Network Appliance NAC-NIE

NS0-920: NetCache Deployment Options & Streaming

Practice Exam: NS0-920 Exams

Exam Number/Code: NS0-920

Exam Name: NetCache Deployment Options & Streaming

Questions and Answers: 60 Q&As

([NAC-NIE](#))

Exam : [NS0-920](#)

"NetCache Deployment Options & Streaming", also known as NS0-920 exam, is a Network Appliance certification. With the complete collection of exam questions, Just4Study has assembled to take you through 60 Q&As to your NS0-920 exam preparation. In the NS0-920 exam resources, you will cover every field and category in Network Appliance Certification helping to ready you for your successful Network Appliance Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Network Appliance NAC-NIE NS0-920 (NetCache Deployment Options & Streaming) examination of original title complete coverage. NS0-920 exam questions help you pass the exam.

Just4Study NS0-920 Feature:

* High quality - High quality and valued for the NS0-920 Exam: 100% Guarantee to Pass Your NS0-920 exam and get your NAC-NIE certification.

* Authoritative - Authoritative braindumps with complete details about NS0-920 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed NAC-NIE resources, you will minimize your **Network Appliance NAC-NIE** cost and be ready to pass your NS0-920 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free NAC-NIE demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the NS0-920 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free NS0-920 Demo Download

Just4Study offers free demo for NAC-NIE NS0-920 exam (NetCache Deployment Options & Streaming). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Network Appliance NAC-NIE NS0-920** examination of original title complete coverage. NS0-920 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: NS0-920

Exam Name: NetCache Deployment Options & Streaming(NAC-NIE)

Questions and Answers: 60 Q&A

[Network Appliance NS0-920](#) Test belongs to one of the NAC-NIE certified test, if needs to obtain the NAC-NIE certificate, you also need to participate in other related test, the details you may visit the [NAC-NIE](#) certified topic, in there, you will see all related NAC-NIE certified subject of examination.

Just4Study professional provide NAC-NIE NS0-920 the newest Q&A, completely covers NS0-920 test original topic. With our complete NAC-NIE resources, you will minimize your NAC-NIE cost and be ready to pass your NS0-920 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Network Appliance NS0-920

Title : Network Appliance NetCache Deployment Options and Streaming

1. What happens if you assign a service group ID of 4 on one NetCache appliance, and you assign a service group ID of 2 on another NetCache appliance?

- A. The two groups will load balance between each other.
- B. The WCCP router will automatically group the two together.
- C. Each NetCache appliance will join a different service group.
- D. The NetCache appliances use only the ID assignment for internal information, so there is no effect.

Answer: C

2. When traffic is tunneled, the NetCache appliance can take which two actions? (Choose 2)

- A. It can be used with manually configured browsers.
- B. It passes specified types of nonstandard traffic through without caching it.
- C. It examines the source and destination information, and caches the resulting objects.
- D. It receives requests and allows or denies based on ACLs.

Answer: BD

3. Which set of acceleration rules will best allow for acceleration of a Windows Media Server that uses MMS and HTTP for transport protocols?

NetCache IP: 10.1.2.3 netcache.server.com

Streaming Server IP: 10.1.2.5 m.server.com

- A.

```
streaming.acceleration.rules=\n10.1.2.3 1755 * * 10.1.2.5 1755 m.server.com *\n10.1.2.3 80 * * 10.1.2.5 80 m.server\n\n
```
- B.

```
config.streaming.acceleration.rules=\n10.1.2.3 1755 * * 10.1.2.5 1755 m.server.com *\n\nconfig.http.acceleration.rules=\n10.1.2.3 80 * * 10.1.2.5 80 m.server.com *\n\n
```
- C.

```
config.acceleration.rules=\nmms 10.1.2.3 10.1.2.5 netcache.server.com m.server.com\nhttp 10.1.2.3 10.1.2.5 netcache.server.com m.server.com\n\n
```
- D.

```
config.streaming.acceleration.rules=\n10.1.2.3 554 * * 10.1.2.5 554 m.server.com *\n10.1.2.3 80 * * 10.1.2.5 80 m.server.com *\n\n
```

\

Answer: A

4. When is information recorded into the Streaming Access log?

- A. When the client streaming connection is opened.
- B. Within 500 ms of connect.
- C. Throughout the streaming session.
- D. When the client streaming connection is closed.

Answer: D

5. A list of HTTP headers returned to a client for a cache hit on a stream may be viewed using the _____.

- A. smstats command
- B. sysstat command
- C. Streaming Details log
- D. object command

Answer: D

6. Which three are true about WCCP? (Choose 3)

- A. WCCP service groups must support a single protocol.
- B. WCCP service groups can consist of one or more routers or proxy-cache servers.
- C. WCCP service groups must be defined with the same settings.
- D. Traffic redirection and distribution are based on logical WCCP service groups.

Answer: BCD

7. When you have a Digital Rights Management (DRM) streaming, authentication is performed between which two devices?

- A. HTTP server and client player
- B. streaming media server and client player
- C. authentication server and router
- D. domain controller and streaming media server

Answer: B

8. What version(s) of SSH does NetCache support?

- A. Versions 1 and 2
- B. Version 2 only
- C. Versions 2 and 3
- D. Version 3 only
- E. None

Answer: A

9. Bandwidth allocation rules can be used to optimize streaming performance in which three ways? (Choose 3)

- A. They can allocate bandwidth by user and group.
- B. They can manage NetCache bandwidth utilization to ensure bandwidth for other uses.
- C. They can allocate bandwidth based on CPU and memory usage.
- D. They can restrict or deny connections.

Answer: ABD

10. What is the purpose of the "Here I Am" message?

- A. It identifies the NetCache appliance as the router.
- B. It identifies the service group membership.
- C. It announces that the NetCache appliance is available after a shutdown.
- D. It identifies that the NetCache appliance has received a request.

Answer: B

11. Request forwarding is useful for doing which of the following?

- A. To process URLs that are not cacheable, or for sites that use IP authentication.
- B. To force all traffic through the NetCache appliance.
- C. To create a load balancing scheme.
- D. To allow the NetCache to send the URL request as if it is coming from the cache and not the client.

Answer: A

12. Why must a Layer 4 switch be on the same subnet as the NetCache appliance?

- A. To use IP-GRE encapsulation.
- B. To prevent IP spoofing.
- C. To use MAC address rewriting.
- D. To monitor the health of the NetCache appliance.

Answer: C

13. Which statement about a Layer 4 switch is true? (Choose 3)

- A. It can be configured to pass non-HTTP traffic directly to the Web.
- B. It passes traffic based on the port number in a TCP/IP packet.
- C. It passes traffic based on the URL of the client's request.
- D. It uses MAC address rewriting to redirect packets.

Answer: ABD

14. Which can be determined about an .ASF object by using the object command?

- A. The playing time of the stream.
- B. The amount of disk space used to store it on the cache.
- C. The number of packets in the stream.
- D. The author of the stream.

Answer: C

15. How will the following configuration command affect the factory default configuration?

set config.http.transparency on

- A. NetCache starts listening promiscuously on port 80.
- B. NetCache stops listening on port 3128 and restarts listening promiscuously on port 3128.
- C. An error message is reported; no configuration change occurs.
- D. An error message is reported; NetCache starts listening promiscuously on all TCP ports.

Answer: B
