > Logging
- D. Setup > Utilities > Logging

Answer: AC

14. Given the following entry from the Web Access log, what is the first column?

1098830250.899 0.001 10.41.72.45 TCP\_HIT\_ACCESS\_DENIED/407 496 GET http://www.cnn.com/bob - ""

- A. the size in bits
- B. the time stamp in Greenwich standard time
- C. the ID of the request
- D. the time stamp in UNIX epoch time

Answer: D

15. Given the following entry from the Web Access log, with the default access log format, what does the entry "bob" signify?

1098830250.899 0.001 10.41.72.45 TCP\_HIT\_ACCESS\_DENIED/407 496 GET http://www.cnn.com/bob - ""

- A. the user making the request
- B. the hostname of the appliance
- C. the page on the CNN site
- D. the client hostname making the request

Answer: A

16. Which FOUR steps are necessary to test that authentication is working properly with NTLM? (Choose 4)

- A. configure NTLM authentication
- B. add the appropriate ACLs to use authentication
- C. visit a Web site through the NetCache proxy
- D. inspect the Web Access log files for authentication activity
- E. enable packet tracing with pktt and analyze the results

Answer: ABCD

17. Which TWO of the following can be performed by using a proxy.pac file? (Choose 2)

- A. provide for failover protection
- B. check web pages for worms or viruses
- C. distribute requests to different NetCache proxy servers
- D. shut down the computer if the user doesn't authenticate promptly

Answer: AC

18. Given the following log entry from the Web Access log, with the default access log format, what does DIRECT mean?

1093891725.752 0.080 10.32.10.92 TCP\_MISS/200 10177 GET http://www.sbgs.org/sbgs.htm - DIRECT/209.68.147.66 "text/html"

- A. The object must be retrieved from a parent cache.
- B. The requested URL resides outside the firewall, and the URL maps to no parents or neighbors.
- C. The URL was fetched from the source.
- D. This NetCache has no valid parents or neighbors.

Answer: C

19. The NetCache appliance supports up to \_\_\_\_\_ SNMP communities.

- A. 4
- B. 8
- C. 16
- D. 32

Answer: B

20. Which FOUR will best prevent client disruption caused by hardware failure when using multiple proxies? (Choose 4)

- A. load balancer
- B. round-robin DNS
- C. direct browser configuration
- D. transparency utilizing WCCP
- E. autoconfiguration using a proxy.pac file

Answer: ABDE
